

VIHARI DAMARLA

Software Developer

Birmingham, AL • viharidamarla.jobs@gmail.com • + 12053362828 • [linkedin.com/in/viharidamarla7/](https://www.linkedin.com/in/viharidamarla7/)

SUMMARY

- **Software Developer with around 3 years** of experience in building scalable backend systems using **.NET Core**, **C#**, and **ASP.NET** Web API, enhancing performance and security for SaaS applications.
- Expertise in developing responsive front-end interfaces with **Angular**, **Blazor**, **React.js**, and **JavaScript**, driving user engagement and reducing page load times.
- Strong background in optimizing database performance with **SQL Server** and **PostgreSQL**, reducing query execution times and resource consumption.
- Skilled in integrating third-party services like payment gateways and geolocation **APIs** for seamless transaction processing and enhanced user experience.
- Proficient in automating **CI/CD** pipelines with **Azure DevOps** and **AWS**, increasing test coverage, reducing deployment errors, and streamlining release cycles.
- Led code reviews and ensured adherence to best practices (**SOLID**, **OWASP**), maintaining high-quality, secure, and maintainable code.
- Experienced in using **Docker** and **Kubernetes** for containerization and microservices orchestration, optimizing scalability and deployment efficiency.
- Demonstrated ability to troubleshoot and resolve critical production issues, including concurrency, memory leaks, and UI bugs, ensuring application stability.
- Collaborated in **Agile** teams to deliver iterative releases, continuously improving **SaaS** and enterprise applications to meet evolving business needs.

PROFESSIONAL EXPERIENCE

WIPRO

India

Project Engineer/ Software Developer

Jun 2021 - Dec 2022

- Developed scalable backend systems using **.NET Core** and **C#** for a **Supply Chain Management SaaS application**, focusing on modular code for business logic, authentication, and data processing.
- Built responsive front-end interfaces with **Angular**, **Blazor**, **JavaScript**, **HTML5**, and **CSS3**, improving user engagement by **35%** and reducing page load times by **25%** through close collaboration with UX/UI designers.
- Created and optimized **RESTful APIs** using **ASP.NET Web API**, incorporating **JWT token authentication** and middleware for logging, error handling, and rate limiting, ensuring secure interactions.
- Collaborated in **Agile/Scrum teams**, contributing to **8+ iterative releases** for a SaaS product, ensuring continuous improvements and timely delivery.
- Optimized **SQL Server performance** by redesigning queries, indexing strategies, and stored procedures, cutting query execution time by **35%** for high-transaction reporting modules.
- Automated **CRUD operations and database migrations** using **Entity Framework Core**, reducing manual development by **25%** while ensuring **ACID compliance**.
- Configured and maintained **CI/CD pipelines** in **Azure DevOps**, achieving **90% test coverage** and reducing deployment failures by **40%**, speeding up delivery cycles.
- Led code reviews via **Git** pull requests, enforcing **SOLID principles**, **OWASP security practices**, and **SonarQube scans** to maintain high code quality and security across **15+ repositories**.
- Integrated third-party **payment gateways** like **Razorpay** and **PayPal**, as well as **geolocation APIs**, ensuring smooth end-to-end transaction flows.
- Used **Docker** for containerization and **Kubernetes** for **microservices** orchestration, enhancing scalability, deployment efficiency, and environment consistency.
- Troubleshot production defects using tools like **Postman**, **SQL Profiler**, and **DevTools**, resolving **50+** critical concurrency issues, memory leaks, and UI bugs.

DELL TECHNOLOGIES

India

Software Developer

May 2020 - May 2021

- Developed and maintained enterprise-level software solutions using **.NET Core** and **ASP.NET**, focusing on scalable backend services for global applications, improving performance and reliability across business-critical platforms.
- Engineered **RESTful APIs** using **ASP.NET Core**, **Node.js**, and **.NET Framework**, enabling secure and efficient data exchange for global enterprise services across web and mobile platforms.
- Optimized backend data processing using **PostgreSQL** and **Entity Framework Core**, improving query performance by **35%** for high-transaction services and ensuring efficient data access in large-scale applications.
- Developed dynamic, responsive web applications using **React.js**, **Redux**, **HTML5**, **CSS3**, **JavaScript**, and **TypeScript**, enhancing user interactivity and engagement by **30%** while improving page load times and overall performance for an optimized user experience across platforms.
- Developed cloud-based services using **AWS EC2**, **S3**, and **RDS**, ensuring scalable and reliable infrastructure for enterprise software solutions, achieving **99.9% uptime** and reducing infrastructure costs by **30%**.
- Automated CI/CD pipelines using **AWS CodePipeline** and **Jenkins** to streamline the build, testing, and deployment processes for microservices, cutting deployment times by **40%** and reducing manual efforts.
- Collaborated in **Agile teams** to deliver iterative releases for enterprise applications, coordinating with cross-functional teams to meet evolving business needs and ensuring continuous delivery of value to customers.

