

## VENKATA GUNDARAPU

Dallas, TX | Willing to Relocate | 940-977-5393 | venkatamanoharg1994@gmail.com

### Professional Summary:

- 9 Years of Professional IT experience with Data Warehousing and Business Intelligence background in Designing, Developing, Analysis, Implementation and post implementation support.
- In-depth knowledge of standard methodologies like Software Development Life Cycle (SDLC), Iterative Software Development Life Cycle Process as per Rational Unified Process (RUP), Capability Maturity Models (CMM) and rational tools used during various phases of RUP.
- Extensive experience in developing Business Requirement Document (BRD), Functional Requirement Document (FRD), Software Requirement Specification (SRS), Requirement Traceability Matrix (RTM), Project Vision Document and Use Case Specification Documents.
- Extensive experience on Data Engineering field including Ingestion, Data lake, Data Warehouse, Reporting and Analytics.
- Strong competency in facilitating Joint Requirement Planning (JRP) sessions, Joint Application Development (JAD) sessions and Scrum events such as Backlog Grooming, Sprint Planning, Daily Scrum Meeting, Sprint Review and Sprint Retrospective Meetings with IT /Business Groups for enhancements and maintenance.
- Excellent understanding of Business Requirements Elicitation/Gathering, Translating Requirements into Specifications and Application Design.
- Hands-on experience in Profit & Loss sheet preparation for T&M, FPP & RFB projects.
- Extensive experience in developing Use Cases, creating Screen Mockups, conducting Gap Analysis and Impact Analysis, SWOT analysis, Cost Benefit Analysis and Risk Analysis.
- Involved in writing test plan, test case, test scenario and performing test execution, test result analysis, Software Quality Assurance and Quality Control using HP Quality Center 11 ALM Edition and JIRA.
- Worked with Sales, Delivery and Finance teams for monthly, quarterly and annual revenue budgeting & forecasting and tracking actual performance.
- Strong understanding in finance project profitability calculations and prepared account level profit analysis & report leadership.
- Possess good knowledge in Capex-Opex processes and responsible for account level procurement process.
- Provided project planning, milestone management, scope management, resource forecasting, revenue forecasting, financial management, change management across the project portfolio.
- Possess strong knowledge in MSA, SOW and amendment document preparation and securing both party signatures.
- Responsible for supervising the project scope documentation, requirements gathering, high level application/business flow diagrams, project plans, meeting co-ordination and facilitating internal business and technology groups.
- Acted as a liaison with HR department in the areas of open positions, on boarding process and highly sensitive performance and compensation reporting.

### Education:

#### **Master of Engineering Management**

*University of North Texas - Graduation: Dec 2024*

#### **Bachelor's Degree in Computer Science**

*JNTU Kakinada University - Graduation: May 2015*

### Certifications:

- Google Project Management Certificate
- Six Sigma White Belt Certification

### Technical Skills:

|                               |                                                                         |
|-------------------------------|-------------------------------------------------------------------------|
| <b>Programming Languages</b>  | C#, SQL, Python C++, R, HTML, .Net, VB.NET, VBA, Scala, Shell Scripting |
| <b>Requirement Management</b> | MS Office, JIRA, Version-One, HP ALM, Blue Print                        |

|                                     |                                                                        |
|-------------------------------------|------------------------------------------------------------------------|
| <b>Data Profiling and Scrubbing</b> | DQ Analyzer, DataFlux Management Studio                                |
| <b>Reporting Tools</b>              | MS office Suite, Tableau, IBM Cognos, Power BI, Crystal, OBIEE         |
| <b>Modeling Tools</b>               | Rational Rose, MS Visio, Gliffy, Erwin, Balsamiq, JustInMind, Invision |
| <b>ETL Tools</b>                    | Informatica Power Centre 7.x/8.x/9.x, SSIS, IBM Data Stage             |
| <b>Databases</b>                    | MySQL, SQL Server, H-base, MS Access, Oracle, Teradata, Snowflake      |
| <b>Office Tools</b>                 | MS Word, MS Excel, MS SharePoint, MS Project, MS Visio, MS Access      |
| <b>Version Control Tools</b>        | BitBucket, GitHub, Source Tree                                         |
| <b>Testing Tools</b>                | Testrail, JIRA, Load Runner, Selenium, HP ALM                          |
| <b>Analytics Tools</b>              | MS Excel, MS Access, Power BI, Tableau 9.1                             |
| <b>Defect Tracking Tool</b>         | Test Director, HP ALM, JIRA                                            |

