PROFESSIONAL SUMMARY

Detail-oriented and results-driven Frontend Developer and Data Science Enthusiast with hands-on experience in building responsive, user-focused web applications using React.js, Next.js, and Tailwind CSS. Strong foundation in full-stack development, machine learning, and time-series forecasting. Passionate about creating intuitive user experiences and leveraging data to solve real-world problems. Adept at collaborating with cross-functional teams and delivering high-quality solutions under tight deadlines. Recently graduated with a Master's in Computer Science, with strong academic and research exposure.

EDUCATION:

Master of Science in Computer Science

May 2025

Montclair State University, Montclair, NJ

Bachelor of Computer Applications

Jul 2023

Osmania University, Hyderabad, Telangana, India

Coursework: Data Structures, Algorithms, Programming Methodologies, Computer Systems, Software Engineering, Database Systems, Web development, Data Science using Python, Artificial Intelligence

EXPERIENCE:

Research Assistant, Montclair, NJ

Jun 2024 – May 2025

Department of Computer Science, Montclair State University

- Conducted research on predicting harmful algal bloom (HAB) indicators including microcystin, total phytoplankton, and total cyanobacteria in the Raritan Basin Water Supply Complex using USGS environmental datasets
- Designed and implemented machine learning models such as LSTM and XGBoost for time-series forecasting, achieving improved predictive accuracy over baseline methods
- Performed extensive data preprocessing, feature engineering, and imputation of missing environmental parameters to enhance model robustness
- Evaluated model performance using statistical metrics and created visualizations to effectively communicate findings to research advisors
- Co-authored research paper in preparation for submission to IEEE BigData 2025 (Macau, December 2025)

UpUnikSelf Inc, Dover, DE, United States

Jan 2025 - Apr 2025

Frontend Developer Intern

- Developed and maintained responsive web applications using React.js, Next.js, and Tailwind CSS, optimizing performance, scalability, and cross-device compatibility for a rapidly growing e-commerce platform
- Enhanced UI/UX by refining components such as buttons, forms, tables, and banners, ensuring visual consistency and intuitive interaction across desktop and mobile devices
- Optimized mobile responsiveness, enabling a seamless user experience for vendors and customers on smartphones and tablets
- Collaborated with backend developers to integrate payment gateway features, vendor account settings, and currency selection options, ensuring accurate data synchronization across systems
- Implemented API integrations to improve platform functionality, including dynamic Fiat and Selling Currency settings in payment configurations

- Participated in daily code reviews, improving code quality, maintainability, and adherence to best practices through peer feedback and collaborative problem-solving

Fratello Innotech, Hyderabad, India

Feb 2023 - May 2023

Software Development Intern

- Developed an Online Public Portal for Posting Personal Blogs using Python, Django, HTML, CSS, JavaScript, Bootstrap, and MySQL, enabling users to create accounts, publish blogs, and interact with content in real-time
- Designed and implemented user registration, authentication, and profile management features to ensure secure and personalized user experiences
- Built and styled responsive web pages with a focus on usability, accessibility, and consistent branding across devices
- Integrated blog management modules for creating, editing, viewing, commenting, and sharing blog posts, leveraging Django's MVC architecture for maintainability
- Conducted functional, integration, and user acceptance testing to ensure reliability, security, and performance of the application before deployment
- Collaborated with a small development team, participating in code reviews and applying feedback to enhance system quality and user experience

SKILLS:

- **Programming Languages:** Python, JavaScript, Java, PHP, SQL
- **Frontend Development:** React.js, Next.js, Angular, HTML, CSS, Tailwind CSS, Bootstrap
- **Backend & Frameworks:** Node.js, Flask, Django
- **Data Science & Machine Learning:** Pandas, NumPy, Matplotlib, TensorFlow, Scikit-learn, XGBoost, PySpark, OpenCV
- **Data Analysis & Visualization:** Data Analysis, Data Modeling, Tableau, Spreadsheets, Power BI
- **Databases:** MySQL, MongoDB, Firebase
- **Tools & Platforms:** Git, GitHub, Docker, Apache Tomcat, Jupyter Notebook, VS Code

CERTIFICATES & ACHIEVEMENTS:

Data Analytics , Deloitte(Forage)	2025
GenAI , BCG(Forage)	2025
Python , DataCamp	2024
Java Full Stack , Udemy	2024
MEAN Stack , Simplilearn	2023
Develop rich frontend with Angular , Simplilearn	2023

PROJECTS:

US Doctor Database Analysis and Visualization

Department of Computer Science, Montclair State University

- Conducted large-scale analysis of the National Provider Identifier (NPI) dataset to identify patterns in medical practices, taxonomies, and geographic distribution of healthcare providers across the U.S.
- Utilized PySpark for distributed data processing, enabling efficient handling of millions of records.
- Performed data validation and quality checks to ensure accurate provider details.
- Developed interactive visualizations using Matplotlib to display doctor distribution by specialty and location, supporting healthcare workforce insights.
- Enhanced querying workflows with PySpark and Pandas, improving analysis speed and scalability.

Netflix Titles Data Analysis & Visualization

Department of Computer Science, Montclair State University

- Processed and cleaned the Netflix Titles dataset by handling missing values, correcting inconsistencies, and splitting multi-country/genre entries into structured formats.
- Applied Python, Pandas, and Matplotlib to analyze viewing trends, production counts, and contributions of directors and countries to Netflix's content library.
- Created visual dashboards to highlight trends in movie and TV series releases over time.
- Extracted actionable insights on global entertainment production, supporting data-driven storytelling.

A Face detection and Recognition System

Department of Computer Science, Montclair State University

- Designed and implemented an automated attendance management system using Python and OpenCV.
- Integrated advanced face recognition algorithms to identify and validate students in real-time, reducing attendance fraud.
- Built a user-friendly interface for seamless integration with classroom systems.
- Improved operational efficiency by replacing manual attendance with a fully automated process.

Chatbot for customer support

- Built a conversational chatbot using Python and Flask, capable of handling customer queries through a web interface.
- Integrated Microsoft DialoGPT for natural language understanding, enabling human-like responses.
- Used JSON for dynamic configuration and data management, ensuring easy scalability and maintainability.
- Enhanced customer engagement through instant, accurate, and context-aware responses.

Online food order application

- Developed a responsive food ordering platform using HTML, CSS, Bootstrap, and JavaScript.
- Implemented dynamic order placement and real-time updates through JavaScript event handling.
- Ensured cross-device compatibility with Bootstrap's responsive design features.
- Delivered an intuitive user experience, streamlining the process from menu selection to checkout.
