

Vanamala Krishna Chaitanya

Supply Chain Analyst

+1 (781) 540-1784 | vanamalakc@gmail.com | Irving 75063

SUMMARY

Detail-oriented Supply Chain Analyst with 4+ years of experience across pharmaceutical, electronics, and IT logistics sectors. Skilled in turning complex data into simple, actionable insights that improve forecasting, reduce inventory waste, and streamline vendor operations. Hands-on with tools like SQL, Python, Power BI, and SAP, with a strong track record of improving delivery timelines, cutting costs, and helping teams make smarter decisions. Passionate about solving real-world problems through data, collaboration, and process improvement.

SKILLS

Data Handling: SQL, Excel (Pivot Tables, Power Query), Python (pandas, ARIMA, geopandas)

BI & Reporting: Power BI, Tableau, Excel VBA, Confluence

Forecasting & Demand Planning: ARIMA, Trend Analysis, Moving Averages, Classification Models

ERP Systems: SAP ECC, SAP Business One, Oracle Demantra

Supply Chain Ops: Inventory Optimization, BOM Analysis, Vendor Consolidation, Reverse Logistics

Communication: SOP Documentation, Cross-functional Collaboration, Executive Reporting

EXPERIENCE

Supply Chain Analyst, Catalent, USA

August 2024 – Present

- Improved forecast accuracy for Zydis® ODTs from 71% to 83% by analyzing 3 years of data and identifying trends using SQL, Python (pandas), and Power BI.
- Reduced inventory holding costs by 9% by aligning actual demand with production and minimizing overstock through data-driven dashboards.
- Increased on-time delivery rate from 91% to 96% by bridging communication between demand planners and clients for better forecast justification.
- Automated forecast feedback using Excel VBA, enabling clients to tag forecast changes with reasons like campaigns or new launches.
- Collaborated with data scientists to enhance forecasting logic using hybrid models combining moving averages and business input tags.
- Delivered monthly executive reports highlighting key forecast deviations, risks, and actionable insights, and documented all processes in SOPs.
- Standardized data units across multiple sources (SKUs, regions, packaging) to tablets, ensuring consistent and reliable reporting across planning tools and reducing confusion during forecasting reviews.

Supply Chain Analyst, Intex Technologies, INDIA

June 2020 – August 2022

- Reduced deadstock by 27% in 4 months by identifying obsolete phone parts using Excel and Python trend analysis.
- Predicted demand for 20 critical spare SKUs using ARIMA models and automated classification tagging (Obsolete, Slow-Mover, Critical).
- Enabled ₹8.5 lakhs worth of vendor returns by updating procurement policies with return clauses for low-demand parts.
- Consolidated BOMs of 32" and 40" LED TVs to identify 18 shared components and simplified procurement operations.
- Cut procurement vendor count from 9 to 4 and saved ₹1.3 crore annually by analyzing vendor overlaps and negotiating better deals.
- Improved part delivery lead time by 5 days by analyzing vendor KPIs and using sourcing dashboards to support decisions.

Supply Chain Analyst Intern, Hexaware Technologies, INDIA

June 2019 – June 2020

- Built demand-supply alignment dashboards in Tableau for HP printer service parts across 12 zones, reducing downtime from 5.8 to 3.2 days.
- Increased part availability compliance to 94% by using zone-level heatmaps and proactive stockout alerts.
- Cut return cycle time of used cartridges from 11 to 6 days by mapping route delays with GPS data using Python (geopandas).
- Reduced transport costs by 22% through return volume forecasting and switching to bulk pickups.
- Built SLA dashboards and automated vendor alerts, improving pickup performance and recycling timelines.

EDUCATION

Masters in Mechanical Engineering-Design and Manufacturing

August 2022 – May 2024

Clemson University, South Carolina

Bachelors in Mechanical Engineering

August 2017 – July 2021

CMRCET- Hyderabad, INDIA

CERTIFICATES

- Logistics and Supply Chains -Fundamentals, Design, Operations
