

Venkat Abishek Ramakrishnan

Denton, TX · (940) 331-6217 · abi8431836@gmail.com · [LinkedIn](#)

SUMMARY

- Data Analyst with 3+ years of experience in **data mining, cleaning**, and visualization using **Python (Pandas, NumPy)**, SQL, Tableau, and Power BI to drive business insights and decision-making.
- Knowledgeable in **ETL pipelines**, big data processing (Azure Synapse, Databricks, AWS Glue, Apache Spark, Kafka), and workflow automation to optimize efficiency and data accuracy.
- Proficient in data governance, compliance (GDPR), predictive modeling, **A/B testing, and hypothesis testing**, ensuring high-quality, reliable data for strategic initiatives.
- Knowledge in managing databases (**MySQL, PostgreSQL, Oracle**), and **leverage Jira**, Confluence, and Git for seamless project execution.

EDUCATION

UNIVERSITY OF NORTH TEXAS	TX
M.S. in Information Systems & Technologies	Aug 2022 - May 2024
BVRIT	INDIA
B.Tech in Computer Science	Aug 2016 - May 2020

CERTIFICATIONS

- Microsoft Certified SQL Developer
- Certified Power BI Specialist
- Microsoft Certified Excel Expert

SKILLS

- **Programming:** Python (Pandas, NumPy, Scikit-learn), SQL
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn
- **Databases:** MySQL, PostgreSQL, Oracle, Azure SQL, AWS S3, Azure Blob Storage
- **Cloud & Big Data:** Azure Data Factory, Azure Synapse, Databricks, AWS Glue, Apache Spark, Kafka
- **ETL & Data Engineering:** Apache Airflow, Azure Functions, AWS Lambda, GitHub Workflows
- **Data Analytics & BI:** Data Mining, Data Cleaning, Data Modeling (ERwin), Predictive Modeling, A/B Testing, Hypothesis Testing, Statistical Analysis (SPSS)
- **Data Governance & Compliance:** Data Quality, GDPR, Data Governance, Compliance Management
- **Automation & Optimization:** Workflow Automation, Process Optimization, Performance Tuning
- **Project Management:** Jira, Confluence, Git, Agile

WORK EXPERIENCE

MOLINA HEALTHCARE	TX
Data Engineer	Oct 2024 - Present
• Leveraged Azure Data Lake Storage to manage complex datasets, ensuring compliance and supporting critical operations across multiple sectors. • Automated manual processes using Azure Functions and Azure Data Factory, reducing bottlenecks and enhancing data delivery efficiency. • Designed and implemented Azure Synapse Analytics and Databricks pipelines to streamline data integration and transformation, driving strategic growth and innovation. • Developed Python scripts to automate ETL processes, improving data pipeline efficiency and reducing manual intervention. • Developed Power BI dashboards to visualize key performance metrics and trends, enabling real-time, data-driven decision-making. • Optimized data storage and retrieval with Azure SQL Database and Cosmos DB, enhancing performance for large-scale transactions and analytics. • Integrated Apache Kafka to process real-time data streams, improving operational insights and assessments. • Applied Azure Machine Learning to analyze data patterns and support strategy optimization, advancing artificial intelligence and data science capabilities.	
TATA CONSULTANCY SERVICES	Hyderabad, INDIA
System Engineer	Jan 2021 - Jul 2022
• Built and maintained interactive dashboards in Tableau and Salesforce, delivering actionable insights into operational performance, energy consumption, and infrastructure projects.	

