

SUMMARY

Business Data Analyst with **3 years of experience** improving reporting efficiency, forecasting accuracy, and decision-making across financial and healthcare domains. Skilled at defining KPIs, streamlining reporting workflows, and delivering insights that strengthen compliance, reduce operational delays, and support executive planning. Experienced in collaborating with cross-functional teams to translate business requirements into measurable outcomes, driving consistency and measurable business value.

TECHNICAL SKILLS

Data Analysis & Visualization: SQL, Excel, Power BI, Tableau, Looker

Programming & Data Handling: Python (Pandas, NumPy, Matplotlib), R (dplyr, ggplot2)

Data Warehousing & ETL: Snowflake, Redshift, BigQuery, MS SQL Server, SSIS

Business Analysis: Requirements Gathering, BRD/FRD Documentation, Gap Analysis, Process Mapping, Use Case Modeling

Business Intelligence & KPIs: Dashboard Development, KPI Tracking, Financial Analysis, Sales & Supply Chain Analytics

Statistical Methods: Hypothesis Testing, Regression, Forecasting, A/B Testing

Cloud Platforms: AWS (S3, Athena, Glue, Redshift), Azure (Data Factory, Synapse), GCP (BigQuery, Dataflow)

Tools & Methodologies: Agile, Scrum, JIRA, Confluence, MS Visio, MS Office Suite

Core Competencies: Data Storytelling, Stakeholder Communication, Problem-Solving, Collaboration

PROFESSIONAL EXPERIENCE

MetLife, OH, USA

Jan 2025 - Current

Business Data Analyst

- SQL-driven Power BI dashboards reducing reporting turnaround 35% and improving financial and operational decision-making.
- Predictive Python and R models enhancing actuarial reserve accuracy 20% across enterprise claims reporting processes.
- Automated AWS Glue and Snowflake pipelines consolidating multi-source policy and claims data for enterprise reporting.
- Compliance dashboards monitoring regulatory KPIs, strengthening audit readiness and operational risk oversight across departments.
- Self-service BI solutions reducing manual reporting 200+ hours quarterly, increasing efficiency for operations teams.
- Standardized KPI definitions aligning actuarial, finance, and operations teams, improving planning consistency enterprise-wide.
- Automated financial reporting workflows accelerating quarterly close timelines and delivering faster executive insights.
- Data storytelling presentations increasing stakeholder adoption and improving executive-level decision-making effectiveness.

Citius Tech, India

Jul 2022 - Aug 2023

Data Analyst

- Tableau dashboards improving KPI visibility 25% and enabling faster healthcare executive decisions.
- SQL and Python pipelines consolidating EMR, claims, and finance datasets, reducing reconciliation time 30%.
- Automated data validation checks improving accuracy of patient outcomes and compliance reporting metrics.
- Regression analysis on provider performance datasets uncovering actionable cost-saving opportunities.
- A/B testing healthcare quality metrics increasing compliance efficiency and optimizing program effectiveness.
- SQL cohort analysis providing insights into patient population segments for better operational planning.
- BI-driven client presentations strengthening engagement and driving adoption of actionable insights.
- Optimized pipeline scheduling under Agile reducing turnaround time for compliance reports and deliverables.

Intex Technologies, India

Aug 2021 - Jun 2022

Business Analyst

- BRDs and FRDs authored for Azure Synapse and Power BI migration improving enterprise reporting workflows.
- Gap analysis of legacy systems increasing workflow transparency and reducing redundancies organization-wide.
- Executive KPIs defined for sales, financial risk, and compliance, enabling improved leadership decisions.
- Risk monitoring dashboards established, enhancing compliance oversight across multiple business functions.
- Requirement workshops facilitated with cross-functional teams accelerating business readiness for analytics migration.
- Detailed process documentation and use-case models created improving adoption and reducing training needs.
- Process mapping initiatives eliminating duplication and improving efficiency across departments.
- Agile user stories validated against requirements ensuring accurate delivery of financial reporting features.

EDUCATION

Master of Science in Information Systems | Cleveland State University, OH, US

May 2025

Bachelor of Technology in Electronics and Communication Engineering | ACE Engineering College, Telangana, India

Jul 2022

PROJECTS

EV Network Efficiency Using a Data-Driven Approach

- Analyzed data from 150 charging stations to identify usage disparities, seasonal demand shifts, and environmental impact patterns.
- Built interactive Power BI dashboards with regression, KPI cards, and geospatial heat maps for executive reporting.
- Developed predictive demand models supporting infrastructure planning, capacity optimization, and long-term revenue growth strategies.

Strategic Analysis of AI Marketing in Nike & Adidas

- Designed game-theory models and predictive analytics to evaluate AI marketing strategies and competitive brand positioning.
- Performed sentiment analysis and customer segmentation, providing insights that improved campaign targeting and engagement effectiveness.
- Delivered recommendations supported by quantitative models to increase ROI, optimize pricing, and strengthen customer lifetime value.
