**Product-Program Strategy Innovation | Generative AI | Governance | Data Science | Data Analytics | Healthcare Cloud
EHR FHIR, AI/ML | SAP/GCP/AWS Certified | Audit | Tax | Advisory | Interactive Data Visualization | FinTech | Block Chain**

Visionary and dynamic IT leader, Results-driven IT Product & Program Management professional, with a passion for leveraging cutting-edge technologies to drive business value in fast-paced, highly regulated industries with over 15 years of experience delivering innovative solutions **across healthcare, pharmaceuticals, consulting & financial services.**

Proven leader in AI, data engineering, and NOC operations, with hands-on expertise in Gen AI (LLMs), NLP, remote data capture, and enterprise-scale automation.

Deep experience architecting and operationalizing solutions using Sage, Stash, MongoDB, BMS Evosystem, SolarWinds, VSphere, Python, REST APIs, AWS Cloud, and custom microservices across regulated industries.

Expert in cross-functional team leadership, dashboard and application monitoring, incident response, Agile project management, and digital transformation.

Adept at driving innovation in prompt engineering, model evaluation, data governance, CI/CD, and stakeholder engagement to deliver scalable, compliant, and high-impact business outcomes.

AI/ML Product/Program Manager with over 15+ years of experience delivering healthcare-focused AI/ML solutions, driving product innovation from concept through deployment in clinical and operational settings.

Adopts **a transformational leadership style**, inspiring and motivating teams to **embrace change, innovate, and deliver** exceptional results **in complex result oriented project environments**. Known for fostering a collaborative and inclusive team environment, empowering team members to take ownership and drive results.

Proven track record of success in delivering innovative solutions and driving digital transformations at various **State Clients, Hospital Systems, Mayo Clinic, Walgreens, Abbott, KPMG, Google, and Blue Cross**. Skilled in **Agile methodologies**, serving as a **Program Manager, Product Owner**, and coordinating **offshore teams** to optimize delivery. Adept at building and motivating high-performance teams, fostering stakeholder collaboration, and aligning IT initiatives with **organizational goals**.

Spearheaded healthcare modernization initiatives, transitioning to Salesforce, Snowflake, AWS, and ABACUS platforms. Implemented **regulatory compliance measures, built healthcare data analytics capabilities, and led data transformation** through AI integration.

Implemented and **fine-tuned Large Language Models and advanced AI** to enhance product NLP capabilities. Collaborated cross-functionally on GenAI solutions to reduce data processing. Delivered design, development and enhancement of key healthcare data processes.

Extensive background in spearheading complex projects, **from application development to, platform modernization using AWS, GCP, AZURE, to Snowflake implementations to, Salesforce upgrades to ServiceNow implementations to, ERP implementations to EHR implementations, Epic, Epic Payor Portal and Cerner to Cloud migrations utilizing AWS, Azure, and Google clouds.**

Experienced in risk management, proactively identifying, and mitigating potential issues to ensure project success. Proficient in leveraging advanced concepts such as GDPR, HIPAA, FHIR, AI/ML, blockchain, IoT, and RPA to drive process improvements and enhance operational efficiency.

Holds a comprehensive and diverse set of certifications, including Certified Scrum Master (CSM), Certified Product Owner (CSPO), SAFe Agilist, Lean Six Sigma Black Belt, PRINCE2 Practitioner, AWS Certified Solutions Architect, AWS Certified DevOps Engineer, Google Cloud Certified Professional Cloud Architect, and SAP Certified Associate. Adept at both business and technical expertise with an MBA and PMP certification, demonstrating a strong business acumen and commitment to delivering quality industry specific solutions on time and within budget.

- Strong IT foundation and experience; progressively from hands-on technical to leadership roles.
- Skillful problem solving with the aptitude to identify strategic solutions to business problems with enterprise-wide implications.
- A blend of consulting and corporate experience in businesses of varying sizes.
- Sound work ethic with a sense of duty, responsibility, and ownership; utilizing a collaborative approach.
- Leads high-performance teams by mentoring, empowerment, and accountability.
- Ability to build strong relationships with IT and Business Leadership. Manage communication with key stakeholders and steering committees.

