PROFESSIONAL SUMMARY

- Highly skilled **Full Stack Web Developer** with **3+** years of experience specializing in the **MERN Stack**, delivering scalable, high-performance **web applications** for **finance** and **insurance** sectors.
- Proficient in leveraging **React.js**, **Node.js**, **Express.js**, and **MongoDB** to architect full-featured, **end-to-end solutions** with a strong **focus on maintainability** and **modularity**.
- Experienced in designing responsive and accessible **frontends** using **React.js**, **JavaScript (ES6+)**, **TypeScript**, **HTML5**, **CSS3**, **Tailwind CSS**, **Bootstrap**, and **Material-UI** to enhance user experiences across devices.
- Expert in state management with **Redux**, **Redux Toolkit**, **Context API**, **Zustand**, and **React Query**, supporting complex client-side interactions and **real-time data** updates.
- Strong background in **backend API** development, implementing **RESTful APIs**, **GraphQL**, and robust **middleware** in **Express.js**, ensuring efficient and secure **client-server** communication.
- Deep understanding of **database technologies** including **MongoDB**, **Mongoose**, **PostgreSQL**, and **SQL**, with hands-on experience in **NoSQL data modeling**, indexing, and **performance optimization**.
- Adept in **authentication** and **authorization** platforms, implementing **JWT**, **OAuth 2.0**, **bcrypt**, **Helmet.js**, and **RBAC** to ensure **data privacy** and industry-standard **security** compliance.
- Proven ability to execute **DevOps** practices, utilizing **Docker**, **CI/CD pipelines (GitHub Actions, GitLab)**, **AWS (EC2, S3)**, **Vercel**, **Netlify**, and **Nginx** for automated deployment and **cloud scalability**.
- Experienced in **testing** and **debugging** with **Jest**, **Mocha**, **Chai**, **React Testing Library**, **Supertest**, and **Chrome DevTools** to maintain **code quality**, **reliability**, and **continuous** delivery.
- Effective collaborator in **Agile/Scrum** environments, excelling in **Jira-led sprint management**, **peer code reviews**, **technical documentation**, and proactive **communication** via **Slack** and **Confluence**.
- Excellent **communicator** and **adaptable team player** with **strong problem-solving skills** and a passion for **innovative learning** and **continuous improvement** in fast-paced environments.

TECHNICAL SKILLS

Frontend Development	React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Web Design, Tailwind CSS, Bootstrap, Material-UI
Backend Development	Node.js, Express.js, RESTful APIs, MVC Architecture, Middleware, API Versioning
State Management	Redux, Redux Toolkit, Context API, Zustand, React Query
Database Management	MongoDB, Mongoose, NoSQL Data Modeling, Aggregation Framework, Indexing, Data Validation
API Integration	REST APIs, GraphQL (basic), Axios, Postman, Swagger / OpenAPI
Authentication & Security	JWT, OAuth 2.0, bcrypt, Helmet.js, CORS, Role-Based Access Control (RBAC)
DevOps & Deployment	Git, GitHub, GitLab, Docker, GitHub Actions, CI/CD Pipelines, Nginx, PM2
Cloud & Hosting Platforms	AWS (EC2, S3, IAM, Route53), Vercel, Netlify, Heroku, Firebase Hosting
Testing & Debugging	Jest, React Testing Library, Mocha, Chai, Supertest, Chrome DevTools, VSCode Debugger
Performance Optimization	Lazy Loading, Code Splitting, Memoization, Redis Caching, Query Optimization
Monitoring & Logging	Winston, Morgan, Sentry, Loggly, New Relic (basic)
Version Control & Code Quality	Git, GitFlow, ESLint, Prettier, Husky, Lint-Staged
Agile & Collaboration	Agile/Scrum Methodology, Jira, Confluence, Slack, Standups, Sprint Planning, Peer Code Reviews

PROFESSIONAL WORK EXPERIENCE

BMO Harris Bank | Full Stack Developer | Chicago, IL

Jan 2024 – Present

Responsibilities:

- Crafted responsive **banking interfaces** using **React.js**, **Angular**, and **TypeScript**, ensuring a seamless user experience across multiple platforms and devices.
- Managed **state** using **Redux Toolkit** and **Context API** to support complex, real-time **financial data** flows within customer dashboards.
- Architected maintainable **microservices** with **Node.js** and **Express.js**, adhering to **MVC patterns** for clean, scalable codebases.
- Administered **PostgreSQL** databases, implementing advanced **indexing** and **query optimization** for high-speed, secure transaction processing.
- Developed and documented secure **RESTful APIs** and implemented basic **GraphQL integrations** for flexible data retrieval and interoperability.
- Enforced **enterprise-grade security** protocols, including **OAuth 2.0**, **JWT**, **RBAC**, and **HTTPS**, maintaining compliance with **financial** industry regulations.
- Automated **continuous integration** and deployment **pipelines** with **Docker**, **GitHub Actions**, and **Vercel** to deliver frequent and dependable software releases.
- Led the integration of **AWS services (EC2, S3)** for scalable **cloud storage** and **robust infrastructure management**.
- Employed **Jest** and **Selenium** for **unit**, **integration**, and **regression testing**, resulting in a **40%** increase in **codebase** stability and production **reliability**.
- Utilized **Jira** and **Confluence** to coordinate **agile sprint planning**, foster **cross-departmental** collaboration, and keep technical **documentation current**.
- Enhanced **application performance** by implementing **lazy loading**, **code splitting**, and **memoization** for faster load times and efficient resource use.
- Configured **centralized monitoring** and logging with **Winston** and **Sentry**, ensuring rapid **debugging** and improved error tracking across distributed **banking services**.

Environment: React.js, Angular, TypeScript, Redux Toolkit, Node.js, Express.js, PostgreSQL, REST APIs, GraphQL, OAuth 2.0, JWT, AWS, Docker, Vercel, GitHub Actions, Jest, Selenium, Winston, Sentry, Jira, Confluence, CI/CD, Performance Optimization, Agile

Aditya Birla Sun Life Insurance | Software Engineer | India

Jan 2021 – Jul 2022

Responsibilities:

- Engineered scalable **customer** onboarding workflows utilizing **React.js**, **Angular**, and **Tailwind CSS**, streamlining new user registration processes and resulting in a measurable increase in **customer retention** and engagement.
- Implemented **Context API** and **Zustand** to manage **policyholder** state and enable real-time updates in customer-facing applications.
- Designed and optimized **MongoDB** and **PostgreSQL** databases, utilizing **NoSQL modeling** and **aggregation** pipelines for scalable **claims management**.
- Built secure **RESTful APIs** and integrated **third-party services** using **Axios** and **Swagger/OpenAPI**, enabling efficient bi-directional **data exchanges**.
- Oversaw **authentication** and **security** using **bcrypt**, **JWT**, **OAuth 2.0**, and **Helmet.js**, safeguarding **sensitive insurance** records per **HIPAA** and **NAIC** standards.
- Deployed **insurance** applications to **AWS** and **Heroku**, using **Docker** containers and **Nginx** for scalable, **cloud-native** hosting solutions.
- Produced comprehensive test coverage with **Mocha**, **Chai**, **React Testing Library**, and **Supertest**, minimizing production issues and elevating **code reliability**.
- Coordinated **peer code reviews** and enforced **code quality** using **ESLint**, **Prettier**, **GitFlow**, and pull request automation.
- Implemented **performance improvements** with **Redis caching**, **API throttling**, and efficient query design to optimize real-time insurance processing.
- Utilized **Slack** and **Microsoft Teams** for daily agile standups and **sprint** retrospectives, facilitating transparent team communication.
- Automated workflow **tasks** and **report generation** with **Node.js scripting**, expediting internal processes for policy renewal and claims **documentation**.
- Authored **technical documentation** and **internal training materials**, supporting **audit readiness** and seamless onboarding of new team members.

Environment: React.js, Angular, Tailwind CSS, Context API, Zustand, MongoDB, PostgreSQL, REST APIs, Axios, Swagger/OpenAPI, JWT, OAuth 2.0, bcrypt, Helmet.js, AWS, Heroku, Docker, Nginx, Mocha, Chai, React Testing Library, ESLint, Prettier, GitFlow, Redis, Slack, Microsoft Teams, Node.js Scripting, Workflow Automation, Agile/Scrum, Documentation

EDUCATION

- **Master of Science in Computer Science** from University of South Dakota, Vermillion, South Dakota.
- **Bachelor of Technology in Computer Science and Engineering** from Presidency University, Bangalore, India.
