Professional Summary

Software Developer with **4+ years** of experience in building and deploying **Java-based applications** and **microservices**. Proficient in **Spring Boot**, **React.js**, and cloud technologies including **AWS**. Skilled in designing **REST APIs**, migrating monoliths to **microservices architecture**, automating **CI/CD pipelines**, and applying **Agile methodologies**. Strong focus on **performance optimization**, **code quality**, and **security** through tools like **JUnit**, **Mockito**, **OAuth2**, and **JWT**.

Technical Skills

Languages: Java (SE/EE), JavaScript (ES6+), TypeScript
Frameworks: Spring Boot, Hibernate, JPA, Struts
Web: HTML5, CSS3, JSP, Servlets, RESTful APIs
Build Tools: Maven, Gradle
Version Control: Git, GitHub, Bitbucket
Databases: MySQL, PostgreSQL, MongoDB, Oracle
Application Servers: Apache Tomcat, JBoss, WebLogic
Testing: JUnit, Mockito, Selenium, TestNG
IDEs: IntelliJ IDEA, Eclipse, Visual Studio Code
CI/CD & DevOps: Jenkins, GitHub Actions, Docker, Kubernetes
Cloud: AWS (EC2, S3, RDS, Lambda), Azure
Monitoring: Log4j, ELK Stack, Prometheus
Others: Agile/Scrum, OAuth2, JWT, Kafka, Microservices

Professional Experience

Software Developer

Verizon, USA — April 2025 – Present

- Developed scalable applications using **Java (Spring Boot)** and **React.js**, enhancing customer platform speed by **30%**.
- Migrated monolith to **microservices architecture** using **Spring Cloud**, **Eureka**, and **Zuul**, cutting downtime by **40%**.
- Built **RESTful APIs** with PostgreSQL and MongoDB, improving data access time by **25%**.
- Automated pipelines using **Jenkins**, **Docker**, and **Kubernetes**, achieving **35% faster** deployments.
- Deployed services to **AWS** and integrated monitoring tools like **CloudWatch** and **Prometheus**.

- Implemented **OAuth2** and **JWT** for secure API access.
- Contributed to **Agile** ceremonies and maintained a **100% on-time delivery** rate.
- Achieved **85%+ test coverage** using **JUnit** and **Mockito**.

Java Developer

Dell Technologies, India — Feb 2019 – Nov 2022

- Designed and maintained **microservices** using Java 8/11, **Spring Boot**, and **Hibernate**.
 - Transitioned legacy systems to **microservices**, improving release velocity by **40%**.
 - Developed and optimized **REST APIs**, reducing latency by **25%**.
 - Integrated **Apache Kafka** for asynchronous processing.
 - Automated deployments with **Jenkins**, **Docker**, and **Kubernetes**.
 - Improved unit test coverage from **45% to 85%**, reducing bugs by **40%**.
 - Used **SonarQube** for code quality and performed regular code reviews.
-

Projects

IT Helpdesk Support System

Tech Stack: Java 17, Spring Boot, MySQL, Kafka, RabbitMQ, JWT, ELK, Docker, AWS EC2

- Developed a **role-based asset management system** for IT support operations.
- Reduced manual errors by **90%** and improved asset utilization by **40%**.
- Implemented **JWT-based authentication**, **REST APIs**, and **email alerts**.
- Deployed as Docker containers on **AWS EC2** using CI/CD pipelines.

IT Asset Management System

Tech Stack: Java 11, Spring Boot, PostgreSQL, JWT, Docker, Jenkins, AWS, React.js (optional)

- Created a full-featured asset management platform with **CRUD**, **RBAC**, and **notification features**.
 - Enabled compliance auditing and improved asset visibility and tracking.
 - Deployed microservices using CI/CD pipelines and Docker on **AWS EC2**.
-

Education

Master of Science in Information Studies

Trine University — Jan 2023 – Dec 2024

Bachelor of Technology in Electrical Engineering

S.R.K.R Engineering College — Jun 2016 – Mar 2020
