

VAMSI SAKAMURI

New Jersey, NJ • vamsisakamuri126@gmail.com • (217) 790-5911 • www.linkedin.com/in/vamsi-sakamuri

PROFESSIONAL SUMMARY

DevOps Engineer with 4+ years of experience designing, automating, and securing large-scale AWS cloud environments, with hands-on expertise building infrastructure to support AI/ML pipelines and chatbot applications. Skilled in CI/CD automation, Infrastructure as Code, container orchestration, cost optimization, and implementing security frameworks for mission-critical cloud systems. Strong background in AWS services, Linux administration, and observability platforms, with a proven record of improving system efficiency, scalability, and resilience.

EDUCATION

Eastern Illinois University – Charleston, IL

May 2025

Masters in Computer Science

- Graduate Assistant: Advanced Database Technologies & Advanced Cloud Computing

Kalasalingam University – Tamil Nadu, India

May 2020

Bachelor of Technology in Electronics and communication Engineering

- Leadership: Nature Club Vice President; Started Association of Computing Machinery Club, Fine Arts Vice President

PROJECTS

AI-Governance (*In progress*)

Built an AI-powered bug tracking system using React, Node.js, and PostgreSQL with OpenAI integration to auto-summarize and suggest resolutions for reported issues, improving triage speed by 60%

IoT-Based Coal Mine Safety Monitoring and Alerting System

Developed an IoT-based coal mine safety system using Arduino and cloud integration that improved real-time hazard detection accuracy by 85%, reduced emergency response time by 40%, enhancing safety through automated alerts and data-driven monitoring.

EXPERIENCE

Cognizant – New Jersey, NJ

June 2024 – Present

Senior Full Stack Engineer

- Architected secure AWS environments (EC2, EKS, S3, IAM, VPC) to support AI/Chatbot applications, enabling real-time responses under high traffic and improving system reliability by 30%
- Automated end-to-end CI/CD pipelines using GitHub Actions, Jenkins, and AWS CodePipeline, eliminating manual deployments and cutting release cycles from hours to 20 minutes
- Implemented Terraform and CloudFormation IaC modules, ensuring consistent, repeatable cloud infrastructure and reducing configuration errors by 90% across multiple environments.
- Developed Python/Bash automation scripts for instance lifecycle, log processing, and resource cleanup, saving the team 10+ hours/week and improving operational efficiency.

Capgemini

Full Stack Cloud Engineer

June 2020 – July 2023

- Integrated security controls (IAM, KMS, RBAC, audit logging) for chatbot data workflows, strengthening compliance and reducing security risks by 25%
- Optimized AWS cost structure through right-sizing, S3 lifecycle policies, and reserved instances, achieving 20–25% monthly cloud cost savings without impacting performance
- Improved observability by deploying Prometheus, Grafana, and CloudWatch dashboards, which reduced mean-time-to-recovery (MTTR) by 35% and prevented outages

CERTIFICATIONS & SKILLS

- AI Agents, AWS, Azure, GCP, Python, SQL, Apache Spark, Power BI, Grafana, Docker, Kubernetes, Terraform, Linux, Process Optimization, Agile Methodologies, Ansible, JIRA, Figma, Product Road mapping, User Research, Cross-Functional Leadership, Business Process Automation

- AWS Cloud Quest: Cloud Practitioner, IBM Cloud Practitioner Essentials, Microsoft Azure Fundamentals (AZ-900), Google Cloud Skill Boost Badges, Executive Program in Business & Data Analytics
- Executive Presentations, Storytelling with Data, AI Fluency, Microsoft Excel, Strategic Decision-Making
