

.NET DEVELOPER

Redmond -Washington, 98052 Mobile-(425)365-6646 vasanthiharikrish@gmail.com

.NET Developer with 4+ years of experience in .Net Full Stack, web application development, and project maintenance using ASP.NET, C#.NET, and MS SQL. Expertise in requirements analysis, design, development, testing, maintenance, enhancement, and production support of business applications.

TECHNICAL SKILLS

.NET Languages: ASP.NET, C#, VB.NET, ADO.NET.

Front-end Languages: React JS, Angular.

Web Technologies HTML 5, CSS, JavaScript, AJAX, jQuery, PHP, TypeScript

Code Versioning Tools: Git

ORM: Entity Framework

Cloud Technologies: Azure.

Databases: MYSQL

Professional Experience

IPSERLAB, silicon valley, CA

React and Java Developer, October 2023–Present

- Develop and maintain e-commerce web applications using React for the frontend and Java for the backend, along with services. Incorporate sprint planning for efficient project management.
- Oversee the end-to-end software development life cycle, debug applications, and configure existing systems.
- Successfully transformed Figma-designed pages into dynamic and pixel-perfect web pages using React. Applied React Hooks, mapping techniques, and React Router, showcasing proficiency in translating design concepts into functional components.
- Write high-quality code to program applications on schedule and rigorously test it through established routines and procedures.
- Ensure smooth operation with optimal efficiency, promptly addressing and resolving technical glitches.
- Interact with client to gather requirement, analyze requirement and develop functionality accordingly.

Microsoft Inc (through Quadrant Technologies), Redmond, WA.

Azure support Engineer Intern, March-2023 to May-2023.

- Worked as an Azure Support Engineer, providing rapid response and resolution of Severity 2 issues using PowerShell and XTLS tools.
- Wrote queries using Kusto query language to retrieve relevant data from the database, facilitating the resolution of Sev2 tickets.
- Created user guides for identified problems and handled issues. Prepared reports summarizing the handles tickets.
- During this internship, actively participated in troubleshooting and resolving Azure-related issues, honing skills in PowerShell scripting and utilizing advanced tools like XTLS for efficient issue resolution.

Abyantra Technologies Pvt. Ltd. Chennai

.NET Developer, September 2014–June 2017

- Developed customized web applications using ASP.NET, C#.NET, HTML, Services, LINQ, and MS SQL
- Developed a web application with Angular for the frontend and .NET for the backend, employed the code-first approach in Entity Framework for efficient database design.
- Optimized database performance by crafting efficient queries and developing stored procedures, triggers, tables, views, and functions.
- Responsible for building front-end UI designs using HTML 4.0/5.0, CSS3, TypeScript, Angular and Angular Material
- Experienced with the .NET 4.0/.NET 4.5 Framework and skilled in testing APIs using Postman. Proficient in troubleshooting, quality analysis.
- Responsible for creating the navigation menu and sub menu in the site using CSS, HTML and JavaScript.
- Used Ajax for every page for dynamically displaying the data without a page refresh.
- Contributed to .NET coding, employing Collection classes, MVC design patterns and implementing robust Exception Handling to meet business logic requirements.
- Responsible for fixing bugs and adding new features to existing websites using Entity Framework for database interaction.
- Utilized Entity Framework for seamless integration of database operations, improving application scalability and maintainability.
- Utilized authentication and role-based authorization filters and session data storage techniques.
- Created a custom application to capture call and message notifications in Microsoft Teams. - Employed OCR libraries to extract text and dynamically resize images.
- Created manual test cases for various projects, checking for corner cases and validation.
- Designed and developed C# components for implementing business logic in 3-tier application interacting with SQL Server database using managed provider and ADO.NET.

Project Experience.

Web Development Activity (Application for Competency Assessment):

- Developed a robust Competency Assessment application utilizing a sophisticated 3-Tier Architecture.
- Implemented comprehensive User Management, Content Management, and Assessment management systems, ensuring a seamless user experience.
- Adopted a code-first approach and incorporated data annotations for validation, ensuring data integrity and reliability.
- Established an error log within the database to capture and analyze exceptions, facilitating efficient debugging and issue resolution.
- Implemented encryption and decryption protocols for the login process, enhancing overall application security.

Camera Inventory (Angular):

- Developed a dynamic web application with Angular for the frontend and .NET for the backend, emphasizing a seamless integration of technologies.
- Introduced an innovative camera range selection feature using a mat-slider bar, enhancing user experience and ease to use.
- Utilized Angular services to facilitate API calls, effectively storing and retrieving data in the database through RESTful API calls.

Luxafor Microsoft Teams Status Lights (Microsoft Teams Application):

- Developed a customized application dedicated to capturing call and message notifications with Microsoft Teams, enhancing team communication and collaboration.
- Leveraged Optical Character Recognition (OCR) libraries to extract text and dynamically resize images, optimizing the application's ability to interpret and display relevant information.
- Implemented a sophisticated timer mechanism to periodically monitor the screen for incoming message or call notifications, ensuring real-time updates and responsiveness.

E-commerce project, serving as the React front-end, Java back-end, and PostgreSQL database:

- Demonstrated proficiency in translating Figma-designed interfaces into dynamic and pixel-perfect web pages using React, ensuring a visually appealing and user-friendly online shopping experience.
- Engineered and implemented a robust dynamic product filtering system based on product categories, significantly enhancing user experience and streamlining product navigation.
- Applied responsive design techniques, incorporating media queries to guarantee optimal display and functionality across a diverse range of screen sizes and devices.
- Collaborated effectively with cross-functional teams to align development efforts with project goals, contributing to the overall success of the e-commerce initiative.

Education

- Master of Computer Application from Sri Sai Ram Engineering college, Chennai, India June 2014.
- Bachelor of Science, Computer Science from Prince Venkateshwara arts and science, Chennai, India Apr 2011

Training and Certifications

- Undergone training on Net Framework 4.5 - C#.Net, ASP.Net, ADO.Net, Oracle 12C.
- Undergone training on Angular and React.
