

Venkati Kavya Kandipalli
Data Analyst | SQL | Power BI | Python | BI & Reporting | Cloud Analytics
Boston, MA | +1 (857) 209 8139 | kavyakandipalli03@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 4+ years of experience supporting finance, supply chain, operations, sales, and enterprise analytics by transforming complex datasets into clear, actionable insights. Skilled in SQL, Power BI, Tableau, Python, ETL/ELT, dbt, Airflow, and cloud analytics (Snowflake, BigQuery, Redshift, Azure). Adept at developing KPI frameworks, forecasting models, automated dashboards, and scalable reporting solutions that improve decision-making and operational efficiency. Strong cross-functional communicator with a track record of reducing reporting time, improving data quality, and enabling data-driven strategies.

SKILLS

- **BI & Visualization:** Power BI, Tableau, DAX, M Query, KPI Dashboards, Data Storytelling
- **Analytics Tools:** SQL, Python (Pandas, NumPy, Scikit-learn), A/B Testing, Forecasting, Time Series
- **Data Engineering / Cloud:** Snowflake, BigQuery, Redshift, dbt, Airflow, Azure Data Factory, AWS Lambda
- **Data Management:** Data Modeling, ETL/ELT Pipelines, Data Quality, Governance, Audit Controls
- **Business Domains:** Finance, Supply Chain, Operations, Marketing, Product Analytics, Healthcare

EXPERIENCE

Humana, USA

May 2024 – Present

Data Analyst BI and Reporting

- Built Power BI dashboards and SQL-driven reporting solutions, reducing manual reporting time by 40%.
- Developed ELT pipelines using dbt + Snowflake + Airflow, improving data refresh cycles by 60%.
- Designed KPI frameworks for finance, operations, and performance tracking, improving visibility for 150+ stakeholders.
- Conducted trend analysis, forecasting, variance analysis, increasing planning accuracy by 18%.
- Optimized SQL models and queries, reducing reporting latency by 25%.
- Partnered with cross-functional teams (finance, supply chain, operations, product) to deliver insights that improved decision-making efficiency by 30%.

Aplus Datalytics, India

Jan 2020 – Aug 2022

Data Analyst Finance and Operations Insight

- Built dashboards for finance, supply chain, and sales analytics, reducing reporting turnaround by 70%.
- Automated Excel-based workflows into SQL + Power BI pipelines, saving 15+ hours/week.
- Created data models tracking KPIs such as revenue, cost trends, conversion, churn, and operational efficiency.
- Performed A/B testing and analytical deep-dives for marketing and product teams, improving ROI by 12%.
- Integrated ERP, CRM, and operations data into SQL Server, improving data accuracy and reducing inconsistencies.
- Established data governance and validation rules, improving audit readiness by 50%.

Fortis Healthcare, India

Jul 2018 – Jan 2020

Data Analyst Operations and Insights

- Developed dashboards for operational KPIs, forecasting, and performance metrics across multiple business units.
- Automated ETL workflows using Azure Data Factory, reducing data processing time by 40%.
- Built Python-based forecasting and predictive models, improving accuracy by 15%.
- Worked with cross-functional teams to translate business needs into dashboards, metrics, and data models.
- Improved data quality and consistency by designing validation tests and audit checks.

EDUCATION

- Master of Science in Data Analytics Engineering, Northeastern University, Boston, MA

PROJECTS

- **Automated Forecasting System:** Built a forecasting pipeline using dbt, Snowflake, and Python that delivers daily revenue, demand, and operational forecasts.
- **Self-Service KPI Dashboard:** Created reusable DAX semantic models enabling business teams to slice and analyze KPIs without analyst involvement.
- **Marketing Attribution & Experimentation:** Designed an A/B testing framework and attribution model improving campaign decision-making by 12%.
- **Data Quality & Governance Layer:** Integrated dbt tests, schema validations, and automated alerts reducing data issues by 30%.