Education

MBA. Lake Forest Graduate School of Management.

BS. University College of Engineering Osmania (UCE) India.

DePaul University, Diploma in CS

Certifications:

SAFE 6.0 (Scaled Agile)	Google Cloud Professional ML Engineer Certification
Lean Six Sigma Black Belt (ICBB)	Google Cloud Certified (GCP) - Professional Architect
PRINCE2 Practitioner	AWS Certified Solutions Architect Professional
PMP/PMI Certified	AWS Certified DevOps Engineer-Professional
Certified Scrum Master	Certified SQL Server DBA
Certified Product Owner	Certified .Net Architect
SAP Certified Associate - SAP Activate Project Manager	SAP Certified Application Associate - SAP HANA 2.0

Key Skills:

Vikar Mohammad	312-934-8744	mohammad@idoctory.com
Interactive Data Visualization-Machine Learning	Generative AI	
Waterfall/Agile/DevOps	Stakeholder Relationship Management	
Data Analytics-ERP, BI, CRM	Global & Offshore Team Coordination	
Project/Program Management	Negotiation-Vendor Management	
Scrum, Kanban, Tdd & Xp	Data center Migration and Consolidation	
Risk Management	Business Process Reengineering/Robotic Process Automation	
Budget & Financial Management	IT Strategy & Transformation	
Global Portfolio & Program Audit Management	MMIS-Medicaid, Medicare	

Professional Career History

Consulting Services Corp | 2018 – Present

Blue Cross Blue Shield/State Of Washington - Technical Program Manager Apr 2023- Present

Healthcare Platform Modernization & Data Management Leadership

- Led critical infrastructure upgrades including CAE and Facets, coordinating UAT, defect resolution, and cutover planning while managing multiple stakeholders and environments
- Spearheaded the Carelon Cardiology implementation, aligning API requirements and managing implementation across call center and API integrations
- Orchestrated comprehensive Machine-Readable File (MRF) program execution including bundle runs, testing, and optimization with reduced data sets
- Directed enterprise-wide data management initiatives including:
- Designed and implemented Change Data Capture (CDC) and data integration solutions for healthcare data ecosystems
- Developed Snowflake-based analytics platform with data validation frameworks and automation
- Established data dictionary and governance standards for partner integrations (Delta Dental, ASH)
- Implemented sandbox environments with appropriate security permissions for development teams

Blue Cross Blue Shield - Technical Program Manager – Atlassian ITSM & NOC Network Infrastructure Enhancement

- Collaborated with cross-functional teams to deliver seamless user experiences, enhance service delivery, and ensure operational excellence across the Atlassian suite and enterprise ITSM environments.
- ITSM Program Manager with hands-on expertise in orchestrating large-scale Data Center (DC) to cloud migrations for JIRA Service Management and ServiceNow, leveraging Atlassian Guard, OpsGenie, Terraform, and Sailpoint for robust automation and integration.
- Led end-to-end IAM (Identity and Access Management) initiatives, implementing SSO, SCIM provisioning, and RBAC for secure, scalable user lifecycle management.
- Drove REST API integrations, workflow automation, and CI/CD pipelines to streamline incident, problem, and change management processes.
- Championed security best practices, audit, and compliance readiness, optimizing custom fields, reporting, and cross-platform data migration.
- Executed comprehensive ITSM transformation through implementation of structured incident, problem, and change management processes:
- Designed and implemented improved ticket escalation workflows and integrated monitoring tools

