PROFILE

Software Engineer with 2+ years of experience building scalable backend and full-stack systems using Python, React, and cloud-native tools (AWS, Docker, Kubernetes, Terraform). Proven impact in improving API reliability, reducing latency, and delivering AI-powered solutions that drive efficiency and scale.

WORK EXPERIENCE

Software Engineer, BussinessLab Aug 2021 – Jul 2023 | Mumbai, India

- Led full-stack development of a real-time SaaS platform for lead and sales tracking, enhancing Kafka-Datadog synchronization for a 75% latency reduction
- Owned infrastructure automation using Terraform, Jenkins for end-to-end deployment testing; embedded Jira into CI/CD, cutting manual steps and deployment time by 30%
- Built RESTful APIs with PostgreSQL, boosting data retrieval efficiency by 40% and streamlining customer and sales data flows
- Developed scalable Python microservices to automate lead qualification, saving 6+ hours/week and improving conversion rates by 15%
- Engineered a modular self-service platform with React and TypeScript to manage dynamic sales policies, reducing engineering support requests by 60% and accelerating deployment cycles by 40%

Software Engineer Intern, LendAPI Jun 2025 – Aug 2025 | Irvine, United States

- Spearheaded the development of 10+ features like real-time validation and dynamic forms using React and Django REST, driving a 30% boost in form completion
- Engineered microservices in FastAPI and Python, implementing HTTPX retries and backoff to elevate API reliability from 92% to 99.5%
- Orchestrated zero-downtime deployments and scaled services to handle 5× traffic using Docker, Kubernetes, and AWS
- Deployed an AI-powered assistant with fine-tuned GPT models, automating 60% of queries and enhancing response relevance by 35%
- Defined and refined product requirements by actively partnering with PMs and stakeholders to deliver high-impact solutions in agile sprints

Software Engineer Intern, Jiya Nutraherbs May 2021 – Jul 2021 | Valsad, India

- Developed backend services and APIs using Node.js and Express.js to support order processing, inventory management, and user workflows across 3+ client projects.
- Deployed applications on AWS EC2 with Docker, NGINX, and CloudWatch for scalability, load balancing, and basic performance monitoring
- Collaborated with cross-functional teams over 6+ Agile sprints to deliver 3+ features aligned with client requirements

Web Developer Intern, Nibodh May 2019 – Oct 2019 | Mumbai, India

- Built a mobile-friendly UI with React, added 10+ features, integrated REST APIs, and deployed on Netlify, boosting engagement for 5000+ users
- Integrated AWS services (S3, Lambda), cutting data retrieval time by 30% and reducing administrative workload by 25%

SKILLS

Languages: C++, Python, Go, Java, JavaScript, TypeScript, C#, SQL, Express.js

Frontend & UI: Vue.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, React.js

Backend: FastAPI, Flask, Node.js, Django REST, Express.js, REST APIs

DevOps & Cloud: AWS (EC2, S3, Lambda, DynamoDB), Docker, Kubernetes, Terraform, Jenkins

Certifications: AWS Certified Data Engineer – Associate, Databricks Generative AI Fundamentals

PROJECTS

GestureConnect, Tech Stack: React, WebRTC, PeerJS, MediaPipe, TensorFlow.js, JavaScript, CNN-LSTM Model [🔗](#)

- Engineered a TensorFlow-based sign language detection solution, achieving an accuracy rate exceeding 95% for recognizing complex gestures; contributed to accessibility initiatives that enhanced communication for users with hearing impairments

Open-Source Contribution Projects - activist [🔗](#)

- Contributed to projects using React, Django, and cloud services, improving UI components, fixing bugs, optimizing backend performance, and enhancing accessibility and typing for safer and maintainable database operations.

EDUCATION

Master of Science in Computer Science, California State University Fullerton, CA

Aug 2023 – May 2025

- Relevant Coursework:** Advanced Algorithms, Distributed Systems, Artificial Intelligence, Object Oriented programming