### Professional Experience:

**Client: FedEx | Coppell, TX**

**Jun 2023 – Present**

**Role: Business Analyst**

#### Responsibilities:

- Developed improved and maintained team and individual KPI reports using excel, databases, and other resources and data sources.
- Performed data extraction, data integration, data analysis and data profiling by using complex SQL on various source system including Oracle, Teradata, Hadoop, Snowflake and SQL Server Management Studio (SSMS).
- Written several Shell/Scala scripts using UNIX Korn Shell for file transfers, error logging and data archiving.
- Performed data scrubbing on the data pulled from the database which are incomplete, inaccurate or inaccurately formatted to improve the data consistency, accuracy and reliability.
- Developed complex SnowSQL procedures in snowflake cloud data warehouse for business analysis and reporting.
- Contributed to the enterprise rollout of Microsoft Teams and SharePoint by supporting configuration, access permissions, and documentation for user onboarding and adoption.
- Assisted with the security review and evaluation of new software tools that processed sensitive PHI/PII data to ensure compliance with healthcare and organizational standards.
- Supported secure file transfer automation through shell scripting, improving the reliability and auditability of data pipelines across departments.
- Assisted team in migrating on-premise databases to Cloud using AWS Database Migration Service (AWS DMS)
- Worked on Tableau/COC (Cost of Care), Power BI platforms for data visualization with complex datasets to have deep insights about the data to report.
- Generated ad hoc SQL queries using joins, unions, group by, order by and aggregate functions to extract data from different data sources and to perform DDL (Data defining language) operations to create, read, update and delete (CRUD) the data in the database for data manipulation/calculations & data analysis operations.
- Worked on analyzing the raw data of vendor to perform proper and accurate data mapping between the dataset (data dictionary) and production data.
- Created Attribution/Affinity based manual rosters for ADT (Admission Discharge and Transfer) systems and EMR (Electronic Medical Records) systems using PHI/SDOH/PII information.
- Pulled/Analyzed all type of claims (PHYSN/HOSP/VISION/PANCL/FANCL/PHMCY/DENTL) data and the memberships associated to it and reported it to the higher management.
- Created the case load file with case counts for IP/OP/ER claim types across all LOB (Commercial, Medicare and Medicaid).
- Created the baseline/Impact metrics by pulling the total chases, used chases and the open gaps from the database.

## VENKATA GUNDARAPU

Dallas, TX | Willing to Relocate | 940-977-5393 | venkatamanoharg1994@gmail.com

---

- Created a PROF/FACL annual spend report based on the tax ids and facilities.
- Strong experience in using MS Excel and MS Access to dump the huge raw data set and Provide report analysis comparing results to business goals, identified trends and recommended best practices.

**Environment:** Teradata, Hadoop, Spark, Snowflake, PL/SQL, SQL Loader, Power BI, Tableau, Informatica, Visio, Jira, MS Office

**Client:** Cerebra IT Services | Visakhapatnam, India

**Oct 2021 – Dec 2022**

**Role:** Business Systems Analyst

**Responsibilities:**

- Lead the daily scrum, sprint planning, sprint demo, sprint retrospective and backlog grooming sessions.
- Conducted data analysis activities and data prototypes against source systems, 3rd party products, or data that resides within source solutions to confirm data quality, prove concepts, determine if data is fit for purpose and inform accurate data solutions.
- Involved in extensive data validation, cost analysis by developing several complex SQL Scripts
- Created detailed, comprehensive and well-structured test plans, test cases and test scenarios.
- Supported the team by performing Unit test, Sanity Test, Regression test and Performance test.
- Conducted data mapping sessions with the business solutions group to establish the availability of data elements and derivations required for the implementation.
- Expertise in Jira administration, created complex JIRA workflows, project workflows, automation rules, dashboards, field configurations, screen schemes, permission schemes and notification schemes for three projects with this client.
- Collaborated with infrastructure and application support teams on patching, upgrade cycles, and post-deployment verification to support system stability and compliance.
- Participated in disaster recovery planning and business continuity testing to ensure readiness across business-critical platforms.
- Supported identity access management processes, including permissions documentation and system access audits.
- Researching (both qualitative and quantitative) existing and potential markets and prepared material to support senior leadership and company projects. Material preparation will sometimes involve fact-checking, data analysis, market trends, research, and diligence.
- Coordinating and carrying out all phases of implementing new processes including requirements gathering, design specification, development coordination, testing and approvals documentation and implementation planning.
- Analyzing and communicating stakeholder needs by translating business requirements into software requirements.
- Developing specifications diagrams, mockups, wireframes and flowcharts for programmers to follow.
- Overseeing implementation, coordinating tests and observing initiation of the system to validate performance.
- Ownership of all functional documentation and other artifacts for the assigned projects including client reviews and sign-off.
- Review and summarize Current State Artifacts Collection, includes Architecture diagrams, regression test packs, BCM plans, existing application delivery plans/roadmaps.

**Environment:** Load runner, blaze meter, SQL Loader, PL/SQL, PostgreSQL, Share Point, .Net, Oracle, Visio, Jira, MS office.