- Established Known Error Database (KEDB) for tracking resolutions and automating incident response
- Created standardized problem management SOPs with post-mortem and root cause analysis capabilities
- Developed comprehensive documentation and conducted lunch & learn sessions for Tier 1 and Tier 2 support
- Led cloud migration initiatives from data center to cloud-based infrastructure:
- Successfully completed Confluence and Jira test migrations with data validation
- Designed and implemented unified custom portal for improved user experience
- Established SSO integration with Azure AD for enhanced security and access management
- Created detailed migration approach documentation and runbooks with contingency plans
- Implemented advanced monitoring solutions:
- Developed custom NOC(Network Operations Console) dashboards with application-specific widgets and metrics
- NOC Operations Lead with deep expertise in monitoring, incident response, and automation across a diverse application landscape.
- Drove the design and continuous improvement of NOC dashboards, leveraging SolarWinds, VSphere, ECM Pro, Cabos, Rate Manager, Caravans, Xamarin, and custom applications for real-time health and performance monitoring.
- Implemented standardized playbooks, alerting, and tagging strategies using custom properties and facets to streamline root cause analysis and reduce false positives.
- Led onboarding and training for NOC staff, integrating best practices for server, application, and SQL health monitoring. Championed the use of performance metrics (CPU, memory, storage), automated alerting, and dashboard visualization to optimize operational efficiency.
- Collaborated with engineering and application teams to ensure seamless access, robust monitoring, and rapid incident resolution. Delivered operational excellence through process documentation, runbooks, and continuous feedback loops, ensuring NOC support for all critical business applications.
- Created standardized monitoring templates for healthcare applications
- Reduced alert noise through targeted threshold configuration and alert management
- Established how-to guides and knowledge transfer sessions for NOC team enablement

Blue Cross Blue Shield - Technical Program Manager - Advanced Research Data Integration

- Architected and implemented the comprehensive Research Data Catalog (RDC) platform:
- Designed scalable data architecture integrating genomics data (SDH, TRD Hub), biospecimen data (SDH, TRD, Azenta), and exploratory biomarker data (Sage)
- Created unified metadata model with standardized ETL processes ensuring data consistency across disparate sources
- Developed automated data validation pipelines with quality metrics and compliance verification
- Implemented phased rollout strategy (Alpha → Beta → Production) with rigorous testing at each stage
- Established robust data governance and security framework:
- Designed role-based access control system ensuring appropriate data access while maintaining compliance
- Implemented comprehensive audit trails for all data interactions meeting regulatory requirements
- Created data masking and protection measures for sensitive PHI/PII information
- Developed unified access management process across multiple data domains
- Led implementation of advanced data storage solutions:

- Optimized S3 storage architecture for healthcare research data with appropriate encryption
- Integrated Stash storage systems with appropriate data lake compatibility
- Created consistent data model adaptations across storage platforms
- Implemented metadata registration and access control mechanisms
- Developed KPIs and success metrics for research data initiatives:
- Created data integration success metrics including ingestion rates and validation pass rates
- Established research impact measurements for time-to-insight and cross-domain utilization
- Implemented system response time monitoring and optimization
- Created dashboards tracking technical and business performance metrics

Blue Cross Blue Shield - Technical Program Manager - AI Implementation and Strategy

