PROFESSIONAL SUMMARY:

- Built ETL workflows using Py Spark and Databricks notebooks in academic projects to automate data cleaning and transformation.
- Designed and implemented Power BI dashboards to visualize business KPIs, trends, and student data during coursework.
- Developed SQL queries and stored procedures in MySQL and SQL Server for academic case studies, ensuring accurate reporting.
- Applied predictive analytics techniques in university projects using Python (NumPy, Pandas, Scikit-learn) for forecasting outcomes.
- Worked with Azure Data Factory and Azure Data Lake in lab projects to automate data movement and transformation.
- Created data dictionaries and documentation for project workflows to support collaboration and reproducibility.
- Participated in capstone projects and team-based assignments, applying Agile concepts to deliver data solutions on time.
- Gained exposure to Delta Lake and Apache Spark optimization techniques during coursework to improve data pipeline efficiency.
- Recent graduate with strong foundation in Data Engineering, Analytics, and Cloud Technologies, specializing in Azure Databricks, Apache Spark, SQL, and Python through academic coursework and university projects.
- Hands-on experience designing ETL pipelines, data models, and dashboards as part of university research and project-based learning.
- I am proficient in data analysis, database management, and visualization with tools like Power BI, SQL Server, MySQL, and Oracle.
- Demonstrated ability to work with large datasets through academic labs and group projects, applying advanced data cleaning, transformation, and analysis techniques.
- Strong understanding of data warehousing concepts, predictive analytics, and cloud computing platforms, with a focus on Azure.
- Committed to continuous learning, with a passion for leveraging data to generate insights and support decision-making.

TECHNICAL SKILLS:

- **Big Data Technologies:** Azure Databricks, Apache Spark.
- **Programming Languages:** Python, SQL.
- **ETL & Data Processing:** Py Spark, Pandas.
- **Data Visualization:** Power BI

EDUCATION:

Master of Science in Analytics and systems

University of Bridgeport, Bridgeport, CT

02 MAY 2023- 18 DECEMBER 2024

Bachelor of Business Administration in Aviation Management

Andhra Loyola college, Vijayawada, India

July 2019-April 2022

Internship in Gannavaram airport, Vijayawada, India

December 2022- February 2023.

Overview: As an Aviation and Business student, I have gone through different positions in airports and learnt how to do complex tasks and projects under pressure.

Responsibilities:

Collaboration: Collaborated with cross-functional teams including Airplane mechanic, Ground staff, customer service agents, Air traffic controller, Airport authority of India and Air Marshall. Performed beginner-level ATC (AIR TRAFFIC CONTROLLER) operations.

Model Development: Developed Comfortable way of security check In and check in process and Easy reach to board the flights with ease and comfort.

Documentation: Conducted a survey of how many people are comfortable through their Process within the airport and what are the consequences caused within the process.

Continuous Learning: Stayed up to date with the latest advancements in Developing tools and activities like updating myself with new technologies and improving my analytical skills day by day and New AI(Artificial Intelligence) Languages used in the activities within the Airports and in the IT world.

Technologies Used: Python, Microsoft Excel, Microsoft word, Power BI, SQL and Power point presentation.

Andhra Loyola college

Responsibilities:

Presentations on Business Organization and Power BI app building and usage to the users.

Projects

Presentation on warehouse Activities

University of Bridgeport, Bridgeport, CT

September 2023.

Overview:

Developed a Whole cycle of warehouse and activities included from the beginning to ending.

Responsibilities:

Designed a warehouse cycle and implemented the various forms of activities performed inside the warehouse and create a presentation of at least 20 pages what are the risks included in the warehouse and how the stock will be calculated, and the data is saved from different sectors of warehouse.

Technologies Used:

Power point presentation, Visual Studio & Various AI tools and Microsoft learn.

Brand Audit

University of Bridgeport, Bridgeport, CT

August 2024 - September 2024.

Overview:

Tesla group of industries how they were emerging into the international markets and how they are still standing or surviving with their clean energy startup engine.

Responsibilities:

Gathered the data and researched how their marketing and branding strategy work in today's technological international markets. Company came into existence when General Motors unable to compete with the efficiency of fuels, shelved their EV1 product line. Tesla's brand portfolio is constantly evolving, as the company expands into new markets and introduces new products. These brands are helping Tesla to achieve its mission of accelerating the world's transition to sustainable energy.

Technologies Used:

Power point presentation, AI tools including ChatGPT and Copilot, Microsoft learn.

Certifications:

Power BI Data Analyst Associate (PL-300)

Feb 2025
