(Open to Relocate)

SUMMARY

Experienced Data Analyst with 4 years of experience in SQL, Python, Power BI, Tableau, and cloud platforms (AWS, Azure, GCP). Skilled in ETL workflows, data migration, automation, and predictive analytics, optimizing reporting efficiency and decision-making. Expertise in big data (Snowflake, Spark, Databricks), API integration, and scalable data pipelines, driving 30% efficiency gains. Proven success in health, manufacturing and financial services, enhancing insights through advanced analytics and GenAI tools. Certified in AWS Cloud, SQL, Power BI, Tableau, and Agile methodologies, with a proven track record of delivering AI-powered insights, actionable dashboards, and solving complex business problems through data-driven strategies. Actively seeking new opportunities to leverage analytics to solve complex business challenges makes it relevant.

SKILLS

- **Databases:** Snowflake, Microsoft SQL Server, PostgreSQL, MongoDB
- **Programming & Query Languages:** Python (Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn), SQL, DAX
- **Data Visualization:** Power BI, Tableau, Looker Studio, Qlik Sense
- **ETL & Data Engineering:** SSIS, Azure Data Factory, AWS Glue
- **Cloud Platforms:** AWS (Redshift, Glue, S3, EC2), Azure (ADF, Databricks, Azure SQL), GCP (BigQuery, Looker Studio)
- **Big Data & Streaming:** Apache Spark, Kafka, Hive, Databricks
- **GenAI & Automation:** LangChain, OpenAI API, ChatGPT, Prompt Engineering, RAG Pipelines, API Integration
- **Analytics & Machine Learning:** Regression, Classification, Clustering, NLP, A/B Testing, Feature Engineering
- **Collaboration:** Git, Jira, Confluence, Docker
- **Productivity Tools:** Microsoft Excel (Advanced), Visual Studio Code, PyCharm

PROFESSIONAL EXPERIENCE

PAYPAL INC

Oct 2023 - Present

Business Intelligence Data Analyst

Baltimore, MD

PayPal's finance and compliance teams required **scalable analytics solutions** to improve transaction accuracy, automate reporting, and strengthen fraud detection.

- Designed and deployed **enterprise-grade financial dashboards** (Power BI, SSRS) tracking revenue growth, refund volumes, and dispute resolution trends, **reducing executive reporting cycles by 40%**.
- Created **SQL-based anomaly detection scripts** and reconciliation checks, improving transaction integrity and cutting **errors by 18%** across payment and refund data pipelines.
- Developed **fraud risk and payment failure KPI models** with DAX and SQL, enabling leadership to identify emerging patterns, saving **millions in potential fraud exposure**.
- Automated ETL workflows using **Python (Pandas, NumPy)** and SQL, reducing dashboard refresh cycles and improving **ad-hoc analysis response time by 50%**.
- Defined and standardized **7 core KPIs** in collaboration with Finance, Compliance, and Risk teams, creating a **single source of truth for cross-departmental reporting**.
- Built **star-schema data models** combining SQL Server, Excel, and API data sources, resulting in **faster drill-down analysis and improved user adoption**.
- Led analytics documentation and sprint planning in **Git, Jira, and Confluence**, improving delivery traceability and agile adoption.

ANTHEM

Sept 2022 - Sept 2023

Analytics Engineer – Cloud & ML

Baltimore, MD

Anthem required **scalable data analytics solutions** to enhance business intelligence and patient care insights. The goal was to improve operational reporting, enable clinical forecasting, and support regulatory and financial teams with trusted and timely data.

- Designed **scalable ETL pipelines** with Spark and Azure Data Factory, cutting data transformation latency by **45%** and enabling faster insights for utilization and claims teams.
- Migrated **on-premises data warehouses** to AWS Redshift and Azure SQL, improving **query performance by 60%** and reducing reporting backlogs.
- Built **self-service dashboards** in Power BI, Tableau, and Looker Studio, visualizing **admission rates, claims cycle times, and readmission trends**, accelerating decision-making by **30%**.
- Automated claims data cleansing and aggregation using **Python scripting and stored procedures**, saving **25+ hours/week** in manual operations.

- Developed **robust data models (star schema)** to support drill-through reporting and facilitate ad-hoc analytics by non-technical teams.
- Partnered with **product, engineering, and compliance teams** to implement HIPAA-compliant data handling workflows, strengthening security posture.
- Produced **risk stratification dashboards** to optimize care coordination and population health programs, reducing avoidable costs.
- Maintained **end-to-end documentation** and sprint planning in Confluence and Jira, improving onboarding and audit readiness.

HONDA

June 2021 – June 2022

Data Analyst – BI & Automation

Hyderabad, India

Honda sought to modernize its operational analytics infrastructure, enhance quality control reporting, and reduce fraud and warranty costs through intelligent automation and real-time monitoring.

- **Processed warranty and telemetry data** with SQL and Python, **improving data accuracy across manufacturing analytics.**
- **Built data pipelines, reducing latency** of machine sensor processing by 60%.
- Created **dashboards in Tableau** for downtime and **defect analysis**, reducing manual reporting by 40%.
- Developed **fraud detection models for warranty claims** (30% improved fraud accuracy) and **applied NLP** on claims narratives to **identify root causes.**
- **Integrated SAP ERP data** into BI systems, improving alignment between manufacturing and reporting teams.

PROJECTS

FraudDetect 360

- Built **real-time fraud detection models** using **Random Forest** and **XG Boost**, achieving **92% accuracy** by integrating behavioural and transactional features via **SQL** and **Python**.
- Designed **Power BI and Tableau dashboards** for live risk scoring, leveraging **AWS Glue** and **Apache Spark** to reduce fraud processing time by **40%**.

RetentionIQ

- Developed **K-Means clustering models** and **PCA** to identify high-risk customer segments with **85% churn prediction accuracy** across behavioural and transactional datasets.
- Optimized **Azure Data Factory pipelines** and built **interactive Power BI dashboards** to monitor churn trends and campaign effectiveness, cutting refresh time by **30%**.

AWARDS, RECOGNITION, CERTIFICATIONS

- SQL Mastery
- Power BI Data Analyst Associate
- AWS Cloud Practitioner
- Tableau Data Analyst Specialist

EDUCATION

UNIVERSITY OF MARYLAND, BALTIMORE COUNTY
MS in Data Science (GPA: 3.6/4.0)

Maryland, US

MALLA REDDY COLLEGE OF ENGINEERING AND TECHNOLOGY
B.Tech in Computer Science Eng. (GPA: 8.2/10.0)

Hyderabad, India