- Conducted data-driven analysis to optimize supply chain operations, asset utilization, and energy efficiency, identifying trends to improve logistics and resource management.
- Collaborated with cross-functional teams including engineering, finance, and operations to provide data-backed insights for infrastructure planning and project execution.
- Managed **SQL databases** with 5+ TB of data storage, enabling rapid retrieval for operational reporting and strategic decision-making.
- Engineered data pipelines using **AWS Glue** to automate transformation and data integration, ensuring seamless synchronization across business units.
- Leveraged **AWS Lambda** to process and analyze 10 TB of structured and unstructured data, supporting advanced analytics and predictive modeling for energy and infrastructure projects.
- Developed data governance standards for 100+ datasets, ensuring accuracy, compliance, and consistency in data used for operational efficiency, regulatory reporting, and strategic initiatives.
- Executed data cleaning processes, eliminating inaccuracies and redundancies in datasets to ensure high-quality data for business intelligence and forecasting.
- Optimized **ETL workflows**, streamlining data processing for asset management and operational analytics, uncovering key insights across 50+ data sources in energy distribution and infrastructure usage.
- Conceptualized GitHub workflows to streamline task management and project tracking, ensuring efficient data insights delivery and alignment with business objectives.

TRIGENT SOFTWARE

INDIA

Data Analyst

Jun 2020 - Dec 2020

- Analyzed large datasets using **SQL, Python (Pandas, NumPy)**, and Excel to identify trends, collaborating with cross-functional teams to align insights with business goals, reducing report generation time by 2 hours weekly.
- Designed interactive dashboards in **Power BI** to visualize KPIs, communicating insights to non-technical stakeholders through data storytelling, enhancing accessibility for 15+ departments.
- Evaluated data quality using data modeling techniques in **ERwin and SQL**, problem-solving discrepancies in real-time, improving accuracy by 20%, and ensuring compliance with GDPR.
- Developed predictive models with Python (Scikit-learn) and machine learning algorithms, applying critical thinking to optimize variables, reducing operational costs by \$50K annually.
- Collaborated with stakeholders using **Jira and Confluence** to define requirement-gathering frameworks, leveraging stakeholder management to streamline project timelines by 3 weeks.
- Automated data cleaning workflows via **ETL pipelines (Apache Airflow)** and Python scripts, demonstrating time management to reduce manual processing by 8 hours weekly.
- Presented insights using data visualization tools (**Matplotlib, Seaborn**) and PowerPoint, enhancing public speaking proficiency to influence strategies that boosted revenue by \$1.2M.
- Conducted root cause analysis with statistical analysis (R, SPSS) and hypothesis testing, applying attention to detail to resolve 15+ data inconsistencies monthly.
- Mentored junior analysts on technical documentation and version control (Git), demonstrating leadership to reduce onboarding time by 10 days.
- Optimized cloud data storage (AWS S3, Azure Blob) with strategic planning, cutting storage costs by \$20K annually while improving scalability.

TRIGENT SOFTWARE

INDIA

Data Analyst Intern

Dec 2019 - May 2020

- Systematized data extraction, transformation, and loading (ETL) processes with Python scripts, improving pipeline efficiency and reducing manual work across monthly data operations.
- Pruned complex **SQL queries** to retrieve and manipulate data from relational databases, enhancing the speed and accuracy of report generation for timely business insights.
- Streamlined data analysis and reporting tasks with Excel models, incorporating advanced functions like Pivot Tables, VLOOKUP, and Macros, automating repetitive tasks and improving weekly workflows.
- Monitored **Oracle databases** to ensure high availability and reliability, implementing regular backups and disaster recovery procedures to minimize downtime and data loss.
- Secured sensitive data within **PostgreSQL** databases by applying access controls, encryption, and validation measures, maintaining data integrity, and protecting over 1,000 GB of data from unauthorized access.
- Streamlined Pandas for data aggregation and filtering, manipulating large datasets to uncover actionable insights and support business functions.
- Conducted **A/B testing** to assess the impact of changes on key metrics, providing data-backed recommendations that upgraded conversion rates and user engagement.

PROJECTS

- Sports Analytics Data Warehouse: Built a data warehouse using Snowflake; visualized data in Tableau.
- Healthcare Claims Automation: Automated claims analysis with Python, PySpark, and SQL.
- Refugee Assistance Dashboard: Developed Power BI dashboards and managed Databricks pipeline
