

Varshini Reddy

Data Analyst | Business Analyst

Location: GA, USA | Phone: +1 361-214-1591 | Email: varshniredy01@gmail.com

[www.linkedin.com/in/varshini-g18]

PROFESSIONAL SUMMARY

Accomplished Data Analyst and Business Analyst with 4+ years of experience in healthcare, finance, and insurance sectors, specializing in ETL pipeline design, cloud data warehousing, and interactive dashboards to drive operational efficiency and informed decision-making. Proficient in SQL, Python, R, Tableau, Power BI, and multi-cloud platforms (AWS, Azure, GCP) for predictive modeling, anomaly detection, and compliance-ready reporting (HIPAA, SOX, GDPR). Delivered 35% reduction in manual reporting, 40% faster data ingestion, and 18% increased customer engagement through data-driven insights and process optimizations. Eager to leverage analytical expertise and stakeholder collaboration to enhance business outcomes in dynamic, regulated environments.

CORE COMPETENCIES

Data Analysis & Technical Skills SQL (T-SQL, PL/SQL, Joins, Aggregations, Subqueries) | Python (Pandas, NumPy, Scikit-learn, XGBoost, Prophet) | R (dplyr, ggplot2) | Data Cleaning & Validation (Power Query, Regex, Missing Value Handling) | ETL/ELT Processes (Apache Airflow, SSIS, Azure Data Factory, Talend, Informatica) | Statistical Techniques (Regression, Clustering, PCA, T-tests, ANOVA) | Predictive Analytics (Time Series, Anomaly Detection, Decision Trees)

Business Intelligence & Visualization Tableau | Power BI (DAX) | Looker | QlikView | Google Data Studio | Matplotlib, Seaborn, Plotly | KPI Dashboards | Interactive Filters & Drill-Down Analytics | Data Storytelling & Executive Reporting

Data Management & Cloud Platforms Databases: SQL Server, PostgreSQL, MySQL, Oracle, MongoDB | Data Warehousing: Snowflake, Redshift, BigQuery, Teradata | Big Data: PySpark, Hadoop, Hive, Kafka | Cloud: AWS (S3, Athena, QuickSight, Glue), Azure (Data Factory, Blob Storage), GCP (BigQuery, Data Studio) | APIs (REST, JSON/XML) | Data Governance & ETL Concepts

Business & Domain Expertise Process Optimization & Root Cause Analysis | Cost-Benefit Analysis & ROI Modeling | Agile/Scrum Methodology | Stakeholder Requirements Gathering | Business Process Reengineering | Domain: Healthcare (EHR, ICD-10, FHIR, HL7), Finance (P&L, Fraud Detection, SOX), Insurance (Claims, Churn, LTV) | Regulatory Compliance: HIPAA, GDPR, SOX, IFRS 17

Soft & Professional Skills Analytical & Critical Thinking | Problem Solving | Cross-Functional Collaboration | Communication & Data Storytelling | Time Management under Deadlines | Documentation (SOPs, Data Dictionaries, Technical Specs) | Tools: JIRA, Confluence, ServiceNow, MS Office Suite

