PROFESSIONAL SUMMARY

Data Analyst & Cloud Data Engineer with 4+ years of experience designing and optimizing data pipelines, cloud migrations, and analytics platforms across financial and insurance domains. Proven expertise in building scalable data architectures, automating ETL/ELT workflows, and ensuring data quality and performance. Strong background in cloud technologies, data governance, and lakehouse design to support enterprise analytics and reporting. Skilled in leveraging Python and modern data frameworks to deliver actionable insights and process automation. Passionate about developing efficient, secure, and data-driven solutions that empower smarter business decisions.

TECHNICAL SKILLS

Programming & Scripting: Python, SQL, R, Scala, Shell Script, Bash

Python & AI Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, PySpark

Big Data & Stream Processing: Apache Spark, Spark Streaming, Kafka, Hadoop, Hive, Delta Lake

Visualization & Reporting: Tableau, Power BI, Advanced Excel, KPI Dashboards, Risk & Compliance Dashboards

Databases & Warehousing: Snowflake, AWS Redshift, Oracle, SQL Server, PostgreSQL, MySQL

ETL & Data Pipelines: Informatica IICS, Apache Airflow, AWS Glue, IBM DataStage, Control-M, Python-based ETL Frameworks

Cloud Platforms: AWS (S3, Redshift, Glue, EC2, EMR, Lambda, IAM), Azure (Databricks, Data Factory, SQL Database)

APIs & Data Validation: Postman (API Testing), REST API Development, Data Verification (DBever, Snowflake Mapping)

Data Quality & Governance: Data Modeling, Data Warehousing, Data Validation, Cleansing, Audit Readiness, dbt Testing

Automation & Optimization: Automated ETL Workflows, CI/CD Pipelines, Splunk Monitoring, Unit Testing, Job Orchestration, Reporting

Business & Analysis: Forecasting, Benchmarking, Sensitivity Analysis, Stakeholder Communication, Agile / SDLC

Project Management & Collaboration Tools: JIRA, Rally, Confluence, Agile / Scrum Frameworks

Systems & Tools: Linux, VMware, Mainframes, SAS, REST API Integrations

Soft Skills: Stakeholder Management, Team Leadership, Mentorship, Client Communication

WORK EXPERIENCE

Data Analyst, Citizen Bank, Remote, USA

Jan 2025 – Present

- Designed and automated end-to-end ETL pipelines using Informatica IICS, AWS Glue, and PySpark for large-scale data processing.
- Migrated ETL workflows to AWS Redshift and Snowflake with automated deployment and monitoring through CI/CD pipelines.
- Built Python-based data validation frameworks integrating with Jenkins to automatically detect and flag data anomalies.
- Automated Postman API testing and integrated Splunk alerts for real-time monitoring of pipeline performance.
- Created Power BI and Tableau dashboards that auto-refresh with live data feeds for regulatory and risk reporting.
- Implemented job orchestration and auto-recovery workflows using Control-M, reducing manual dependency.
- Collaborated with cross-functional engineering teams to implement automation standards across data integration projects.

Data Analyst, Infosys, National Australian Bank, Hyderabad, India

Sep 2021- Aug 2023

- Developed automated data ingestion pipelines using Airflow, Python, and SQL to handle large-scale financial data loads.
- Designed self-healing workflows in Airflow for error detection, retries, and automated dependency resolution.
- Created Jenkins-based CI/CD pipelines to automate deployment, environment setup, and job versioning.
- Built automation scripts for schema validation and data lineage tracking across multiple Snowflake environments.
- Integrated API testing, audit logging, and monitoring workflows using Python and Postman automation.
- Collaborated with compliance teams to establish automated reporting aligned with Basel III and APRA standards.
- Enhanced DevOps integration by automating testing and deployment steps, ensuring continuous delivery of ETL updates.

Data Analyst, HDFC Life Insurance, Remote, India

Jun 2019 - Sep 2021

- Designed ETL workflows in Informatica PowerCenter with parameterized automation for daily policy and claims processing.
- Created Unix shell scripts to automate data extraction, file validation, and report delivery across multiple systems.
- Built Excel-based KPI dashboards that automatically aggregated and refreshed data from SQL sources.
- Automated PL/SQL jobs and scheduling to reduce manual report generation and improve data consistency.
- Implemented automated data cleansing routines to reconcile discrepancies between source and reporting layers.
- Collaborated with actuarial teams to automate actuarial data preparation workflows for compliance and auditing.
- Contributed to data warehouse automation initiatives by optimizing batch processes and enabling continuous integration.

PROJECTS

FinTech Transaction Platform

- Designed and implemented a financial transaction data platform supporting real-time and batch analytics.
- Designed and optimized end-to-end data pipelines, ensuring smooth data flow, high quality, and strong performance across systems.

SWIFT(ISO) International Payments System

- Designed, deployed, and maintained data pipelines for global payment transactions under SWIFT standards.
- Automated ETL processes for cross-border data validation, improving system accuracy and reducing latency.

Fraud Detection System

- Developed and implemented data pipelines to identify fraudulent transactions using pattern analysis and statistical models.
- Validated data integrity, optimized fraud detection logic, and delivered dashboards highlighting risk insights for audit teams.

EDUCATION

Master of Science in Information Systems Technology, **Wilmington University**

Aug 2023- May 2025

CERTIFICATIONS

- [Microsoft Azure Fundamentals](#)
