SUMMARY

Finance professional with expertise in budgeting, forecasting, and variance analysis across multi-entity operations. Experienced in building driver-based financial models, automating reporting with SQL, Python, and Power BI, and delivering insights to support capital planning and executive decision-making. Background includes P&L ownership, OPEX modeling, and investment evaluation.

EXPERIENCE

Purityque Investments, New York, NY – Financial Planning Analyst

December 2024– Present

- Built 3–5-year integrated P&L, cash flow, and balance sheet models to support budgeting, forecasting, capital planning, and runway analysis.
- Evaluated capital structure options, quantifying impact on leverage, interest expense, and liquidity headroom.
- Ran SKU-level pricing, volume, and fixed-cost absorption scenarios to identify break-even points, margin recovery, and contribution uplift.
- Developed downside and recovery cases using DSCR and coverage metrics to prioritize which projects to fund, pause, or cancel.
- Designed AP/AR and inventory levers to optimize working capital, improve cash conversion, and extend runway while maintaining key supplier relationships.

Vertoz Inc., New York, NY - Financial Analyst

December 2023 – November 2024

- Owned full-cycle FP&A for 14 business units, delivering rolling forecasts, variance analysis, and scenario modeling that improved forecast accuracy by 25% and identified \$1.2M in annual cost saving.
- Built SQL-based cost models and Python automations to streamline monthly reporting, reduce close cycle time by 40%, and drive real-time margin visibility in Power BI dashboards.
- Developed scenario-based financial stress tests to measure resilience against economic downturns, interest rate hikes, and geopolitical risks.
- Partnered with business leads to evaluate OPEX levers, simulate headcount scenarios, and prepare board-level performance reviews using driver-based models.
- Conducted due diligence on acquisition targets, evaluating financial health, synergy potential, and investment risks. Compiled findings into investment memos for executive review.

Deloitte, India – Financial Analyst

December 2021 – November 2022

- Supported \$200M divestiture by building valuation and risk models and conducting sensitivity analysis aligned with IFRS reporting.
- Automated monthly reporting and KPI tracking via Alteryx and Power Query, reducing cycle time from 5 to 2 days and improving CFO-level data visibility.
- Supported finance transformation for a Fortune 500 client by mapping existing workflows and implementing streamlined planning templates across business units. Conducted cost-to-serve diagnostics contributing to repricing of 30+ SKUs and boosting profitability.
- Prepared carve-out financials and scenario models to support GAAP/IFRS transitions, enhancing audit readiness.
- Collaborated with cross-functional teams including Tax, Treasury, and Advisory to present insights to client CFOs and senior partners.

Technicolor, India – Financial Analyst

March 2020 – November 2021

- Managed monthly forecasting and 13-week rolling cash flow models, ensuring real-time liquidity visibility and treasury alignment.
- Built SAP/Power BI dashboards to track departmental spend and product margins, improving variance attribution and planning accuracy.
- Drove zero-based budgeting efforts and vendor contract restructuring, resulting in a 12% YoY departmental cost reduction.
- Performed IRR modeling for CapEx projects and secured executive buy-in for funding based on ROI thresholds.
- Enhanced working capital management by redesigning AP and AR tracking, cutting receivables cycle time by 11 days.

EDUCATION

Stevens Institute of Technology, Hoboken – Master of Science in Finance, Management Sciences & Quantitative Methods

December 2024

Jain University | Bachelor of Business Administration, Finance

May 2021
