SUMMARY

- Financial Analyst and FP&A professional with 5+ **years of experience** driving financial planning, forecasting, and data-driven decision-making across **banking and healthcare sectors**.
- Efficient in **P&L management, variance analysis, scenario modeling, and budget planning**, with hands-on expertise in **SQL, Python, SAS, Power BI, Excel, and Hyperion**.
- Known for delivering actionable insights that optimize costs, improve forecast accuracy, and support executive-level decisions, including **\$200M reserve adjustments in banking** and **\$50M+ cost savings**.
- Involved building dashboards, automating reporting workflows, and translating complex financial data into clear insights for stakeholders.

WORK EXPERIENCE

JPMorgan Chase - Financial Analyst

Aug 2024 - Current

- Prepared monthly **P&L and balance sheet variance analyses** in **Excel**, identifying \$25M in expense overruns and presenting corrective actions to senior finance leaders.
- Built **three-year rolling forecasts** with advanced Excel (pivot tables, lookups, macros), integrating loan growth, interest spreads, and credit loss data; improved forecast accuracy by 18%.
- Automated **regulatory reporting workflows** in SQL and Python, cutting manual effort by 40% and ensuring compliance with **Fed and SEC filings**.
- Partnered with risk teams to model **loan loss provisions** in SAS, stress testing portfolios under different macroeconomic scenarios; results influenced \$200M reserve adjustments.
- Designed **Power BI dashboards** for real-time monitoring of net interest income, fee revenue, and operating costs, enabling CFO office to spot trends 3 weeks faster.
- Supported quarterly **Earnings Release and 10-Q/10-K reporting** by reconciling subsidiary-level data in Hyperion, reducing close cycle by 2 business days.

Neon IT Systems - Financial Planner/Analyst

Jul 2018 - Nov 2022

- Modelled **patient readmission costs** in SQL + Excel by analyzing hospital claims, identifying \$9M annual avoidable spend and supporting investment in preventive care programs.
- Forecasted **Medicare Advantage reimbursement revenue** using SAS, factoring in risk-adjustment scores and regional utilization; improved forecast accuracy by 17%.
- Evaluated **drug formulary cost impact** with Python, comparing brand vs. generic uptake across pharmacies; findings drove \$6M savings in pharmacy benefit negotiations.
- Built **utilization dashboards** in Power BI showing ER visits, inpatient stays, and outpatient claims trends; enabled care management to cut high-cost ER claims by 12%.
- Conducted **cost analysis of provider contracts**, flagging underperforming networks and helping renegotiate rates that reduced out-of-network expense by \$15M.
- Automated **claims denial tracking** with SQL queries and Alteryx workflows, giving finance teams early visibility into \$20M of at-risk revenue.
- Partnered with compliance to prepare **CMS cost reports and state Medicaid filings**, ensuring accuracy across 5M+ claims records and avoiding regulatory penalties.

SKILLS

Financial Analysis & Modeling: Financial Forecasting, Variance Analysis, Sensitivity Analysis, Scenario Planning, Discounted Cash Flow (DCF), Monte Carlo Simulation, Budgeting, Cost-Benefit Analysis, Financial Reporting, Trend Analysis, Financial Statement Analysis

FP&A & Business Partnering: Strategic Budgeting, Operating Plan Development, Expense Tracking, Scenario Modeling, Headcount & Workforce Planning, Revenue & Margin Analysis, Performance Metrics, KPI Development, Management Reporting

Programming & Database Tools: SQL, Python, SAS, R, VBA, Advanced Excel, Data Extraction, Data Transformation, Data Loading, Database Management, Statistical Modeling, Data Manipulation

Software & Platforms: Power BI, Tableau, Hyperion, Oracle, SPSS, AWS, Azure, Advanced Excel (Pivot Tables, Lookups, Macros, Solver)

EDUCATION

New Jersey Institute of Technology

Master of Science, Computer Science

Dec - 2024
