

Vaibhav Chauthe Software Engineer

vaibhavc@mywebemails.com | 2016865230 | Jersey City, NJ, USA

Summary

Experienced Software Engineer with 3+ years in Java development, including Java, Spring Boot, and MVC frameworks. Proficient in integrating Angular and React for seamless user experiences. Skilled in designing and optimizing high-performance applications, collaborating with cross-functional teams, and delivering robust solutions on schedule. Strong problem-solving abilities and a commitment to writing clean, maintainable code.

Technical Skills

- **Languages:** Java, JavaScript, Python, C/C++, SQL, HTML, CSS
- **Frameworks & Tools:** Spring Boot, Hibernate, J2EE, Spring MVC, Node.js, Express.js, React.js, Redux, Angular, RESTful APIs, XML, Jest, React Testing Library, Spring Data, IntelliJ IDEA, Eclipse
- **Databases:** MS-SQL, MySQL, Redshift, Snowflake, Big Query, PostgreSQL, MongoDB
- **Tools and Technology:** Selenium, Amazon Web Services (AWS), Microsoft Azure, Docker, Kubernetes, Terraform, Git, Maven, Kafka, Jenkins, GitHub, Agile, Scrum, JIRA, SDLC, Gradle, JUnit, Postman, Data Structures and Algorithms

Professional Experience

Software Engineer, Expedia

01/2024 – Present | Remote, USA

- Guided the development of a scalable microservices architecture for a banking platform using Spring Boot, Spring MVC, and React, enabling independent service deployment and enhancing scalability while reducing downtime.
- Developed RESTful APIs for key banking operations with Spring Boot, optimizing response times to support over 5,000 concurrent users, and utilized JavaScript for dynamic front-end interactions.
- Implemented database interactions with Spring Data JPA and Hibernate on PostgreSQL, improving query performance and data retrieval times, while integrating with AWS RDS for managed services.
- Facilitated real-time communication between microservices using Apache Kafka, implementing an event-driven architecture to reduce inter-service latency, and deployed services in Docker for environment consistency.
- Managed microservices deployment on Kubernetes for fault tolerance and high availability, automating CI/CD pipelines with Jenkins and Docker to reduce deployment time and errors.
- Optimized performance by tuning database queries, caching strategies, and JVM parameters, increasing system throughput to handle more transactions monthly with minimal latency, leveraging AWS for scalability.
- Conducted code reviews and enforced best practices in code quality, security, and documentation, reducing defects through continuous integration and testing with Jenkins, Git, and JavaScript testing frameworks.

Software Engineer, Capgemini

06/2020 – 07/2022 | Pune, India

- Build the architecture and maintenance of a RESTful API using Spring Boot for a multi-tier web application, enhanced system performance through optimized request handling and microservices integration.
- Developed and implemented Spring Boot-based controllers and services to manage business logic, successfully deploying microservices that increased scalability and reduced system downtime.
- Crafted unit tests using JUnit, achieving code coverage, and improved code reliability and reduced bugs, contributing to a more stable application environment.
- Engineered the UI layer with Angular, CSS, HTML5, and Typescript, creating a responsive and user-friendly interface, and increased user engagement through front-end performance optimizations.
- Integrated MySQL and Oracle11g with Spring Boot, optimizing database queries and reducing data retrieval time, ensuring efficient data management and improved application speed.
- Configured Swagger API and Postman for API testing and documentation, streamlining the development process and reducing debugging time through clear and comprehensive documentation.
- Managed source control with Git, utilized Maven for building, implemented Log4j for logging, and set up Jenkins for continuous integration, and enhanced deployment efficiency with automated pipelines.

Education

Master of Science, Stevens Institute of Technology
Computer Software Engineering

08/2022 – 05/2024 | New Jersey, USA
