Denton, TX

PROFESSIONAL SUMMARY

Results-driven **Data Analyst / Business Analyst** with hands-on experience applying data analytics, visualization, and reporting to support decision-making across education, non-profit, and technology domains. Strong foundation in **data analysis, dashboard development, stakeholder collaboration, and process optimization**, with practical experience using **Python, SQL, Power BI, Tableau, Excel, Airtable, Google Cloud Platform (GCP), and other cloud-based analytics tools** through academic and applied projects. Experienced in translating business requirements into data-driven insights and communicating findings to technical and non-technical stakeholders. Seeking analytical roles where business intelligence, cloud-based analytics, and data storytelling drive impact.

TECHNICAL SKILLS

Programming & Analytics: Python, R, SQL, C, Java, Java Script

Data Visualization: Tableau, Power BI, MS Excel

Data Management: MS SQL Server, Excel, Airtable, Data Cleaning, Exploratory Data Analysis

Tools & Platforms: Microsoft Office Suite, Azure ML Studio, Google Cloud Platform (BigQuery, Cloud Storage)

Web Development: HTML, CSS

Operating Systems: Windows, Linux

EDUCATION

University of North Texas, Denton, TX

M.S. in Advanced Data Analytics

May 2025

GPA: 3.70 out of 4.0

Osmania University, Telangana, India

B.Eng. in Computer Sciences & Engineering

May 2022

GPA: 8.27 out of 10.0

PROFESSIONAL EXPERIENCE

University of North Texas, Denton, TX, USA

Business Analyst - International Recruitment Office

Jan. 2024 - Present

- Analyzed international admissions and recruitment data to support enrollment strategy, forecasting, and operational planning.

- Built and maintained **interactive dashboards** using **Power BI, Tableau, and Excel** to visualize student regions, previous universities, application stages, and conversion trends.
- Performed **data cleaning, validation, and exploratory analysis** to ensure accuracy across admissions and commission datasets.
- Monitored engagement and recruitment performance metrics to identify opportunities for improving outreach effectiveness.
- Prepared regular analytical reports and visual summaries for leadership to support data-driven decisions.
- Utilized cloud-based datasets and analytical workflows, including exposure to **Google Cloud Platform (BigQuery)**, for academic and applied reporting use cases.
- Acted as a key point of contact between students, consultants, and management, ensuring smooth communication supported by accurate data.

Denton Animal Shelter, Denton, TX, USA

Data Analyst Volunteer

Jun. 2025 - Present

- Designed and implemented a centralized **inventory and data tracking system** using **Airtable**, improving visibility into stock levels and ordering workflows.
- Cleaned, structured, and standardized operational data to align with reporting and compliance requirements.
- Built automated reports and tracking dashboards using **Airtable and Excel**, reducing manual effort and improving data accuracy.
- Applied basic data analysis techniques to identify usage patterns and support inventory planning decisions.
- Collaborated with shelter staff to gather requirements and translate operational needs into intuitive data solutions.
- Conducted training sessions and created documentation to onboard staff and ensure long-term adoption of new data tools.
- Supported improved decision-making by providing reliable, accessible, and well-documented data systems.

Trident International School, Hyderabad, India

Student Counsellor & Marketing Data Analyst

Jan. 2023-Apr. 2023

- Analyzed student enrollment and outreach data to identify market trends and recruitment opportunities.
- Supported admissions planning by tracking lead sources, conversion rates, and campaign performance using **Excel and reporting tools**.
- Built basic dashboards and weekly performance reports to support academic and administrative planning.
- Collaborated with school leadership to align recruitment strategies with data insights.
- Assisted in improving outreach efficiency through data-backed recommendations.

AI Variant, Bangalore, India

Data Analyst

Sep. 2022-Dec. 2022

- Performed **e-commerce data analysis** to identify customer behavior trends and product performance insights.
- Used **Python (Pandas, NumPy, Matplotlib/Seaborn)** and **SQL** for data cleaning, transformation, and exploratory analysis.
- Built visualizations and reports aligned with client KPIs to support marketing and optimization strategies.

- Leveraged cloud-based data concepts and datasets, including exposure to **GCP tools**, to support scalable data analysis during project work.
- Assisted in customer segmentation and trend mining to improve targeting and business outcomes.
- Communicated analytical findings clearly to both technical teams and business stakeholders.

Centre for Innovation and Entrepreneurship (IIIT-H), Hyderabad, India

Incubation Team Analyst

Jun. 2022-Aug. 2022

- Conducted secondary research and data analysis on startup ecosystem trends, funding data, and market landscapes.
- Applied cloud-based research and data organization practices, including familiarity with **GCP data services**, to support structured analysis and reporting.
- Organized and analyzed research data to support incubator strategy and reporting.
- Designed reusable report templates and dashboards to standardize insight delivery.
- Supported internal stakeholders with structured data and analysis for strategic discussions.

GrayLogic Technologies Pvt. Ltd., Hyderabad, India

Full Stack Developer

May 2020-Apr. 2022

- Contributed to the **Urban Kisaan** AgriTech project, supporting data-driven decision-making for operations and performance tracking.
- Worked extensively with **MySQL and SQL** to query, clean, and transform production and operational datasets.
- Built **Power BI dashboards** to visualize key metrics such as production trends, supply data, and operational performance.
- Collaborated with cross-functional teams to convert real-time business data into actionable insights.
- Supported backend data processing and frontend visualization requirements to ensure accurate reporting.
- Gained hands-on experience working with **real-world, production-level datasets** in a live application environment.
- Assisted in system performance monitoring and data validation to maintain data reliability.