- AI & Data Transformation Leader with hands-on expertise in architecting and operationalizing Gen AI (Generative AI), NLP (Natural Language Processing), and RDC (Remote Data Capture) solutions for enterprise-scale digital transformation.
- Led cross-functional teams in deploying and integrating advanced LLMs (Large Language Models), agentic frameworks, knowledge extraction pipelines, and intelligent automation for data cataloging, unstructured data mining, and real-time analytics.
- Delivered end-to-end solutions leveraging Sage, Stash, MongoDB, BMS Evosystem, Python, REST APIs, JIRA, Microsoft Project, AWS Cloud, and custom microservices.
- Drove implementation of prompt engineering, model evaluation frameworks, multi-modal data processing, and data governance for compliance, scalability, and operational excellence.
- Applied Agile methodologies, CI/CD, risk management, and stakeholder engagement to deliver high-impact projects at across pharma, biotech, and investment banking domains.
- Championed innovation in biomarker analytics, chatbots, data population engines, dashboard visualization, and automation of document processing, ensuring seamless integration with cloud-native and on-premises systems.
- Orchestrated robust project management, budgeting, and quality control using Microsoft Project, JIRA, and financial planning tools. Fostered a culture of continuous improvement, technical documentation, and transparent communication to drive business value and digital innovation.
- AI & Data Solutions Lead with hands-on expertise in architecting and operationalizing Gen AI (Generative AI), NLP (Natural Language Processing), and RDC (Remote Data Capture) solutions.
- Led cross-functional teams in deploying and integrating advanced LLMs (Large Language Models), knowledge extraction pipelines, and agentic frameworks for enterprise-scale data cataloging, unstructured data mining, and intelligent automation.
- Drove end-to-end delivery of chatbots, data population engines, and biomarker analytics using platforms such as Sage, Stash, MongoDB, BMS Evosystem, and custom Python/REST API microservices.
- Orchestrated robust data governance, model evaluation frameworks, and continuous improvement cycles for NLP and Gen AI applications, ensuring compliance, scalability, and operational excellence.
- Collaborated with stakeholders to implement real-time data pipelines, automate document processing, and enable seamless integration with cloud-native and on-premises systems.
- Championed innovation in LLM evaluation, prompt engineering, and multi-modal data processing, delivering actionable insights and business value across diverse domains.
- Led cross-functional teams in developing and launching AI-powered healthcare solutions, orchestrating the implementation of NLP and LLM-enabled clinical data discovery platforms that automated utilization management workflows,

resulting in 40% improvement in case processing efficiency and 45% reduction in review times while maintaining 99.9% accuracy rate

- Spearheaded end-to-end product development of ML-based medical coding automation system, establishing comprehensive SDLC processes and governance frameworks that reduced manual coding efforts by 30%, while successfully managing partnerships with external healthcare vendors and internal stakeholders across 5 major product releases
- Architected strategic roadmaps for GenAI and NER implementations in case management systems, mentoring technical teams while driving integration of cloud-based solutions that improved clinical data extraction by 50%, enhanced payor-provider communication workflows by 35%, and achieved ROI of \$2.5M annually through automated utilization management
- Directed technical workshops identifying 60+ high-value healthcare use cases for AI implementation
- Created comprehensive AI roadmap with phased implementation strategy and resource allocation
- Established partnership evaluation criteria and engagement strategy for key AI collaborations
- Developed budget framework for enterprise AI solutions (\$8M-12M/3-5 years)
- Pioneered advanced LLM implementation for healthcare applications:
- Designed and implemented company-wide vector database with healthcare-specific knowledge incorporation
- Established RAG/RIG architecture optimized for healthcare data with semantic search capabilities
- Created domain-specific models for drug discovery and genomic research applications
- Implemented multi-agent frameworks leveraging AWS Bedrock, Lang Chain/Graph orchestration
- Built comprehensive AI testing and validation framework:
- Developed testing methodology utilizing Promptfoo (60+ metrics) for model evaluation
- Implemented Optuna optimization for parameter tuning and performance enhancement
- Created Rise AI visualization tools for performance monitoring and analysis
- Established validation protocols for scientific use cases ensuring accuracy and reliability
- Developed advanced reasoning capabilities for healthcare AI applications:
- Implemented inductive reasoning patterns for scientific hypothesis generation
- Created chain of thought processing for complex healthcare data analysis
- Managed AWS infrastructure implementation including Bedrock, Lambda, and S3 integration
- Optimized development environments including Domino, SageMaker, and Super pod access
- Created scalable architecture supporting growing AI workloads
- Coordinated architecture reviews, code reviews, security, and design discussions to uphold quality standards for consent management systems.
- Defined and executed AI/ML product strategies aligned with healthcare industry needs, ensuring alignment with clinical workflows, regulatory frameworks, and patient care objectives.
- Spearheaded AI/ML use case identification and prioritization, working with clinicians and healthcare administrators to translate complex clinical needs into actionable product roadmaps.
- Managed end-to-end AI/ML product lifecycle, from ideation, market research, and requirements gathering to development, launch, monitoring, and iterative improvements.
- Led cross-functional product teams, collaborating with data scientists, engineers, clinicians, and business stakeholders to ensure successful AI/ML product delivery.

