

Venka Reddy Vaka

Business Data Analyst | venkavaka.analytics@gmail.com | +1 (551) 280-6932 | [LinkedIn](#)

Summary:

Proven Business Data Analyst with 5+ years of experience in healthcare and fintech, specializing in data analysis, reporting, and workflow automation. Skilled in SQL, Python, R, Tableau, Power BI, and Excel, with expertise in ETL (Airflow, Informatica, Alteryx, Talend) and cloud data warehousing (Snowflake, Redshift, BigQuery). Strong background in requirement gathering, Agile/Scrum, and machine learning (Scikit-learn, TensorFlow, PyTorch), delivering efficiency improvements of up to 40% and reporting accuracy gains of 25%.

Skills:

- **Databases & Querying:** SQL, Oracle, MySQL, PostgreSQL, MS Access
- **Programming & Analytics:** Python (Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch), R, SAS, SPSS
- **Visualization & Reporting:** Tableau, Power BI, Excel (Pivot Tables, Power Query, VBA), Google Data Studio
- **Data Management & ETL:** Informatica, Alteryx, Talend, SSIS, Apache Airflow
- **Data Warehousing & Big Data:** Snowflake, AWS Redshift, GCP BigQuery, Hadoop, Spark
- **Statistical & Data Mining:** Hypothesis Testing, Regression, Forecasting, A/B Testing, Clustering, Classification, Association Rules
- **Business Tools & Methodologies:** JIRA, Confluence, MS Office Suite, Agile/Scrum, SDLC, BRD, FRD, UAT
- **Additional Skills:** Requirement Gathering, Stakeholder Communication, Data Cleaning, Data Governance, Reporting Automation

Education:

- Master of Science in Business Analytics | Anderson University | Anderson, SC | May 2025

Professional Experience

UnitedHealth Group (Optum) | Business Data Analyst | Sep 2024 –Current

- Gather and document healthcare business requirements, ensuring 100% accuracy in BRD/FRD creation.
- Designed and maintained Tableau and Power BI dashboards, improving executive decision-making speed by 30%.
- Extracted KPIs from millions of claim records using SQL and Python, increasing claim processing efficiency by 20%.
- Automated reporting pipelines with Python and Apache Airflow, reducing manual effort by 40%.
- Collaborated with data engineering teams to build Snowflake and Redshift data warehouses, improving query performance by 35%.
- Applied data mining techniques (clustering & association analysis) to identify healthcare cost patterns, reducing overpayment incidents by 12%.
- Performed advanced statistical analysis using SAS and SPSS, delivering accurate insights for compliance and audit teams.
- Conducted ML-based predictive modeling with Scikit-learn and TensorFlow, forecasting patient risk scores with 87% accuracy.
- Used JIRA and Confluence to manage Agile sprints, track requirements, and ensure 95% on-time delivery of reports.
- Validated and cleansed healthcare data, reducing reporting discrepancies by 25%.
- Conducted UAT testing and documented business processes, achieving 95% adoption rate for analytics solutions.

PhonePe | Business Data Analyst | Aug 2019 – Jul 2023

- Collected and documented business requirements from product teams, ensuring 100% alignment with stakeholder needs.
- Conducted customer transaction analysis to identify trends, improving retention by 15%.
- Built KPI dashboards in Tableau and Excel, enhancing transaction monitoring and improving fraud detection by 20%.
- Conducted A/B testing using Python, R, and SAS, boosting product adoption by 18%.
- Wrote optimized SQL queries to analyze large-scale fintech datasets with 99% accuracy.
- Automated Excel-based reports with VBA and Power Query, cutting manual effort by 30%.
- Built predictive models using Scikit-learn and PyTorch for fraud detection, reducing false positives by 22%.
- Developed ETL workflows in Airflow to integrate multiple data sources into BigQuery and Snowflake, improving data availability by 25%.
- Applied data mining algorithms to detect unusual transaction behavior, supporting compliance and fraud prevention efforts.
- Partnered with product managers to design and implement data warehouse solutions in AWS Redshift, enhancing reporting efficiency by 28%.
- Created compliance reports for regulatory audits using SPSS and Tableau, improving data governance by 20%.
- Used JIRA to track project tasks, requirements, and sprint backlogs, ensuring smooth Agile delivery.
- Designed real-time Power BI dashboards for new product launches, reducing issue resolution time by 25%.
