

VAMSEE KRISHNA

Devops Engineer

vamseekrish23@gmail.com | +1 (346) 562-4272 | [LinkedIn](#) | NJ, USA (Open to Relocation)

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 3 years of hands-on experience in designing, automating, and managing cloud infrastructure and deployment pipelines across AWS, Azure, and GCP environments. Skilled in implementing CI/CD workflows using Jenkins and Git, and provisioning cloud resources using Infrastructure as Code (IaC) tools such as Terraform and AWS CloudFormation. Strong background in containerization using Docker and orchestration with Kubernetes. Adept in scripting with Python and Shell to streamline deployment processes, improve system reliability, and support scalable, high-availability solutions in production environments.

TECHNICAL SKILLS

- Cloud Platforms:** Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP)
- Infrastructure as Code (IaC) & Automation:** Terraform, AWS CloudFormation, Ansible, Chef, Puppet
- CI/CD Tools:** Jenkins, GitLab CI/CD, Bamboo, Travis CI, CircleCI
- Containerization & Orchestration:** Docker, Kubernetes, Helm Charts, OpenShift
- Version Control Systems:** Git, GitHub, GitLab, Bitbucket
- Monitoring & Logging:** AWS CloudWatch, Prometheus, Grafana, Splunk
- Web & Application Servers:** Apache Tomcat, Oracle WebLogic, IBM WebSphere
- Scripting & Programming Languages:** Python, Bash, Shell scripting
- Databases:** MySQL, PostgreSQL, MongoDB, Cassandra, DynamoDB
- Operating Systems:** Linux (Ubuntu, Red Hat/CentOS), Windows Server

PROFESSIONAL EXPERIENCE

DevOps Engineer| Management control Inc. – Houston, TX| April 2024 – Present

- Contributed to the modernization of cloud infrastructure and DevOps workflows, supporting the deployment of scalable applications and infrastructure automation across multi-environment systems.
- Assisted in provisioning and deploying cloud infrastructure using Terraform and AWS CloudFormation, ensuring reusable and scalable environments to support internal and client-facing platforms.
- Supported CI/CD pipeline implementation using Jenkins, integrating tools like GitHub, Maven, and Nexus for automated code builds and artifact management.
- Participated in the containerization of legacy applications using Docker, and orchestrated deployments on Kubernetes clusters using Helm to streamline version control and scalability.
- Helped configure Elastic Load Balancers (ELBs) in AWS to improve traffic distribution and maintain high application availability under varying loads.
- Contributed to infrastructure observability by setting up Amazon CloudWatch, Prometheus, and Grafana dashboards for real-time performance monitoring and alerting.
- Assisted in managing AWS IAM roles, policies, and security groups to implement secure access controls aligned with least-privilege principles.
- Supported infrastructure automation using Chef, writing and testing basic cookbooks and recipes to reduce manual deployment.
- Gained hands-on exposure to UDeploy for managing deployment pipelines, ensuring consistent delivery workflows and rollback mechanisms across dev, test, and production environments.

DevOps Engineer| Zensar Technologies– Pune, India| April 2020 – June 2022

- Developed and maintained CI/CD pipelines using Jenkins and GitLab CI to support automated builds, testing, and deployments for both .NET and Java-based applications.
- Provisioned and managed cloud infrastructure across AWS and Google Cloud Platform (GCP) using Terraform and Puppet, enabling scalable and reliable hybrid cloud environments.
- Implemented GCP security best practices including VPC architecture, IAM role-based access control, and private networking to safeguard cloud workloads.
- Automated application deployment using Docker Compose, creating and managing custom YAML configurations to support multi-container setups across environments.
- Utilized JFrog Artifactory for artifact management and integrated SonarQube into the CI pipeline for continuous code quality and security checks.
- Wrote and maintained PowerShell and Shell scripts to automate deployment workflows, environment setup, and runtime configurations.
- Authored technical documentation covering migration strategies, deployment architectures, and incident resolution procedures to support DevOps operations and knowledge transfer.

EDUCATION

Masters of Technology in Cyber security | Saint Peter’s University, USA | Feb-2024

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional (Completed)
- AWS Certified Solutions Architect - Associate
- Certified Kubernetes Administrator (CKA)
