

Vidya Velusamy

Python Developer

Plainsboro, New Jersey • +1-609-216-4656 • vidyavelusamy@gmail.com • <https://www.linkedin.com/in/vidya-velusamy-a9347b95/>

WORK EXPERIENCE

Infosys Ltd, New Jersey, United States

10/2022 – Present

Python Developer

- Built a smart agent for ad-hoc file transfer requests using NLP (SpaCy), automating end-to-end execution without human involvement.
- Developed and deployed Python-based file monitoring solutions to track transfers, detect failures, and trigger automated alerts.
- Built a smart agent for ad-hoc file transfer requests using NLP (SpaCy), automating end-to-end execution without human involvement.
- Created Python automation scripts to streamline file transfer workflows, reducing manual intervention.
- Integrated with Axway API to automate file transfer setups, improving reliability in data exchange processes.
- Automated error handling and recovery mechanisms, minimizing downtime and enhancing system reliability.
- Built real-time dashboards and APIs for visibility into processing status, errors, and performance metrics.
- Designed scalable backend workflows and integrated with PostgreSQL/MongoDB for transaction auditing and reporting.
- Designed and implemented a Flask-based SPA (API, backend, frontend) for real-time tracking and display of file failure details.
- Developed user-friendly interfaces with Flask routing, HTML, CSS, JavaScript, and jQuery.
- Improved operational efficiency by providing real-time visibility into failures, reducing troubleshooting time.
- Processed large-scale Parquet datasets in PySpark, leveraging columnar storage for optimized performance and reduced costs.
- Applied ETL processes and data scraping techniques to collect, clean, and integrate datasets for downstream analysis.
- Developed and deployed an NLP-based FAQ chatbot integrated with ServiceNow ticketing system, using TF-IDF for query understanding and response generation.
- Designed and trained models with Keras, Pandas, NumPy, and SQLAlchemy, integrating them into scalable web interfaces.
- Optimized MySQL database performance by modifying functions, queries, triggers, and stored procedures.
- Worked with ORM libraries (SQLAlchemy) for efficient database integration.
- Designed backend services using Python, Flask, and REST APIs within Agile frameworks.

Application Developer, Cognizant Technology Solutions, India

04/2008 – 10/2014

Programmer Analyst, Cognizant Technology Solutions, India

12/2007 – 03/2008

EDUCATION

Anna University

Bachelor of Engineering

Electronics & Communication Engineering (ECE)

India

07/2003 - 05/2007

OTHER

- Certified in Data Science (Rutgers University)

SKILLS

Web Technologies: HTML (Advanced), CSS (Experienced), Flask, Python, SQL, VBA, JavaScript, jQuery, AJAX, XML, GIT Hub, MySQL, Javascript, Machine Learning, API Development, Web Scraping **Techniques:** ETL Processes ,Data scraping techniques, Interactive visuals,Software Development, Amazon Web Services (AWS), ORM Libraries, Agile frameworks, OOPS **Tools :** Pandas, NumPy, SQLAlchemy (Python libraries),Matplotlib, Apache Spark / PySpark, Leaflet,Tableau.**Software :** T-SQL,MongoDB , PostgreSQL,Keras (Neural Network Framework),NET Framework (1.1, 2.0, 3.0, 3.5, 4.0, 4.5), ASP.NET (2.0, 3.5, 4.0), C#.NET, ADO.NET