PROFESSIONAL EXPERIENCE

Data Analyst, Tenet Healthcare, USA

September 2024 – Present

- Developed interactive Tableau dashboards integrated with Snowflake and AWS Redshift, reducing manual reporting efforts by 35% and delivering real-time KPIs for clinical and operational performance, enabling faster executive decision-making.
- Automated data cleansing and transformation pipelines using Python (Pandas, NumPy, regex) and Power Query in Excel, achieving 25% improvement in reporting accuracy across multi-departmental datasets.
- Designed scalable ETL pipelines with SSIS, Apache Airflow, and Azure Data Factory, integrating multi-source data into Snowflake and BigQuery, ensuring 99% data reliability and supporting HIPAA-compliant interoperability.
- Implemented anomaly detection and validation scripts in Python and SQL Server, identifying irregularities in EHR and billing data to reduce reporting errors by 20% and drive cost-saving initiatives valued at \$200K annually.
- Analyzed clinical datasets (EHR, ICD-10, FHIR, HL7) using SQL and R for pattern recognition, conducting regression and correlation analyses to optimize resource allocation and enhance patient outcomes.
- Built predictive models with Scikit-learn for forecasting clinical trends, translating complex outputs into business insights via Power BI visualizations, aligning with Agile sprints for iterative stakeholder feedback.
- Migrated legacy SQL reports to cloud-hosted Tableau environments, improving scalability by 50% and facilitating drill-down analytics for financial and operational metrics.
- Created KPI scorecards combining Tableau, Excel, and PowerPoint, tracking P&L variances and ROI to support strategic planning and cross-functional alignment.
- Utilized **Jama Connect** for requirement traceability and test case management, ensuring end-to-end validation of analytics solutions in Agile development cycles.
- Collaborated with clinical, finance, and IT leaders to elicit business requirements, delivering analytical solutions with measurable ROI and authoring SOPs for HIPAA governance.
- Integrated Azure Health Data Services and Google Healthcare API for secure patient data flows, ensuring FHIR-compliant interoperability and reducing integration time by 30%.

Data Analyst Hexaware Technologies, India

February 2020 – April 2023

- Processed and analyzed 5M+ records in financial, claims, and risk datasets using SQL (T-SQL, PL/SQL) and PySpark, enabling fraud detection models that mitigated \$1.5M in potential losses for insurance clients.
- Optimized ETL pipelines with SSIS, Azure Data Factory, and AWS Glue, integrating Oracle, MySQL, and SQL Server sources to cut data ingestion time by 40% and support real-time underwriting decisions.
- Designed Power BI dashboards with DAX for claims performance, loss ratios, and customer LTV tracking, enhancing executive transparency and driving 15% improvement in risk assessment accuracy.

- Performed customer segmentation and churn prediction using R (clustering, PCA) and Python (Scikit-learn, XGBoost), informing targeted campaigns that boosted engagement by 18% and reduced churn by 12%.
- Applied time-series forecasting (ARIMA, Prophet) and anomaly detection in Python/R to predict financial trends, achieving 85% accuracy in investment strategy recommendations.
- Standardized SOX and IFRS 17-compliant reporting with Informatica and SSIS, conducting root cause analysis to ensure audit readiness and reduce compliance discrepancies by 25%.
- Orchestrated multi-cloud integrations (Azure, AWS, GCP) via Talend and REST APIs, streamlining cross-platform data flows and improving reporting efficiency for global stakeholders.
- Developed comprehensive data dictionaries, SOPs, and technical specs, facilitating seamless onboarding and knowledge transfer for client teams.
- Developed reusable API automation scripts in Python and integrated them with Azure Data Factory pipelines for continuous data ingestion and transformation.
- Collaborated with cross-functional teams using Jama Connect to capture and track analytical requirements, ensuring full traceability from business need to technical delivery.
- Partnered with product owners and SMEs in Agile environments to define KPIs, refining dashboards to align with business goals and incorporating feedback loops for continuous improvement.
- Enhanced data quality through SQL-based validation and Informatica monitoring, resolving reconciliation issues by 25% and mentoring juniors on optimization techniques to accelerate team deliverables.

EDUCATION

Master of Science in Computer Science , Auburn University at Montgomery, Montgomery, AL	May 2023 – December 2024
• Relevant Coursework: Data Analytics, Machine Learning, Cloud Computing, Business Intelligence	
Bachelor of Science in Computer Science , Guru Nanak Institute of Technology, India	June 2018 – July 2022

CERTIFICATIONS

- Fundamentals of Architecting Scalable Cloud Solutions (AWS, 2024)
- SQL for Data Science (Coursera/DataCamp, 2023)
- Microsoft Certified: Power BI Data Analyst Associate (2024)
- Google Data Analytics Professional Certificate (2024)

AWARDS & VOLUNTEER EXPERIENCE

- Award of Excellence, Rotaract Club of OMC (2022) – Recognized for leading community service, fundraising, and social impact projects, fostering cross-functional teamwork and project management skills.
