SUMMARY

iOS Developer with over a year of experience building scalable, user-friendly mobile apps using Swift, SwiftUI, and UIKit. **Published research** in IoT & machine learning, wireless power, and drone technology. Skilled in iOS fundamentals like memory management, threading, and performance tuning, with expertise in integrating RESTful APIs.

EXPERIENCE

Software Developer Intern | Next Play Games, Remote, USA

Jul 2024 – Oct 2024

- Developed and optimized dynamic web applications using React and TypeScript, improving performance by 50%.
- Contributed to the iOS application by implementing UI enhancements using **Swift** and **UIKit**.
- Designed **RESTful APIs** and integrated them with third-party systems, streamlining data communication.
- Wrote effective **unit tests** and supported CI/CD pipelines, ensuring high-quality, stable builds.

Software Engineer Intern | The Super Coach, Remote, USA

Jan 2024 – Apr 2024

- Built responsive web interfaces using React and **SwiftUI** interfaces for the iOS app enhancing user engagement by 25%.
- Designed and maintained RESTful APIs and backend services using Node.js and Express.js.
- Conducted **unit testing** and **UI testing** using **XCTest**, increasing app stability and reliability by 35%.

Business Intelligence and Data Analytics Intern | The Sparks Foundation, Remote, Singapore

Oct 2021 – Nov 2021

- Reduced data processing time by 20%, transformed 1M+ complex unstructured data employing Python, enhancing overall efficiency and data quality.
- Integrated data visualization with Power BI, supporting data-driven insights and improving geographical trend analysis for strategic decisions for stakeholders.

Web Development Intern | Eyuva Technologies, India

May 2021 – Jul 2021

- Enhanced user interface on a memorial website, resulting in a 20% increase in site engagement.
- Shadowed senior engineers to learn secure coding practices and integrate them into development workflows.
- Collaborated with cross-functional team members to identify usability bugs, reducing customer-reported issues by 20%.

SKILLS

Programming	: Swift, Objective-C, JavaScript (ES6+), TypeScript, Java, Python, SQL
Mobile Development	: SwiftUI, UIKit, Core Data, Core Animation, MapKit, Combine
Databases	: MySQL, MongoDB, PostgreSQL, SQLite, SQL Server, Cosmos DB, Firebase
Testing & Debugging	: XCTest, Instruments, Unit Testing, UI Testing, TDD
Development Tools	: Xcode, SQLite, Firebase, REST APIs, Crashlytics, Git
Design Patterns	: MVC, MVVM
Certifications	: Oracle Cloud Infrastructure 2024 Generative AI Certified Professional

EDUCATION

Northeastern University, Boston, MA	Master of Science in Information Systems	Sep 2022 – May 2024
University of Mumbai, India	Bachelor of Engineering in Electronics and Telecommunications	Aug 2018 – May 2022

ACADEMIC PROJECTS

Campus Navigation (Swift, SwiftUI, MapKit, Firebase) | [GitHub](#)

Nov 2023 – Jan 2024

- Developed an iOS app for campus navigation using **SwiftUI**, **MapKit**, and **Firebase** for real-time updates.
- Implemented offline capabilities with **Core Data**, ensuring smooth user experience without active internet.
- Applied **MVC** architecture and performed memory management optimization for better app performance.

Campus Connect (Swift, SQLite, REST API) | [GitHub](#)

Sep 2023 – Nov 2023

- Developed an iOS app for campus navigation with offline capabilities using **SQLite** and real-time updates via **REST APIs**.
- Designed a responsive, user-friendly interface with **Swift** and integrated dynamic search functionality, improving navigation efficiency by 40%.
- Conducted rigorous **unit testing** and **UI testing** with **XCTest**, ensuring app stability and a crash-free experience.

Meal Mate (Swift) | [GitHub](#)

Jul 2023 – Aug 2023

- Built a recipe app using SwiftUI with advanced filtering logic and TheMealDB **API integration** for real-time recipe discovery.
- Designed the app with **MVVM** architecture for scalability and implemented push notifications to enhance user engagement.