- Integrated third-party solutions like **payment gateways** and **geolocation APIs** into applications, enhancing functionality and ensuring seamless end-to-end customer experiences for global users.
- Implemented automated testing frameworks like **JUnit**, **Selenium**, and **Postman** to ensure the reliability and performance of backend and frontend systems, resulting in improved code quality and a **20%** reduction in post-release bugs.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, C#, Java, Python
- **Front-End Development:** React.js, Angular, Vue.js, HTML5, CSS3, Bootstrap, Tailwind CSS, UI/UX Design, Figma, Performance Optimization
- **Back-End Development:** .NET Core, ASP.NET Web API, Spring Boot, Node.js, Express.js, RESTful API Development, GraphQL, JWT Authentication, OAuth 2.0, Entity Framework Core
- **Database & Cloud Technologies:** SQL Server, MySQL, PostgreSQL, AWS RDS, Azure DevOps, AWS (EC2, S3, Lambda, Fargate), Firebase, AWS DynamoDB, Azure SQL Database
- **DevOps & CI/CD:** Git, GitHub, GitLab, Jenkins, Azure DevOps, Docker, Kubernetes, CI/CD Pipeline Configuration, Automated Testing
- **Testing & Debugging:** Selenium, JUnit, Postman, SQL Profiler, SonarQube, Unit Testing, Integration Testing, Performance Optimization
- **Project Management & Collaboration:** Agile (Scrum/Kanban), JIRA, Trello, Workfront, Cross-functional Team Collaboration, Code Reviews
- **Security & Best Practices:** OWASP Security Practices, JWT, OAuth 2.0

CERTIFICATIONS

Cyber Security Analytics certificate

University of Alabama at Birmingham, 2024

- Completed a 15-credit hour graduate certificate program focused on **cyber security**, **machine learning**, and **data analytics**.
- Gained expertise in major security topics, including **network security**, applied cryptography, malware analysis, and user-centered security.
- Developed proficiency in machine learning techniques such as supervised and unsupervised learning, data preprocessing, and model evaluation.

PROJECTS

Multi-Tenant SaaS Application for E-Commerce

- Designed and developed a **multi-tenant SaaS e-commerce** platform using **.NET Core**, **C#**, and **ASP.NET Web API**, enabling multiple businesses to operate independently on a single codebase.
- Implemented **role-based access control (RBAC)** for tenants, administrators, and customers, ensuring secure and efficient access management.
- Integrated **Stripe** and **PayPal** payment gateways, enabling seamless transaction processing across multiple currencies and locations.
- Optimized **API response times by 40%** using caching (Redis) and query optimizations in **SQL Server**, enhancing system performance.
- Built a **dynamic pricing** engine utilizing geolocation APIs to adjust pricing based on user location and demand trends.
- Developed a **scalable microservices architecture** using **Docker** and **Kubernetes**, ensuring high availability and fault tolerance.
- Automated deployment pipelines with **Azure DevOps**, reducing release cycles by **50%** and ensuring smooth CI/CD workflows.
- Reduced frontend **page load times by 30%** through **React.js** performance optimizations such as lazy loading, memorization, and asynchronous API calls.

Real-Time Financial Dashboard & Expense Tracker

- Developed a **Real-Time Financial Dashboard & Expense Tracker** using **.NET Core**, **Angular**, **SQL Server**, and **Power BI**, enabling users to monitor expenses efficiently.
- Implemented **automated bank statement parsing** using **Azure Functions**, reducing manual data entry by **60%**.
- Designed a **predictive analytics model** leveraging **machine learning algorithms** to forecast spending trends and optimize budgeting.
- Integrated **Power BI for real-time data visualization**, enhancing financial insights and user engagement by **40%**.
- Optimized **API response times by 40%** using caching (Redis) and SQL query optimizations, ensuring smooth user experience.
- Developed a **multi-user role-based access system** (Admin, User) with **JWT authentication**, improving security and usability.
- Automated deployment using **Azure DevOps CI/CD pipelines**, reducing deployment failures by **50%**.
- Reduced frontend **page load times by 30%** through Angular optimizations such as **lazy loading and memorization**.

EDUCATION

UNIVERSITY OF ALABAMA AT BIRMINGHAM

Master of Science: Computer Science

Birmingham, AL

Jan - 2023 - Dec 2024

VELLORE INSTITUTE OF TECHNOLOGY

Bachelor of Science: Electronics and Communication Engineering

India

May 2017 - Apr 2021
