Summary

Results-driven **Data Analyst** with 4+ years of experience driving business value through **data analytics**, **business intelligence** and **data-driven decision-making** across **healthcare**, **finance** and **consulting**. Expert in **SQL**, **Python**, **R**, **Tableau**, **Power BI** and **cloud platforms** (**AWS**, **Azure**), with a strong track record of **architecting** and **automating** scalable **ETL pipelines**, **designing** robust **data models** and delivering interactive **dashboards** that translate complex datasets into actionable insights. Skilled in **statistical analysis**, **predictive analytics** and **cross-functional collaboration**, I partner with stakeholders to **identify opportunities**, **optimize processes** and **inform strategy**—consistently **accelerating** reporting cycles, **reducing** costs and **improving** organizational performance.

Technical Skills

Programming: Python (NumPy, Pandas, SciPy, Matplotlib), R (ggplot2, dplyr), SQL (MySQL, SQL Server, PostgreSQL)

ETL & Data Pipelines: Apache Airflow, dbt, Apache Spark, Hadoop, Apache Kafka

Data Warehousing: AWS Redshift, Azure Synapse, Snowflake, NoSQL (MongoDB, DynamoDB)

Cloud & DevOps: AWS (S3, Glue, Lambda, EC2, IAM, CloudFormation), Azure (Data Factory, Databricks, Functions, Cosmos DB), Terraform

BI & Visualization: Tableau, Power BI, Microsoft Excel

Other: Data Governance, Data Modeling, Predictive Analytics, Machine Learning, HIPAA/GDPR Compliance

Methodologies: Agile, SDLC, Scrum

OS/IDEs: Linux, Windows; Visual Studio Code, PyCharm

Professional Experience

Data Engineer | McKesson | GA, USA

Feb 2024 – Present

- **Architected** and **automated** end-to-end **ETL pipelines** using **Python**, **SQL**, and **Apache Airflow** to ingest and transform clinical supply-chain and revenue data from AWS Redshift and Azure Synapse, increasing data processing efficiency by 60% and reducing report generation time by 40%.
- **Extracted**, **cleansed**, and **aggregated** over **500 million** records from **AWS Redshift** and **Azure Synapse** with **Python** (**Pandas**) and **SQL stored procedures**, delivering real-time datasets to BI analysts and accelerating financial analysis cycles by 30%.
- **Developed** and **deployed** interactive **Tableau** and **Power BI** dashboards integrating revenue trends, cost metrics, and utilization **KPIs** via live cloud data connections, empowering executive leadership with actionable insights and boosting dashboard adoption by 25%.
- Built and implemented **Python-based predictive fraud-detection** models using **SciPy** and **scikit-learn** on historical claims data, achieving **95%** anomaly detection accuracy and reducing fraudulent transactions by **20%**.
- **Designed** and **enforced** a data **governance framework** using **AWS Glue Data Catalog** and **Azure Purview** to ensure **HIPAA** and **GDPR** compliance, achieving **100%** audit readiness and improving data quality standards organization-wide.

Data Analyst | KPMG | India

Oct 2020 – Jul 2022

- **Automated** scalable **ETL workflows** with **Apache Airflow** and **dbt** to integrate multi-source financial data, cutting manual processing effort by **80%** and accelerating month-end close cycles by **50%**.

- **Developed predictive risk-analysis** models in **Python** (Pandas, scikit-learn) to forecast client portfolio exposures, improving forecast accuracy by **35%** and enabling proactive mitigation strategies for **10+** enterprise accounts.
- **Designed** and maintained **Power BI dashboards** with **DAX** and **data modeling** to track **50+** financial **KPIs** for **300+ stakeholders**, enhancing visibility into budget variances and driving a **15%** increase in data-driven decision-making.
- **Led** data integration and migration initiatives on **AWS** (S3, Redshift, Glue) and **Azure** (Data Factory, Synapse), **optimizing ETL processes** to reduce infrastructure costs by **20%** while ensuring scalable architecture.

Data Analyst | Espire | India

Mar 2020 – Sep 2020

- **Engineered** high-throughput **ETL pipelines** using **Apache Spark** on **AWS EMR** and **SQL** to process **100+ million** daily records, centralizing customer analytics and reducing data latency by **30%**.
- **Migrated** legacy on-premise data systems to **AWS Redshift** and **Azure Synapse** with **Python** and **SQL** scripts, boosting query performance by 40% and enabling scalable BI workloads.
- **Implemented** real-time data ingestion and monitoring using **Apache Kafka** and **Airflow**, establishing automated alerts that cut **ETL** failures by 30% and ensured **99.9% data availability**.

Education

Master of Management Information Systems | Auburn University at Montgomery, AL – Dec 2023

Bachelor of Computer Science & Engineering | SR Engineering College, Telangana, India – Jun 2021
