An enthusiastic person with high optimism and skills in software development with experience of 1 year 9 months. Eager to learn and implement new technologies and methodologies. Always looking forward to innovating new things which can improve the existing technology.

EDUCATION

Master of Science in Data Science and Engineering Analytics at Bradley University

Jan 2023 – May 2024

GPA: 3.71

Python, Fundamentals of Data Science, Machine Learning, Artificial Intelligence, Knowledge Discovery & Datamining, Data Visualization.

Bachelor of Technology in Mechanical Engineering at MLRITM at Hyderabad, India

Jul 2016 – Jun 2020

Basics of C language, Fluid Mechanics, Design Materials, Machine Tools

PROFESSIONAL EXPERIENCE (Backed Python Developer)

Software Engineer in Hashinclude Computech Pvt Ltd at Bangalore, India

Nov 2021 – Dec 2022

- Extensive use of python programming language to solve business and project requirements.
- Directed the projects (ITP, Social Swag) from Initial plans to finalization.
- Worked on creation of REST API's and solving business and project requirements.
- Obtained an extensive understanding of databases and frameworks like Flask and Fast Api.
- Reviewed and tested code in build environment and committed code to GIT repository within allocated time.

Junior Engineer in RP Webapps Pvt Ltd at Bangalore, India

April 2020 – Oct 2020

- Joined as junior software engineer and started learning new skills and working with a team to get trained and solve the requirements.
- Extensive use of python programming language to solve business and project requirements.
- Worked in creating Fast API's and solving business and project requirements.
- Extensive use of python modules like Pandas, NumPy, Requests etc.

SKILLS

- **Programming Languages:** Python, HTML, JavaScript, CSS.
- **Databases:** Elasticsearch, MySQL, MongoDB, Microsoft Access, Firebase, Redis, Redis-Queue.
- **Frameworks:** Fast API, Flask, Django, Virtual Basic.
- **Tools:** GitHub, Gitlab, AWS-Lambda, AWS-S3 Bucket, Excel, VS Code, Pycharm, Jupyter Notebook.
- **Cloud Technologies:** AWS-Lambda, AWS-S3 Bucket, GIT.
- **Operating Systems:** Linux, Ubuntu, Windows, Mac-os.
- **Servers:** Ubuntu, Linux.

PROJECTS

SOCIALSWAG

- Social Swag is a **Learning Management System (LMS)** Platform which provides **Masterclasses** form certified **Master's with certification**.
- Worked in developing **role-based** access for Masters, fan and admin.
- Integrated **payment gateways** such as **Razor pay, Stripe and Bharatx** and developed end to end purchase flow.
- Integrated **MUX (Video Streaming platform)** to stream Video lesson's with **JWT token** validation's and **Mux Video Views**.
- Extensive use of **AWS Lambda** and **AWS S3 Buckets** service to provide cloud api's to helpstream Masterclasses end to end in **Airtel Xstream Platform**.
- Interacted with client and other departments for new requirements in project development.
- **Technologies Used:** Python, Elasticsearch, Google Firebase Redis, Redis-queue, Fast API, mux-python, AWS Lambada, es-pandas, Ubuntu etc.

IDAM

- Identity management for users in **FIFA WORLD CUP 2022** and providing **special needs using REST Api's , Cosmosinterface ,Elasticinterface** for development of project.
- Worked on **Server less services (Azure Functions)** created and configured HTTP Triggers in the **Azure Functions** with Application Insights for monitoring.
- Developed **role-based user access** for fan, admin and steward.
- Developed **steward enrollment flow** for fans in **FIFA World Cup2022**.
- **Technologies Used** : Python, Elasticsearch, Mongo DB, Flask, Pandas etc.

ITP REPORTS

- ITP Reports provides **financial reports** for every month according to the requirements of customers, using **REST Api's** create customer financial invoices in project management.
- Interacted with client and other departments for new requirements in project development.
- Worked on data extraction from **MySQL database** , converting it to **json** format and inserting into **Elasticsearch database** on daily basis.
- **Technologies Used:** Python, Redis, Redis-Queue, Cronjobs, Flask, MySQL, Elasticsearch, ES-Pands Gitlab, Ubuntu etc.

CISCO INTEGRATIONS

- Cisco Integrations is **cloud service** for integrating with deferent services such as **ConnectWise, Meraki, CyberCns** etc. to create the **configurations** and **send alerts**.
- Worked on **integrating** services for **ConnectWise and Meraki**.
- Created api's to generate everyday configurations and setting a **cronjob** to **trigger** the api at every day night.
- Learned and used new technologies such as FastAPI, Yml and integrations with other services.
- **Technologies Used:** Python, FastAPI, Cronjob, YML.

CAPSTONE PROJECT in E-Dart Diameter Prediction

- Worked on collecting data from **e-Dart machines** upon creation a disc product using injection moldings in excel files.
- Calculated the prediction and **accuracies** in **fuzzy logic** methodologies for the testing and training data.
- Worked on individual data to write python code **supervised calculation** accuracy to calculate the accuracy for **individual project data**.
- Worked as team to calculate the **R-Square** using **Minitab** for **group project**.
- Worked on writing code for **Supervised learning** to calculate the accuracies for the data collected using **fuzzy logic module**.
- Worked on writing code for **Unsupervised learning** to calculate the accuracies using **random forest** and **linear regression machine learning algorithms**.
- **Technologies Used:** Python, VS Code, Jupyter Notebook, Fuzzy logic, Random forest, linear regression, Minitab.

CERTIFICATIONS

- Python Certification at Digital Nest Hyderabad, India.
- Django Certification at Digital Nest Hyderabad, India.