- Defined detailed product requirements, user stories, and acceptance criteria for AI-powered solutions, ensuring seamless integration into clinical and administrative workflows.
- Developed AI/ML product roadmaps grounded in business case analysis, ROI projections, and market research, enabling stakeholder buy-in and executive support.
- Oversaw AI/ML model deployment and monitoring, ensuring continuous evaluation through KPIs, online/offline metrics, and human-in-the-loop feedback mechanisms.
- Championed clinical workflow integration of AI products, ensuring seamless adoption by physicians, nurses, and healthcare staff to enhance care delivery and operational efficiency.
- Ensured strict adherence to regulatory compliance, healthcare data privacy (HIPAA), and ethical AI practices, mitigating risks in AI-powered healthcare deployments.
- Facilitated direct collaboration with hospital clinical staff (physicians, nurses, LPNs), translating their insights into effective AI/ML solutions and improving user adoption rates.
- Applied strong knowledge of interoperability standards (HL7, Cloverleaf, Mirth, Rhapsody) to ensure seamless data integration and interoperability in AI-driven healthcare products.
- Drove stakeholder engagement and alignment, acting as the primary liaison between technical teams, healthcare professionals, and executive leadership.
- Developed robust AI/ML product performance monitoring frameworks, defining key KPIs to assess clinical impact, operational improvement, and patient care outcomes.
- Led cross-functional teams in Agile environments, ensuring synchronized delivery of AI/ML features while balancing technical feasibility with healthcare domain needs.
- Designed and implemented AI/ML evaluation strategies, including human-in-the-loop assessments and iterative model tuning based on clinical feedback.
- Advocated for responsible AI deployment in healthcare, promoting transparency, fairness, and ethical considerations in AI/ML solutions across the product lifecycle.
- Guided continuous product optimization using real-world usage analytics, AI model performance metrics, and clinician feedback to enhance product efficacy and adoption.
- Led product backlog grooming and feature prioritization using data-driven methodologies, ensuring delivery of high-impact AI/ML features aligned with clinical goals.
- Conducted thorough market research and voice of customer (VOC) analysis, directly interfacing with clinicians, administrators, and healthcare executives.
- Collaborated with data engineering and clinical informatics teams on healthcare data interoperability projects, leveraging HL7/FHIR standards.
- Developed AI/ML products supporting clinical decision support systems (CDSS), enhancing diagnostic accuracy and treatment planning for care providers.
- Defined business cases and ROI models for AI/ML investments, presenting to executive leadership to secure funding and resource allocation.
- Ensured product compliance with data privacy regulations, conducting risk assessments and implementing controls for protected health information (PHI).

- Facilitated product performance reviews with stakeholders, leveraging usage analytics, AI model outcomes, and operational KPIs for continuous improvement.
- Coordinated AI/ML product delivery in Agile Scrum environments, leading sprint planning, backlog refinement, and release management.
- Advocated for ethical AI governance frameworks in product design, focusing on bias mitigation, explainability, and user trust in AI-powered systems.
- Built and maintained strong cross-functional relationships with engineering, data science, and clinical operations teams, fostering a culture of collaboration and innovation.
- Designed AI/ML solutions that improved operational efficiencies and patient care workflows, reducing clinical documentation time and enhancing the patient experience.
- Championed the adoption of AI/ML innovations in healthcare delivery, positioning organizations at the forefront of AI-driven transformation initiatives in clinical environments.

