Professional Summary

Business Intelligence Analyst with over 3 years of experience designing and implementing scalable data solutions and self-serve BI tools. Demonstrated expertise in ETL management, SQL optimization, and data visualization to drive actionable insights in healthcare and logistics environments. Proven ability to transform complex business data into efficient, user-friendly dashboards leveraging AWS, Python, and industry-standard reporting tools.

Skills

- **Programming & Tools:** Python, SQL, SAS, AWS, Java, Scala
- **Data Management:** Star Schema, Snowflake Schema, Data architecture, ETL processes, Data governance, Data modeling, Machine learning
- **Visualization & Reporting:** Power BI, Tableau, Looker
- **Business & Analytics:** SAP SD (Sales and Distribution), SAP LE (Logistics Execution), Business Analytics, P&L statement, Financial KPIs, Customer management, Project Management Certification

Work Experience

FEDEX

Apr 2024 - Present

Business Intelligence Analyst

TN

- Designed and implemented Power BI dashboards for real-time monitoring of delivery KPIs such as on-time delivery, exceptions, and hub processing times, aligning with ETL best practices and data governance standards.
- Directed HR analytics initiatives by leveraging Workday Reporting to analyze compensation trends and facilitate workforce planning.
- Developed technical business requirements for API services hosted on AWS, ensuring robust data pipelines and seamless integration.
- Documented and gathered business and technical requirements, contributing to scalable data solutions and improved data integrity.
- Ensured new feature development met GDPR/CCPA data privacy regulations regarding customer shipment data handling.
- Created financial and operational analytics reports that enhanced strategic KPI tracking and provided actionable insights.
- Implemented data governance practices to support compliance, improve reporting accuracy, and streamline data quality monitoring.
- Served as a subject matter expert in network traffic and infrastructure analysis, supporting cross-functional data solution initiatives.
- Delivered intelligence support to both technical and non-technical teams, enabling data-driven decision-making across the organization.

Sutter Health

Feb 2023 - Mar 2024

Business Intelligence Analyst

Sacramento, California

- Designed innovative Tableau visualizations to highlight key performance indicators, identifying and addressing the top three causes of operational delays.
- Optimized existing healthcare data reporting processes to ensure data accuracy and consistency, reducing reporting cycle times and data errors.
- Collaborated with clients to determine ongoing reporting needs, translating business requirements into actionable, self-serve BI solutions.
- Utilized Python and SQL to fulfill ad-hoc data requests from healthcare professionals, transforming raw data into actionable insights.
- Partnered with stakeholders to translate reporting needs into clear, data-driven visualizations and reports that enhance decision-making.
- Automated quarterly reporting systems and budget forecasting models using SQL and Tableau, significantly reducing manual report generation time while bolstering data integrity.

DXC Technology

May 2020 - Aug 2021

Business Analyst

India, Hyderabad

- Designed and integrated 10+ comprehensive data models and workbooks by importing data from diverse sources such as Excel, Oracle, and MySQL, ensuring data integrity and consistency for analytics.
- Conducted research impacting five distinct product offerings using advanced statistical techniques resulting in findings utilized to address root causes behind recurring client support requests experienced frequently during peak usage times.
- Facilitated rigorous UAT sessions with end-users to ensure functional accuracy in newly implemented data systems; helped identify user experience issues leading to improved system usability across three product offerings.
- Assessed provider-level data quality using DQ Analyser, SQL Server, and MS Excel, identifying and rectifying 5+ data inconsistencies, thereby improving data accuracy and reliability.
- Leveraged SQL queries and Excel macros to extract, cleanse, join, and analyse data, delivering actionable insights that contributed to operational efficiency and improvement projects.
- Collaborated closely with marketing and operations teams to create and analyse listener behaviour reports, offering data-driven recommendations for over 3 initiatives aimed at enhancing user engagement and satisfaction.
- Engaged in all phases of data science projects, from data acquisition and cleaning to model development, validation, and visualization, delivering impactful data-driven solutions to address challenges.

Education

Southern Arkansas University, Magnolia, Arkansas
Master's of Science, Computer and Information Science

Dec 2022

Vidya Jyothi Institute of Technology, Hyderabad, India
Bachelor's, Electronics and Communication Engineering

Dec 2020

Course Work & Freelancing Projects

Online Catering Management System

Mar 2022

- Developed a web-based catering system using HTML, CSS, PHP, and MySQL, hosted on XAMPP Server. The system allows customers to place and track orders, while admins manage food listings. Features include user and admin authentication, order management, and a registration portal for new users.

Chatbot for Healthcare

Feb 2019

- The project was aimed to become a prototype for clinics where the chatbot can get connected to the new patient visitor and understanding the medical condition the patient has and equally gets connected to the doctors who can holistically understand the medical condition and become the instrument of suggestion.
- The Chatbot was designed with IBM Watson which is a communicating tool which makes the chatbot function effectively well through a smart system in the form of a mobile app.

Garbage Collection and Monitoring System using Wireless Technology (Research Project)

Jan 2019

- Developed an IoT-based waste collection system using ultrasonic sensors and wireless communication.
- Published and presented at ICCORSE-2020; research paper available on Google.
