

# Varun Kunde

## Full Stack Java Developer

Schaumburg, IL | +1 (585) 351-1202 | [varun.kunde199@gmail.com](mailto:varun.kunde199@gmail.com) | [LinkedIn](#) | [Portfolio](#)

### Summary

---

- **Full Stack Java Developer with around 4 years of experience** developing scalable web applications using Java, Spring Boot, Hibernate, and RESTful APIs on the backend, with expertise in React.js/Angular for modern front-end development.
- Proficient in Java, Spring Framework (Spring Boot, Spring MVC, Spring Security, Spring Cloud), and Microservices Architecture, ensuring high-performance and maintainable backend systems.
- Hands-on experience with React.js/Angular, JavaScript, TypeScript, HTML5, and CSS3, implementing responsive UI/UX with state management libraries (Redux, Context API).
- Strong knowledge of SQL and NoSQL databases (PostgreSQL, MySQL, MongoDB), with expertise in writing optimized queries, database design, and stored procedures.
- Experience deploying and managing applications on AWS/Azure, utilizing Docker, Kubernetes, Jenkins, and CI/CD pipelines for automated deployments and infrastructure scalability.
- Skilled in implementing JWT, OAuth2, role-based authentication, and OWASP security standards, along with performance tuning using caching mechanisms (Redis, Memcached).
- Adept at working in Agile/Scrum environments, collaborating with cross-functional teams, conducting code reviews, and leveraging Git, JIRA, and Confluence for version control and project management.

### Skills

---

**Methodology:** SDLC, Waterfall, Agile

**Programming Languages:** Java, C++, PL/SQL, Python, Scala, Go

**Frameworks:** Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Spring Data JPA, React, Angular

**J2EE Technologies:** Servlets, JSP, JDBC, JUnit, JAXB, JMS, JSTL, Multi-threading, EJB, JavaBeans, JSF

**IDEs & Databases:** IntelliJ IDEA, Eclipse, Visual Studio Code, Oracle, MySQL, SQL Server, PostgreSQL, MongoDB

**Web Technologies:** HTML5, CSS3, JavaScript, RESTful APIs, GraphQL, TypeScript, Ajax, XML, JSON, Angular, React

**DevOps & Cloud Platforms:** Docker, Kubernetes, Jenkins, Git, Bamboo, Ansible, AWS, Azure, Google Cloud Platform (GCP)

**Version Control & Other Tools:** SVN, Gitlab, Bitbucket, Maven, Gradle, Ant

**Testing and Logging Tools:** Junit, Mockito, Selenium, TestNG, PowerMock, JMeter, Jest, Enzyme, Cucumber, Log4J

**Soft Skills:** Effective verbal and written communication, Problem-solving, and Troubleshooting skills

**Operating Systems:** Windows, Linux, Unix

### Experience

---

**Flow Global Software Technologies, USA | Full Stack Java Developer**

**Aug 2024 - Current**

- Designed and developed a Healthcare Insurance Claim Management Portal and Hospital Management System (HMS) using Java, Spring Boot, Microservices Architecture, AngularJS, and MySQL, ensuring seamless claim submission, patient management, and hospital operations.
- Built and secured RESTful APIs using Spring Boot, JWT, OAuth2, and Spring Security, implementing Role-Based Access Control (RBAC) to ensure HIPAA compliance and protect patient data.
- Optimized database performance by designing and normalizing schemas, implementing indexing, partitioning, and stored procedures in MySQL, ensuring efficient query execution.
- Integrated third-party FHIR APIs to enable electronic health record (EHR) interoperability, allowing seamless data exchange with insurance providers, billing systems, and pharmacy networks.
- Developed real-time doctor scheduling and appointment booking modules using Angular, improving user experience with an interactive and responsive interface.
- Implemented asynchronous event-driven processing using Kafka and RabbitMQ, enabling real-time notifications, claim status updates, and patient monitoring.
- Deployed the system on cloud platforms (AWS) using Docker, Kubernetes, and Terraform, ensuring high availability, scalability, and infrastructure automation through Infrastructure as Code (IaC).
- Automated deployment pipelines using CI/CD tools like Jenkins and GitHub Actions, improving code quality, reducing manual intervention, and ensuring smooth production releases.

- Enhanced security measures by implementing XSS, CSRF protection, AES/RSA encryption, and following OWASP best practices, mitigating potential vulnerabilities.
- Implemented real-time monitoring and logging using ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, and Grafana, improving application observability and troubleshooting efficiency.
- Worked in an Agile environment, actively participating in daily stand-ups, sprint planning, code reviews, and cross-functional collaboration, ensuring timely project delivery and alignment with business goals.

### **Cognizant Technology Solutions, India | Full Stack Java Developer**

**Feb 2020 - July 2022**

- Developed a web-based Insurance Management System using Java, Spring Boot, and React.js to manage insurance policies, claims, and premium payments.
- Developed and deployed a web-based Insurance Management System using Java, Spring Boot, React.js, and PostgreSQL, enabling seamless management of insurance policies, claims, and premium payments.
- Designed and implemented RESTful APIs with JWT authentication and OAuth 2.0, ensuring secure user authentication, policy purchase, and claims processing while integrating third-party insurance providers via APIs for real-time data exchange.
- Implemented a microservices architecture to improve modularity, scalability, and maintainability, facilitating automated underwriting decisions and claims processing with Spring Batch workflows.
- Optimized database performance in PostgreSQL by designing efficient schemas, indexing strategies, and stored procedures, enabling high-speed policyholder data retrieval and transaction handling.
- Developed policy renewal automation using Spring Scheduler, ensuring timely notifications and auto-renewals, reducing manual effort and improving customer retention rates.
- Built and deployed the application on Azure using Docker, Kubernetes, and Terraform, enabling auto-scaling, high availability, and infrastructure as code (IaC) for efficient cloud operations.
- Developed an intuitive UI with React.js and Redux, ensuring a seamless and responsive policy management experience for users, agents, and administrators.
- Enhanced security measures by implementing RBAC (Role-Based Access Control), XSS/CSRF protection, and AES encryption, ensuring compliance with PCI DSS and industry security standards.
- Integrated payment gateways to facilitate secure premium payments and refunds, improving financial transactions and user trust.
- Automated deployments using CI/CD pipelines (Jenkins, GitHub Actions) and conducted rigorous unit testing with JUnit and Mockito, ensuring code reliability and system stability.
- Collaborated with cross-functional teams, including insurance analysts, UX designers, and DevOps engineers, to deliver a scalable, high-performing, and user-friendly insurance management platform.

### **Hitachi Consulting, India | Software Developer**

**Dec 2018 - June 2019**

- Developed an automated API testing framework using Java, Rest Assured, and TestNG, ensuring efficient validation of RESTful web services.
- Integrated the testing framework with CI/CD pipelines using Jenkins and GitHub Actions, enabling automated test execution on every code commit.
- Implemented data-driven testing by parameterizing API test cases with JSON, Excel, and database-driven inputs, improving test coverage and maintainability.
- Developed Selenium-based UI automation scripts for end-to-end testing of web applications, ensuring seamless integration between API and front-end components.
- Utilized logging and reporting tools such as Log4j, Extent Reports, and Allure, providing detailed test execution insights and error tracking.
- Collaborated with DevOps teams to optimize test execution in Dockerized environments using Kubernetes and AWS Lambda, enhancing scalability and efficiency.

## **Certification**

**Relational Database Design.**

**Python Object-Oriented Programming.**

## **Education**

**Master's in Computer Science | University of Maryland, Baltimore County, MD**

**Bachelor's in Information Technology | SRM University, India**