Blue Cross Blue Shield - Technical Program Manager - Remote Process Automation

- Successfully led the implementation of a comprehensive healthcare modernization initiative, overseeing the transition from legacy systems to state-of-the-art platforms like **Salesforce, Snowflake, AWS, ABACUS** resulting in streamlined operations and enhanced customer experience.
- Led the implementation of Palantir Foundry's ontology-driven data integration platform across healthcare enterprises, resulting in 60% faster data discovery and analytics capabilities while ensuring HIPAA compliance and standardizing clinical data from multiple EHR systems through FHIR integration
- Led cross-functional teams in developing AI-powered healthcare solutions using Palantir AIP, orchestrating the implementation of foundational models that automated clinical documentation workflows and improved diagnostic accuracy by 45%, while maintaining regulatory compliance and reducing manual review times by 65%
- Spearheaded enterprise-wide data transformation initiatives leveraging Palantir's Code Workbooks and AI-powered analytics, establishing comprehensive data governance frameworks that reduced data preparation time by 40% and enabled real-time healthcare analytics across 15+ disparate data sources, resulting in \$3.5M annual operational savings
- Led the team to implement Data Marts and consume Bronze, Silver and Gold data abstractions/Medallions and domain specific data marts (Risk Adjustment, Stars, Hedis, Interoperability, Payment Integrity) for analytics utilizing groupers and aggregates.
- Led multiple technical workstreams and ITSM initiatives, orchestrating the implementation of LLM-enabled data discovery solutions and ServiceNow platform optimizations, resulting in 40% improvement in research efficiency and 45% reduction in incident resolution time while maintaining 99.9% change success rate
- Established and governed comprehensive SDLC and ITIL processes across cross-functional teams, leading the Change Advisory Board (CAB) and problem management workflows that reduced development cycles by 30% and achieved zero critical incidents across 200+ monthly changes
- Developed strategic roadmaps for cloud-based solutions and ITSM maturity, mentoring 8 service management professionals while driving technical integration projects that improved data retrieval times by 50% and enhanced overall service delivery metrics by 35%

- Implemented best practices in regulatory compliance measures to ensure adherence to healthcare laws and regulations, mitigating risks and liabilities, data hardening in **building and driving healthcare data-analytics**.
- Interacted with Accounting, Underwriting, HCE (Members & Claims), RXClaims, COB(Coordination of Benefits) Eligibility & Claims, & Facets teams to build a comprehensive data ecosystem.
- Led a **comprehensive data-transformation initiative**, overseeing the integration of AI-driven technologies to enhance data processing, ELT, ETL, extraction and analytics.
- Led **strategic initiatives in implementing and fine-tuning Large-Language-Models (LLM's)** and other **advanced AI models**, enhancing the **product capabilities** in natural language processing, understanding and generation.
- Collaborated with cross-functional teams to implement generative artificial intelligence (GenAI) solutions, resulting in a 30% reduction in data-processing.
- Responsible for the **delivery of design, development and enhancement** of Plan Member, Claims, Patient, Practitioner, Point of Care Locations, Organization, Encounters, ICD Codes, Diagnosis, Procedures, CPTs, HCPCS, DRGs, Allergies, Insurances, Patient Financial Transaction processes.
- **Manages key project portfolios** in Infrastructure Buildout(**AWS, Snowflake**), EDP Build(**DI & BI**) **Salesforce**(Quote to Card, Risk Adjustment, STARS/HEDIS, Prior Auth, Auto Adjudication, Facets), **Epic Payor Portal**, Abacus that align to several business areas like Broker Management, Employer Management, Renewals, Network Management, Automated Claims Processing, Consumer Directed Health (CDH, FSA, HRA, HSA), Service (Contact Desktop & Claims), Analytics and Information Management, Compliance, Legal, Human Resources, Finance, Network, and Care Management.
- From **planning to execution and delivery** of these initiatives in the form of several big and small **programs and projects** is the key responsibility of this office.
- Oversee enterprise **Product Management office**, including collaborating and aligning all key business project deliverables orchestrated to deploy to production regularly. **Managing communication and risks** around all production deployments.
- **Coached and mentored** the team to be proficient in managing financials, resource management, communication, status reporting, and addressing risks/issues.
- **Managing expectations of sponsors and stakeholders** by facilitating and leading project-related governance committees.
- Established a common set of **tools** that can be utilized to better manage these portfolios and releases. Introduction and transformation of project & program execution utilizing best practices like **Agile, Waterfall, and DevOps methodology**.
- Hands-on experience in **HIPPA, Facets, FHIR, HL7**. Responsible for facilitating delivery of architectural hubs for **PQRS (Physician Quality Reporting System)** reporting, Stars and Hedis needs.
- Environment consists of .Net, C#, **Salesforce Integration, Snowflake, AWS, Enterprise Data Platform, AI/ML Implementation, Data Governance, Disaster Recovery and Business Continuity Solution design**.
- Deep functional and technical knowledge of the **ServiceNow platform** as well as experience
- Spearheaded **migration initiatives** to transition legacy consent platforms and workflows to **modern cloud-based architectures**, reducing costs by 30%.

