

Venu Prakash Gunda

Java Full Stack Developer

Charlotte, NC | (551) 226-7938 | vpurakashwork@gmail.com | [Linkedin](#)

SUMMARY

- Java Full Stack Developer with **4+ years** of experience in end-to-end web application development using **HTML, CSS, Bootstrap, JavaScript, TypeScript, ES6, React JS, Redux, and Angular**, ensuring a seamless user experience.
- Extensive experience in designing and implementing Microservices with **Spring Boot, Spring MVC, Spring Data JPA**, and **Hibernate ORM**, enhancing scalability and modularity.
- Adept in server-side development with **Java, Python, C++, utilizing Servlets, JSP, JDBC, JUNIT, JMS**, and employing multi-threading for optimal performance.
- Proficient in **RESTful and SOAP API design**, documentation with **Swagger Open API**, ensuring standardized and interoperable communication.
- Advanced knowledge of **SQL, MongoDB, PostgreSQL, and MySQL**, employing **Spring Data JPA** for efficient data access and manipulation.
- Utilized **Mockito, React Testing Library**, and **Jest** for comprehensive unit and integration testing, ensuring robust and reliable code. Experience with **AWS services, Docker** for containerization, and deployment on Apache Tomcat and WebLogic servers, ensuring a scalable and reliable infrastructure.

TECHNICAL SKILLS

Front-End Technologies:	HTML, CSS, UI Material, JavaScript, React JS, React Native, React Hooks, Typescript, SASS, Angular, ES6
Back-End Technologies:	Java, Python, RESTful API, Webservice, Microservices, Spring Boot, Spring MVC, Spring Data JPA, Hibernate ORM, Node JS, Express JS, DSA, Django
J2EE Technologies:	Servlets, JSP, JDBC, JMS, Maven, Multi-threading
Architecture:	MVC, MVVM, TDD, BDD
Methodology:	Waterfall, Agile Scrum, Kanban
IDEs:	NetBeans, IntelliJ IDEA, Eclipse, Visual Studio, Android Studio
Web Services:	RESTful, SOAP
Databases:	SQL, MongoDB (NoSQL), PostgreSQL, MySQL
CI/CD & Tools:	Jenkins, Code Ship
Testing tools:	Mockito, React Testing Library, Jest, Selenium, JUnit, TestNG, Espresso
Cloud & Deployment:	AWS, Docker
Web Server:	Apache Tomcat, WebLogic
Other Tools:	Jira, SVN, GitHub, Bitbucket, Swagger, Open API, GraphQL, SonarQube, Postman

EXPERIENCE

JPMorgan Chase, Java Full Stack Developer | IL, USA

Aug 2023 – Present

- Implemented scalable Payments applications utilizing Spring Boot, Hibernate ORM, optimizing database interactions with PostgreSQL and Oracle, resulting in a 40% reduction in server load and improved application performance and user interaction by 20%.
- Developed the critical modules using React, Redux, HTML5, CSS3, Bootstrap, React-Bootstrap, JavaScript, Express.js, and RESTful APIs, achieving a significant 20% boost in client experience and application responsiveness.
- Engineered robust event-tracking solutions within the MERN stack, leveraging Java/Spring to strengthen backend functionalities and enhance system resilience in response to evolving business needs.
- Built a high-performance ReactJS SPA with Hooks, significantly increasing user engagement and interaction through optimized tagging solutions.
- Enhanced database performance by 25% in Click Software applications using MongoDB within the MERN stack, leveraging advanced schema design, indexing, query optimization, and sharding techniques.
- Engineered JSON request/response workflows with Postman and Swagger UI, decreasing API integration issues by 30% and improving productivity.
- integrated a Stripe API-based payment gateway for a Fortune 500 client's advertising campaigns using GraphQL,

webhooks, and the MERN stack. Enhanced application security, streamlined transaction processing, and achieved a significant 30% increase in revenue for Epsilon's platform.

- Spearheaded Agile collaboration initiatives, reducing user onboarding time by 30% and increasing user adoption by 20% in the first quarter.
- Delivered a 40% reduction in API response times by optimizing data retrieval and exchange functionality within a microservice-based RESTful API
- using the MERN Stack (MongoDB, Express.js, React.js, and Node.js).
- Developed a message-driven batch application using Spring Batch to handle payment requests through Message Queuing services, reducing data processing time by 50% and boosting system throughput. Enhanced API security through OAuth2 token-based authorization using Spring Security.
- Orchestrated the successful execution of React JS and Redux libraries for client-side rendering, leading to a 50% enhancement in UI performance and a 15% increase in customer satisfaction.
- Managed containerized applications using Docker and orchestrated services using Kubernetes, ensuring seamless CI/CD pipelines with Jenkins.
- Configured AWS infrastructure, including EC2 instances, IAM roles, Load Balancers, and monitored resources with CloudWatch to ensure high availability and scalability.
- Applied SAS for advanced data analysis and optimized database interactions to support strategic planning initiatives.
- Developed and maintained comprehensive reports using SQL Server Reporting Services (SSRS), optimizing SQL queries for performance and ensuring data accuracy, which facilitated strategic decision-making across multiple business units.
- Integrated SSRS with Java projects through web service endpoints and URL access methods, seamlessly incorporating reporting capabilities.

HCL Technology, Java Full Stack Developer | India

May 2019- July 2022

- Architected and implemented a scalable microservices architecture, utilizing Angular to build responsive and dynamic front-end components, and Java for efficient, maintainable server-side logic, driving a 30% improvement in overall system scalability.
- Styled HTML components with CSS to create consistent, visually appealing layouts, adhering to best practices of separation of concerns, and ensuring an optimal user experience across devices.
- Enhanced JavaScript performance by adopting modern ES6+ features like async/await, promises, and destructuring, enabling smooth, non-blocking interactions in Angular and improving overall front-end responsiveness.
- Integrated the Spring Framework, utilizing its powerful features like dependency injection and aspect-oriented programming (AOP) to streamline configuration management and enhance system modularity and maintainability.
- Developed RESTful web services using JAX-RS to enable seamless communication between distributed microservices, fostering efficient data exchange and integration within the application architecture.
- Implemented JMS (Java Message Service) to enable asynchronous communication across microservices, ensuring reliable, high-performance message delivery and enhancing the overall scalability of the system.
- Leveraged MongoDB for flexible and scalable data storage, utilizing its dynamic schema to store diverse data models and optimizing queries for high throughput, reliability, and performance in distributed environments.
- Configured and managed Docker Compose environments to streamline multi-container orchestration, ensuring efficient management of application dependencies (databases, microservices, APIs) across development, testing, and production workflows.
- Enhanced system reliability and resilience by leveraging Spring Boot in combination with Spring Cloud to build robust, cloud-native microservices, incorporating features like circuit breakers, service discovery, and load balancing for fault tolerance and high availability.
- Integrated Apache Struts to implement a structured Model-View-Controller (MVC) architecture, providing a clear separation of concerns and improving the maintainability and scalability of the web application.
- Secured communication channels by configuring HTTPS, ensuring encryption of data in transit, enhancing the overall security posture, and safeguarding sensitive user information.
- Automated API documentation by integrating Swagger with Spring Boot, enabling dynamic generation of comprehensive API documentation and making it easier for developers to understand and interact with the application's RESTful services.
- Conducted comprehensive integration tests using Jest and Enzyme to validate the seamless interaction of Angular components, ensuring a consistent and cohesive user interface across different platforms.

EDUCATIONS

Master of Science in Computer Science - Illinois Institute of technology, Chicago, IL

Bachelor of Science in Computer Science - GITAM, Hyderabad, India.
