WORK EXPERIENCE

Bank of New York Mellon

Full Stack Associate Software Developer

Mar. 2023 - Present

New York

Developing and maintaining enterprise applications for client onboarding and account maintenance

- Developed and maintained enterprise applications for **Client Onboarding** and **Account Maintenance** using **Java/J2EE, Spring Boot, and React**.
- Built dynamic and responsive UI components using **React, Redux, React Query, and Material-UI**, improving state management and frontend efficiency.
- Designed and implemented **RESTful APIs** and **microservices** using **Spring Boot** and **Hibernate**, ensuring high-performance backend processing.
- Led the integration of **Micro Frontend (MFE) architecture**, improving scalability and independent deployment of frontend modules.
- Optimized database queries and indexing strategies in **Oracle, PostgreSQL, and MongoDB**, reducing query execution time by 30%.
- Strengthened **CI/CD pipelines** using **Jenkins, Kubernetes, and Maven**, reducing deployment times and improving release efficiency.
- Enhanced application performance through **code refactoring**, reducing load times and improving user experience.
- Implemented **unit and integration testing frameworks** using **JUnit**, increasing code coverage and reliability.
- Worked closely with **cross-functional teams** to align software solutions with business objectives, ensuring seamless system integrations.
- Researched and adopted emerging technologies, including **AWS services** like **S3, Lambda, and DynamoDB**, to improve system scalability, security, and maintainability.

The Hanover Insurance Company

Full Stack Developer

Jul. 2022 – Mar. 2023

Remote

- Created tools to automate deployment processes using Jenkins Pipelines and Kubernetes, reducing deployment time from 20 hours to 40 minutes
- Optimized application's data processing speed by over 40% by using advanced cache management techniques in Redis
- Implemented automated testing using Selenium, which contributed to a 50% decrease in post-production bugs
- Validated 100% of user input before submitting to the back-end
- Harnessed Kafka for stream processing, resulting in 50% faster real time data-processing

Reverb Productions

Co-founder and Software Developer

Jul. 2021 - Jul. 2022

Pune, MH and Remote

- Co- founded a Music and Video production house based in Pune, scaling it up to 1200 clients
- Solo developed 'Suur' - a AI transcription application for instant conversion of input audio to sheet music/tabs
- Utilized JS, HTML and CSS to create 20+ responsive landing pages for the company's website

EDUCATION

- First class with Distinction 8.84/10 GPA
- Member of winning ACM (Association for Computing Machinery) student chapter 2019-2021

SKILLS & INTERESTS

- **Skills**
 - Core Java, J2EE, Servlets, JSP, JDBC
 - SQL Server, Oracle, MySQL
 - MVC Architecture, Spring framework, Hibernate, Web Services (Restful, SOAP)
 - XML, HTML, CSS, JS, AngularJS, ReactJS, Bootstrap, AJAX, jQuery, JSON
 - Jenkins, Kubernetes
 - Selenium, Jasmine, Karma
 - GIT, SVN, Agile Methodology, Eclipse, IntelliJ, Visual Studio Code
- **Interests**
 - Formula1 Racing, Playing the guitar and keyboard
 - Learning new languages, visiting a new country every year
 - Sky diving, flying
