SUMMARY

Software Development Engineer with over 2 years of experience in designing, developing, and deploying responsive, scalable web applications. Skilled in front-end development using React.js, Next.js, HTML, CSS, and JavaScript to deliver intuitive, high-performance user interfaces. Proficient in backend development with Python (Flask, Django) and RESTful APIs, integrating secure and efficient database solutions. Experienced in deploying cloud-native applications on AWS, optimizing performance, and ensuring scalability across the full SDLC. Adept at working in Agile environments, delivering maintainable, high-quality code, and leveraging modern frameworks to accelerate development and meet business objectives.

SKILLS

Methodologies: SDLC, Agile, Waterfall, Automated Testing, Test-Driven Development (TDD)

Languages: Python, SQL, C, C++, JavaScript, TypeScript

Frameworks: Flask, React.js, Next.js, Node.js

IDEs: Visual Studio Code, PyCharm

Web Technologies & Cloud: HTML, CSS, Bootstrap, REST APIs, OpenAPI, JWT, AWS, Docker, Kubernetes

Databases: MySQL, PostgreSQL, MongoDB

Others: Git, GitHub, GitLab, Jira, Jenkins, Trello, JMeter, Windows, Linux, Mac

EXPERIENCE

JP Morgan Chase

Jan 2025 - Present

Software Development Engineer

USA

- Led full-stack development of enterprise-level applications using Spring Boot, and RESTful microservices, enhancing system resilience and supporting high-throughput transaction processing.
- Developed dynamic, responsive front-end components with React.js and AngularJS, improving user satisfaction by 35% through optimized load times and cross-browser compatibility.
- Deployed scalable cloud-native applications on AWS, achieving 98% uptime and ensuring continuous access to critical services.
- Considered and implemented user interfaces with HTML, CSS, and JavaScript, utilizing jQuery for enhanced interactivity, while adhering to accessibility and usability standards to improve the user experience.
- Streamlined CI/CD pipelines using Jenkins and Maven, reducing deployment time by 25% and accelerating Agile release cycles.
- Industrialized scalable web applications with Python, Django, and Flask, while leveraging NumPy and Pandas for data analysis to drive business insights.
- Architected RESTful APIs to facilitate efficient communication between distributed systems with optimized payload delivery.
- Worked with Agile teams using Jira, GitHub, etc., ensuring transparency, collaborative development, and rapid issue resolution.
- Employed MySQL, PostgreSQL, and SQL Server to manage data storage and optimize query performance.

Mindtree

Mar 2022 - Nov 2023

Software Development Engineer

India

- Oversaw end-to-end software delivery by collaborating with development, QA, DevOps, and release teams to ensure timely and stable deployments throughout the SDLC.
- Designed RESTful APIs and microservices using Spring and JSF, improving data reliability and optimizing SQL query execution.
- Developed scalable web applications using Python, Flask, and Node.js, reducing processing time by 20% and leveraging Pandas and Requests to analyze datasets, delivering insights that increased decision-making accuracy by 25%.
- Automated decision-making workflows through AI inference pipelines integrated with cloud services such as Azure.
- Implemented TypeScript and Next.js to build scalable applications, enhancing code quality and reducing development errors.
- Advanced robust server-side components using JavaBeans, JDBC, and JavaMail, enhancing backend communication and reducing response latency.
- Applied Test-Driven Development practices with JUnit, JMeter, and Selenium, enhancing code reliability and application stability.
- Integrated Python-based services and GCP tools to contribute to AI-driven automation capabilities.
- Improved database performance and scalability by integrating MongoDB and optimizing data access through Hibernate.
- Enhanced front-end responsiveness by implementing AJAX workflows, jQuery features, and JSON/XML integration for smooth and dynamic user interactions.

EDUCATION

Master of Science in Computer Science

University of Alabama at Birmingham

May 2025

Birmingham, AL

Bachelor of Technology in Computer Science

CMR Engineering College

Jul 2022

Telangana, India

CERTIFICATION

AWS Certified Cloud Practitioner
