

Venkata Reddy Naru

Software Engineer

venkycts551@gmail.com | +1 945-290-8290 | Texas, TX | [LinkedIn](#)

PROFILE

Results-driven Data Engineer with 3+ years of industry experience and a strong academic foundation in Computer Science and Analytics. Recently completed M.S. in Business Analytics (May 2025), with B.Tech in Computer Science. Proficient in Python, Java, and C++, with hands-on experience in object-oriented design, distributed systems, and storage architectures. Adept in developing scalable solutions and analyzing system performance through academic and real-world projects.

TECHNICAL SKILLS

- **Programming & Languages:** Python, SQL (Oracle, MySQL, Teradata), Java, C++, R
- **Systems & Concepts:** Object-Oriented Design, Operating Systems, File Systems, Resource Management, Performance Engineering, Distributed Systems, DSA (Data Structures & Algorithms)
- **ETL & Data Tools:** Informatica PowerCenter, IICS (CDI, CAI, DQ), Azure Data Factory
- **Cloud & Storage:** AWS (Basics), Snowflake, Scalable Storage Systems, Indexing, Query Optimization.
- **Visualization & Reporting:** Power BI, Tableau, Excel (VLOOKUP, Pivot Tables), PowerPoint
- **DevOps & Tools:** Unix/Linux, Git, Jira, Autosys, Jupyter Notebooks, Agile

EDUCATION

Adelphi University, Master of Science in
Business Analytics

Sep 2023 – May 2025 | New York, NY

Pace Institute of Technology and Sciences, Bachelor of Science in
Computer Science & Engineering

June 2015 – May 2019 | Ongole, India

RESEARCH

Graduate Research Assistant, Adelphi University

Aug 2024 – May 2025 | New York, NY

- Conducted EDA on real-world data using SQL and Pandas to extract marketing trends and performance metrics.
- Built ML models (regression, forecasting) in Python to support predictive analytics in business/academic use cases.
- Developed data preparation workflows using SQL and Jupyter to feed models and dashboards.
- Collaborated closely with researchers and technical teams to execute experiments, refine models, and communicate insights effectively.

Bachelors Academic Experience:

- Developed file system simulators in C++ and Java, implementing memory management, I/O, and file indexing features.
- Simulated job scheduling algorithms (Round Robin, Multi-Level Queue) and analyzed throughput and wait times.
- Conducted OS kernel module experiments and resource profiling in a Linux-based lab environment.
- Applied object-oriented principles to build modular system utilities and performance monitoring tools in academic projects.

PROFESSIONAL EXPERIENCE

Data Integration Engineer, Cognizant

Apr 2023 – Jul 2023, Hyderabad, India

Client: Sanofi - Global Pharmaceutical & Healthcare Company

- Designed and deployed scalable ETL pipelines using Informatica IICS (Cloud Data Integration – CDI) for ingesting and transforming pharmaceutical data from multiple sources.
- Executed design and delivery of scalable ETL pipelines, applying strong software engineering practices to ensure clean, modular, and maintainable code.
- Tuned performance using advanced mapping logic, pushdown optimization, and reusable Taskflows, improving data processing efficiency.
- Developed and maintained critical application code to support ETL workflows, ensuring reliable performance across data platforms and integration points.

ETL Developer, Cognizant

Client: Abbvie - Health Care & Pharma Domain

Jan 2020 – Mar 2023, Hyderabad, India

- Developed and maintained end-to-end ETL pipelines using Informatica PowerCenter and Oracle, integrating data from multiple sources into a centralized data warehouse.
- Created complex mappings and workflows using transformations like Filter, Joiner, Lookup, Aggregator, and implemented Slowly Changing Dimensions (Type 1, 2, 3) for accurate historical data management.
- Acted as a bridge between technical teams and business stakeholders to translate complex data needs into actionable solutions.
- Provided regular status updates on project deliverables, ETL performance metrics, and issue resolutions to business stakeholders.
