

Venkateswarlu Chopparapu

ychopparapu02@gmail.com | (551) 254-9984 | Charleston, IL, USA

Results-driven **Big Data & Cloud Data Engineer** with 6+ years of experience in **AWS, Azure, and Snowflake** environments. Expertise in **ETL/ELT pipeline design, data migration, and real-time data processing** using **Spark, PySpark, Hive, and Kafka**. I am skilled in performance optimization, cloud architecture, and automation using **Airflow, Python, and SQL**. Strong background in delivering scalable, reliable data solutions supporting analytics, reporting, and business intelligence.

EDUCATION

Master's in computer technology – Eastern Illinois University, USA (Jan 2023 – May 2024)

PROFESSIONAL EXPERIENCE

Costco

AWS / Snowflake Data Engineer

Jun 2024 – Present

- Designed and developed **end-to-end ETL pipelines** on AWS and Snowflake to integrate large-scale data from on-premises systems, improving processing performance by **35%**.
- Built and systematized **data ingestion workflows** using **AWS Glue, Lambda, and Airflow**, ensuring consistent data delivery across teams.
- Utilized **Spark Streaming with Kinesis** for near real-time data processing, improving analytics timeliness.
- Migrated structured and semi-structured datasets to **Snowflake** and queries for performance and storage cost.
- Created and maintained **Snowflake data models, views, and stored procedures**, improving reporting accuracy.
- Used **Python and SQL** for data validation, cleansing, and transformation to ensure high data integrity.
- Collaborated with analysts and BI teams to automate reporting through **Redshift and Power BI** dashboards.
- Enhanced data quality monitoring processes by implementing validation scripts, reducing errors by **20%**.

Scube Soft Solutions

Azure / Snowflake Data Engineer

HYD, IND

Jan 2021 – Nov 2022

- Planned and implemented **Azure Data Factory pipelines** and **Databricks notebooks** to streamline data ingestion from multiple sources into **Azure Data Lake** and **Snowflake**.
- Established over **20+ data pipelines** improving overall **data refresh speed by 40%**.
- Built and optimized **PySpark data frames** in Databricks to process raw data from Blob Storage for analytical consumption.
- Tuned **Spark SQL** and **Hive** queries through partitioning and bucketing, reducing processing time by **30%**.
- Initiated **ETL workflows** using ADF triggers, parameters, and variables for dynamic and reusable pipelines.
- Created and deployed **JSON templates for pipeline automation**, simplifying version control and CI/CD.
- Conducted **Azure-to-Snowflake migration** including schema conversion, validation, and performance testing.
- Integrated **Azure Logic Apps** and **ADF monitoring dashboards** to improve pipeline visibility and reduce failures.

Origin IT Solutions

Data Engineer

HYD, IND

May 2018 – Dec 2020

- Developed **data ingestion workflows** using **Hive, Pig, Sqoop, and Spark**, managing terabytes of structured and unstructured data.
- Used **Kafka streaming** for near real-time data movement across distributed systems, improving data latency.
- Managed **Cloudera Hadoop clusters** and improved resource utilization for consistent system performance.
- Implemented **Spark RDD transformations** in Scala and PySpark, achieving **25% faster data processing**.
- Integrated **NoSQL (Cassandra)** and **RDBMS sources** for analytical workloads, improving data accessibility.
- Used **Snowpipe and Spark Connectors** for mechanized data loading from AWS S3 to Snowflake.
- Wrote **Python scripts** for data validation, logging, and process automation, reducing manual workload by 30%.
- Supported **ETL performance tuning** and query optimization across Hive and Impala.
- Collaborated with BI developers to support Power BI and Tableau dashboards with streamlined datasets.

KEY SKILLS

- Languages:** Python, SQL, Scala, Shell Script
- Cloud Platforms:** AWS (EMR, Lambda, S3, EC2, Redshift), Azure (Data Factory, Databricks, Data Lake), Snowflake
- Big Data:** Hadoop, Spark, Hive, Kafka, Sqoop, HBase, Oozie, Zookeeper
- ETL & Tools:** Airflow, Informatica, AWS Glue, Azure Data Factory, Databricks, Stitch Data
- Databases:** Oracle, SQL Server, PostgreSQL, Teradata, Redshift, Azure SQL
- Visualization:** Power BI, Tableau
- Version Control:** GitHub, Bitbucket, Azure DevOps
