

VAMSHI KRISHNA REDDY THUMMETI

Data Analyst

Location: Hartford,CT | **Email:** Vamshikrishnart@gmail.com | **Phone:** (551) 328 - 4421 | [LinkedIn](#)

SUMMARY

- Data Analyst with over 4+ years of experience in analysing, interpreting, and transforming complex data into actionable insights.
- Proficient in Python, SQL, R, and data visualization tools such as Power BI and Tableau.
- Experienced with cloud platforms like AWS, focusing on data migration and integrating systems.
- Skilled in ETL processes, data cleansing, and data warehousing to ensure accurate and consistent data for analysis.
- Strong background in machine learning techniques including regression, KNN, decision tree, and random forest.
- Expertise in healthcare data analytics, including HIPAA compliance, EMR, and real-time patient monitoring systems.
- Proven experience in financial data migration, ensuring compliance and data integrity during cloud transitions.
- Developed predictive models and automated reports to enhance decision-making and drive operational efficiency.
- Adept at delivering interactive dashboards and collaborating with cross-functional teams to support data-driven decisions.

SKILLS

- **Programming Languages:** Python, SQL, R
- **Databases & Data Warehouses:** PostgreSQL, SQL Server, MySQL, Snowflake, Teradata, BigQuery
- **Data Visualization:** Power BI, Tableau, Advanced Excel
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Plotly, Seaborn, Streamlit, FastAPI, NLTK
- **Data Engineering:** Alteryx, Talend, Informatica, Apache Airflow, dbt
- **Cloud Platforms:** AWS (Redshift, DynamoDB, S3, Athena, Lambda)
- **Methodologies:** SDLC, Agile (Scrum), Waterfall
- **Version Control:** Git, GitHub
- **Machine Learning Techniques:** Regression, KNN, Decision Tree, Naive Bayes, Random Forest, LLM
- **Healthcare Technologies:** HIPAA, EMR, HER
- **Analytical Skills:** Data Mining, Data Cleansing, Statistical Analysis, Data Wrangling, Time Series Analysis, A/B Testing, Text Mining, ETL, Data Warehousing, SAP, SAS

WORK EXPERIENCE

Molina Healthcare

February 2025 – Present

Data Analyst

- Streamlined the end-to-end claims process by implementing machine learning models to automate claim validation and approval workflows.
- Utilized Python and SQL to analyse and clean large datasets, improving the accuracy and efficiency of the claims processing system.
- Developed automated reports and dashboards using Power BI, providing real-time insights into claims processing metrics and improving decision-making, leading to a 30% reduction in processing time.

Molina Healthcare

July 2024 – December 2024

Data Analyst – Intern

- Integrated wearable devices and sensor data to track patient vitals such as heart rate, blood pressure, and oxygen levels, providing real-time insights to healthcare providers.
- Analysed sensor data using Python and SQL, identifying trends and anomalies to alert healthcare providers of potential health risks.
- Developed and maintained Power BI dashboards that displayed real-time health data, enhancing the decision-making process for medical staff.
- Collaborated with cross-functional teams to ensure data accuracy, system performance, and compliance with healthcare regulations such as HIPAA.
- Conducted data cleansing and transformation to ensure high-quality, actionable data from real-time streams for timely medical interventions, resulting in a 20% improvement in early intervention response times.

Dell Technologies

January 2022 – July 2023

Data Analyst

- Assisted in the seamless transition of critical financial data to a secure cloud platform, ensuring compliance and data integrity throughout the process.
- Utilized SQL and Python to analyse and validate large datasets, ensuring accuracy and consistency across all data sources.
- Developed and maintained data mapping and transformation rules to ensure that financial data was properly aligned with cloud architecture requirements.
- Supported the implementation of ETL processes to streamline data extraction, transformation, and loading, improving efficiency by 25%.
- Collaborated with cross-functional teams to ensure the successful integration of financial systems with cloud-based data repositories while maintaining compliance with industry regulations.

- Conducted comprehensive data quality assessments and resolved any discrepancies or issues that arose during the migration process.
- Created detailed documentation and reports on data migration progress, key metrics, and post-migration performance for stakeholder review.

TatvaSoft	September 2019 – December 2021
Data Analyst	

- Worked on developing insights from patient data to improve patient-provider interactions, appointment management, and medical record tracking.
- Designed and implemented data pipelines for the integration of healthcare data across various platforms, ensuring seamless communication within the system.
- Utilized SQL and Python to extract, manipulate, and analyse patient data from various sources, providing actionable insights to improve service efficiency.
- Developed interactive Power BI dashboards for monitoring system performance, patient engagement, and appointment metrics in real-time.
- Collaborated with cross-functional teams, including developers and healthcare professionals, to ensure data integrity and compliance with HIPAA standards.
- Automated reporting processes, reducing manual work and increasing the speed of data-driven decision-making by 30%.
- Conducted data cleansing and validation to ensure the accuracy and completeness of patient information stored within the system.
- Assisted in the creation of predictive models to identify at-risk patients and optimize healthcare services, leading to improved patient retention rates.
- Supported ongoing data migration efforts to transition from legacy systems to cloud-based solutions, ensuring minimal disruption to healthcare services.

PROJECTS

Predictive Analytics for Employee Retention

- Developed predictive models using R and Machine Learning to forecast employee attrition and recommend retention strategies.
- Delivered insights through Power BI dashboards, enabling HR to proactively address retention risks.

Real-Time Customer Feedback Analysis

- Developed an automated system to collect and analyse customer feedback from multiple channels using Python and NLTK, providing actionable insights for customer satisfaction improvement.
- Created a Power BI dashboard to visualize sentiment trends and identify key areas of improvement, enhancing customer experience strategies.

EDUCATION

- | | |
|--|------------------------------------|
| <ul style="list-style-type: none"> • Master of Science in Business Analytics
Sacred Heart University, Fairfield, CT GPA: 3.793 | August 2023 – December 2024 |
| <ul style="list-style-type: none"> • Bachelor of Arts
Osmania University, Hyderabad, Telangana, India GPA: 8.9 | May 2019 – June 2022 |
