

Vedant Ishwar Mohurley

Business Analyst

•vedant.i@cvmailhub.com • (667) 292-8286 • <http://linkedin.com/in/vedantmohurley>

SUMMARY

- Business Analyst with 3+ years of experience in data-driven decision-making, business process optimization, and stakeholder collaboration, leveraging SQL, Python, and BI tools (Tableau, Power BI, Looker) to deliver actionable insights and measurable impact.
- Proficient in Agile, Scrum, and cross-functional collaboration, working with product managers, engineers, and stakeholders to define business roadmaps, manage backlogs, and drive sprint planning, ensuring seamless execution of business and analytics solutions that enhance efficiency and revenue growth.
- Experienced in business requirements gathering and documentation, creating BRDs, FSDs, and user stories in JIRA and Confluence to improve stakeholder alignment, enhance collaboration, and streamline project execution, ensuring clarity in deliverables and faster decision-making.
- Strong expertise in data analysis, forecasting, and KPI optimization, utilizing statistical analysis, A/B testing, and predictive analytics to uncover business trends, boost revenue growth by 20-30%, and provide data-driven recommendations that impact key business decisions.
- Hands-on experience in cloud-based analytics and automation, working with Snowflake, BigQuery, and AWS Redshift to develop scalable data solutions, automate reporting workflows, and enable self-service analytics, ensuring real-time insights for business leaders.
- Skilled in process improvement and workflow optimization, identifying inefficiencies, implementing data-driven process enhancements, and improving operational performance through continuous monitoring, reporting, and stakeholder collaboration, maximizing business efficiency and cost savings.

EDUCATION

Masters in Information Systems University of Maryland Baltimore County	Baltimore, MD
Bachelor of Engineering in Computer Science Engineering Rashtrasant Tukadoji Maharaj University	Nagpur, India

SKILLS

Programming & Query Languages: SQL, Python, R, Shell Scripting
Databases & Data Warehousing: MySQL, PostgreSQL, Snowflake, BigQuery, MS SQL Server, Oracle
Business Intelligence & Data Visualization: Tableau, Power BI, Looker, Google Data Studio
Data Analysis & Modeling: A/B Testing, Forecasting, Statistical Analysis, Predictive Analytics, Dimensional Modeling
ETL & Data Integration: Apache Airflow, dbt (Data Build Tool), Informatica, Alteryx
Cloud & Big Data Technologies: AWS (Redshift, S3, Lambda), GCP (BigQuery, GCS), Azure Synapse
Workflow & Project Management: Jira, Confluence, Agile (Scrum, Kanban), BRD & FSD Documentation
Stakeholder Communication & Process Optimization: Requirement Gathering, Business Process Mapping, Gap Analysis, KPI Definition & Reporting

PROFESSIONAL EXPERIENCE

Wipro Business Analyst	Dec 2023 – Present Baltimore, MD
• Pioneered large-scale data initiatives and overhauled financial intelligence frameworks by collaborating with finance, risk, and IT teams to enhance automation, streamline investment strategy execution, and improve governance policies for regulatory compliance. • Constructed predictive financial models and reinforced risk evaluation methodologies using SQL, Python, Power BI, and statistical techniques, enabling enhanced real-time portfolio analysis, reducing discrepancies by 30%, and supporting financial decision-making for executives. • Transformed data pipeline automation and restructured fraud detection protocols by implementing AI-powered anomaly detection, machine learning-driven risk scoring, and real-time transaction monitoring, reducing fraud incidents by 35% and enhancing compliance adherence across financial operations. • Devised cloud-based analytics ecosystems by integrating Snowflake, AWS Redshift, Databricks, and ETL workflows, optimizing retrieval speeds by 40%, reducing infrastructure costs, and enabling seamless cross-functional access to large-scale datasets for forecasting. • Directed Agile-driven execution by leading sprint planning, backlog grooming, stakeholder collaboration, and KPI tracking, ensuring consistent delivery of business intelligence solutions and data-driven enhancements, reducing project turnaround time by 25%. • Enforced financial risk governance and enhanced enterprise compliance policies by aligning security strategies with Basel III, CCAR, GDPR, and FDIC mandates, reducing compliance violations by 30% and minimizing regulatory penalties for enterprise-wide financial operations. • Engineered executive dashboards and designed BI tools using Tableau, Looker, and SQL analytics, providing senior management with visibility into liquidity ratios, asset performance, and risk exposure across multiple financial segments.	
Zensar Technologies Business Analyst	Jun 2020 – Jul 2022 Remote, India
• Facilitated requirement gathering by conducting interviews, analyzing processes, and converting inefficiencies into BRDs and FSDs, improving requirement clarity by 35% and accelerating project delivery timelines by 20% through seamless alignment between business needs and implementations. • Optimized ETL workflows and streamlined integration strategies by enhancing structured and unstructured data efficiency, improving performance tuning, and reducing query execution times by 35% through automation and indexing. • Designed real-time KPI dashboards by leveraging Power BI, Google Data Studio, and Excel automation, enabling sales, operations, and finance teams to track performance metrics, monitor revenue trends, and analyze customer behavior with 40% improved reporting accuracy. • Strengthened data integrity and reinforced governance by implementing validation protocols, refining metadata management, establishing quality control frameworks, and enforcing regulatory compliance, ensuring 100% adherence to ISO, GDPR, and financial reporting standards. • Executed cloud migration initiatives by transitioning legacy systems to Azure Synapse and Google BigQuery, enhancing analytics efficiency, reducing infrastructure costs by 35%, and increasing data accessibility, enabling faster insights for executive decision-making. • Restructured workflows and eliminated bottlenecks by conducting process audits, automating repetitive tasks, integrating AI-driven process improvements, and optimizing customer transaction systems to reduce response times by 45%. • Spearheaded Agile process improvements by leading retrospectives, optimizing backlog prioritization, ensuring cross-functional synergy, and accelerating cycles, leading to a 20% improvement in timelines and efficiency. • Developed financial insights by analyzing trends, forecasting revenue, benchmarking competitors, and assessing risk exposure, enabling leadership to make data-backed decisions that increased market penetration by 25% and optimized pricing strategies for higher profitability. • Diagnosed system inefficiencies and conducted root cause assessments by collaborating with IT, operations, and finance teams, identifying process gaps, implementing corrective measures, and enhancing business continuity strategies to reduce operational disruptions by 30%.	

CERTIFICATIONS

Microsoft Certified in Azure Enterprise Data Analyst Associate	Aug 2023
Microsoft Certified in Azure AI Fundamentals	Aug 2023