**Client:** GM Trading | Visakhapatnam, India

**Mar 2019 – Oct 2021**

**Role:** Technical Business Analyst

**Responsibilities:**

- Lead the daily scrums as a Scrum Master to ensure the seamless project progression.
- Work with Production team for the Production support.

## VENKATA GUNDARAPU

Dallas, TX | Willing to Relocate | 940-977-5393 | venkatamanoharg1994@gmail.com

---

- Work with Triage team to analyze the agent calls which comes in the XML format to understand and document the issues.
- Involved in preparing Logical Data Models/Physical Data Models.
- Business analyst for multiple .net modules on Medicare Advantage software and web-based applications
- Worked in entire life-cycle beginning from Requirements gathering, Data Model Design, ETL Design, Report Design, Testing, and Migration to Production and Post Production Support.
- Designed & developed logical & physical data model using data warehouse methodologies, including Star schema - Star-joined schema, conformed dimensions' data architecture, early/late binding techniques, data modelling, designing & developing ETL applications using Informatica.
- Participated in data quality improvement initiatives by identifying and resolving inconsistencies in business-critical reports and operational databases.
- Worked with security and infrastructure teams to support file transfer protocols, backup validation, and environment health checks as part of system hardening efforts.
- Used python-based data manipulation tools such as Pandas, Matplotlib, PostgreSQL to clean corrupted data before generating business requested reports
- Involved in preparing Logical Data Models/Physical Data Models.
- Worked with reversed engineer Data Model from Database instance and Scripts.
- Experienced in writing complex SQL Queries, Stored Procedures, Triggers, Views, Cursors, Joins, Constraints, DDL, DML and User Defined Functions to implement the business logic and also created clustered and non-clustered indexes
- Researched and analyzed data, made appropriate recommendations based on findings.
- Extract and filter data from various source to load in to MySQL database. Developed ER Diagrams to design RDBMS.
- Developing SSIS packages to migrate data from OLTP to OLAP servers
- Responsible for SQL tuning and optimization using Analyze, Explain Plan and optimizer hints.
- Experience in building Data Integration, Workflow Solutions, and Extract, Transform, and Load (ETL) solutions for data warehousing using SQL Server Integration Service (SSIS).

**Environment:** Quick Test Professional 8.2, Quality Center 8.2, SQL Loader, PL/SQL, Pandas, Matplotlib, PostgreSQL, Share Point, .Net, Oracle, MS-Excel, Jira.

**Client:** Atribiz Solutions | Visakhapatnam, India

**May 2016 – Mar 2019**

**Role:** Business Analyst

**Responsibilities:**

- Maintained the existing ETL (SSIS Packages and Store Procedures) accordingly to populate the new Metrics.
- Created SSIS packages for extracting data from databases like SQL, Oracle and load those data into tables in SQL server. Created package to handle reject data in customer tables. The package extracts reject records in those tables if the records are older than certain days.
- Designed and Developed analysis reports, charts, scorecards, and dashboards.
- Created Stored Procedures, User Defined Functions (UFD), Triggers, Indexes, Views, SQL joins to implement business rules.
- Used SQL Server profiler and Database Engine Tuning Advisor for complex stored procedures and strong SQL server query performance tuning. Worked with error handling by using TRY/CATCH statement.
- Loaded data from source to database by using T-SQL statement.
- Creation of tables, queries (including union statements), forms, reports, macros, and modules for performing daily, weekly, and monthly reporting needs.
- Developed ETL specification based on Business Requirements/Mapping Document.
- Prepared unit test cases and performed unit testing along with the team.
- Ensuring coding standards and practices are met in regards to coding and documentation.
- Involved in training of users

## VENKATA GUNDARAPU

Dallas, TX | Willing to Relocate | 940-977-5393 | venkatamanoharg1994@gmail.com

---

- Created and maintained technical documentation using defined technical documentation templates that meet SDLC standards
- Built tables, views, stored procedures, indexes, functions, and triggers in SQL Server
- Created various database object like stored procedures, functions, tables, views
- Configured the report viewing security for various users at various levels using Report Manager
- Scheduled report and exported in PDF format.
- Designed and implemented Parameterized and Cascading Parameterized reports using SSRS.
- Created various geographical and time dimension reports of fiscal year, quarter month, week and daily reports for all domains and published through Report Server.
- Created various reports by comparing the growth of company based on each quarter by using bar charts.
- Responsible for generating annual reports based on the growth of company with respect to customers.
- Conducted user training sessions and supported the requests for enhancements, modifications and new reports.

**Environment:** Microsoft Office Suite, Quality Center 8.2, SQL Server 2014, Oracle 10g, Tableau 9.0, Rational Requisite Pro, Jira.
