

VIJAY MUDURA

Full Stack Java Developer

203-887-1797 || vijaymudura95@gmail.com || [LinkedIn: Vijay Mudura](#)

SUMMARY:

Experienced **Full Stack Developer** at delivering high-quality software solutions over four years. Proficient in front-end and back-end development with expertise in Java, Spring, Spring boot, JavaScript, React.js, Angular.js, Node.js, Python, Django, and more.

EDUCATION:

Master of Science in Computer Science at University of Bridgeport

August 2023 - May 2025

Courses: Adv DB Design, Adv Scrip with Python, ML, Windows Inter Design.

CGPA: 3.35

B. Tech in Mechanical Engineering at CVR College of Engineering

August 2016 - June 2020

Programming Languages: C, C++, Java, Python.

TECHNICAL EXPERIENCE:

Frameworks: Spring, Spring Boot, Spring MVC, Spring Data, Hibernate.

Web Technologies: HTML5, CSS3, JavaScript, TypeScript, jQuery, Bootstrap, ReactJS, NGRX, Redux, AJAX, Angular, Node.js, Express.js, JSON

XML Technologies: XML, DTD, XQuery.

Databases: MySQL, MongoDB, DynamoDB, Oracle.

IDE's: Eclipse, IntelliJ, VS Code, NetBeans.

Testing Tools / Frameworks: Junit, Mockito, Jasmine, Postman.

Cloud Technologies: AWS, Azure, GCP

EXPERIENCE:

Java Full Stack Developer at DXC Technology

January 2022 - August 2023

Hyderabad | India

- Followed the Agile (Scrum) development methodology to ensure the delivery of high-quality work through monthly iterations.
- Extensively used Java 8 features such as Lambda Expressions and Functional Interfaces to enhance code readability and conciseness.
- Developed and deployed Spring Boot microservices with RESTful APIs, enhancing client-side data retrieval efficiency and ensuring alignment with Microservices Architecture principles."
- Integrated Spring Security for robust authentication and authorization, significantly strengthening application security and minimizing security vulnerabilities."
- Deployed microservices on AWS (EC2, S3, RDS, Lambda) for high availability and scalability.
- Designed and implemented modular Spring Boot Microservices, ensuring seamless integration and communication between services.
- Developed flexible and responsive web applications using Angular, JavaScript, HTML5, CSS3 and Bootstrap.
- Leveraged AWS to deploy the project on an EC2 instance, effectively utilizing Amazon Elastic Beanstalk to deploy microservices as RESTful Java web services.
- Partnered with the QA team to design and implement unit test cases using JUnit and Mockito, ensuring comprehensive test coverage and robust application performance.

Jr Java Developer at DXC Technology

July 2020 - December 2021

Hyderabad | India

- Optimized application performance by utilizing Core Java concepts including Collections, Multithreading, and Memory Management, improving execution efficiency by 30%.
- Optimized JavaScript templates for JSP pages, improving efficiency and reducing front-end development time by 25%.
- Designed and implemented custom and container-based JDBC connection pools, leading to a 40% improvement in database connectivity and query execution time.
- Created and managed relational databases using MySQL, optimizing SQL queries to enhance data retrieval speeds by 35%.
- Engineered responsive web designs using CSS Grid and Flexbox, improving cross-device compatibility and reducing bounce rates by 20%.
- Enhanced UI/UX with Angular and React, increasing user engagement by 25%, while ensuring application stability with comprehensive test cases using Jasmine and Karma.
- Integrated RESTful APIs, optimizing data exchange between front-end and back-end systems, reducing API response time by 40% and improving overall system efficiency.

PROJECTS:

Online-Voting: Created an online voting platform that allows users to cast their votes securely using a Personal Identification Number (PIN), eliminating the need to visit polling booths. This solution reduces costs and time for voters, while contributing to increased voter participation

Online Farming: It's an E-Commerce website mainly for Farmers where they can order fertilizers for their crops and there is a feature "Connect with experts" where they can clarify doubts and can get suggestions for their crops and one more feature called "Soil Testing" were they- can book slots for soil testing.