Google - Apr 2022 – Apr 2023

Google PSO - Technical Program Manager - Client: AT&T - CC AI Reporting Remote Process Automation

- Lead **Program Manager Telecom Center of Excellence** team in Google Cloud, with a mission to enable AT&T Communications Service
- Providers (CSPs) in their journey to **realizing the value from AI, 5G and Edge use cases**. Hands-on experience with tools including Jira, MS Project, Visio, **Smartsheet, Buganizer**, AI Dashboard reporting.
- Lead strategic customer program for **CCAI**, spanning across pre-sales, product, and delivery. Partnering with AT&T to deliver customer self-service and assist their live agents in delighting their customers using Google Contact Center AI.
- Lead the planning and execution of projects in the **Contact Center AI (CC AI) product space**
- Develop **best practices and repeatable frameworks** to scale projects expertise and enhance implementation readiness
- Develop narratives **to advance Google Cloud's** AI strategy and operations agenda

Google PSO - Technical Program Manager - HDE Implementation Client: Mayo Clinic & Health Care Corporation of America

- Worked **cross-functionally** to plan & support **Google Cloud's Healthcare Industry Solutions delivery** for Google customers.
- Led **large-scale customer projects** which designed, architected, and provided implementation support for hosting customers' healthcare data in **standardized healthcare formats on Google Cloud**, further enabling **clinical, reporting, decision support, and AI/ML use cases**. Experience with Google systems such as **Buganizer automation, sheets, PLX, or Data Studio dashboards**. Experience with the **Google Ariane launch process**.
- Led requirement gathering sessions and managed product requirements by performing detailed functional analysis for AI/ML-powered clinical tools, ensuring business needs were clearly translated into product features.
- Collaborated with cross-functional teams on AI/ML healthcare product roadmap planning, gathering insights from physicians and clinical staff to align AI initiatives with real-world clinical practices.
- Coordinated with stakeholders like nurses and physicians during design and pilot phases of AI-driven healthcare applications, gathering feedback to refine workflows and system usability.
- Defined user stories and acceptance criteria for AI-powered clinical decision support features, ensuring seamless integration into existing hospital EHR systems and workflows.
- Worked on AI/ML project lifecycle management, participating from initial discovery sessions to post-launch analysis, assisting in tracking product performance and identifying areas of improvements.
- Supported the product owner and technical teams in defining AI/ML product functionalities, bridging the gap between healthcare business requirements and technical design.
- Partnered with clinical informaticists and nursing staff to capture key operational challenges and proposed AI-backed solutions aimed at improving workflow efficiencies and patient care.
- Assisted in reviewing healthcare interoperability standards like HL7 and FHIR during system integration efforts, helping technical teams understand clinical data exchange requirements.
- Participated in regulatory compliance discussions, supporting documentation for data privacy assessments and ensuring healthcare AI solutions adhered to HIPAA standards.
- Facilitated backlog refinement sessions and feature prioritization meetings, working with product managers and technical teams to ensure timely delivery of high-impact product features.
- Conducted market research and analyzed competitive healthcare AI products, bringing insights into internal discussions on product enhancements and market positioning.

- Wrote business requirement documents (BRDs) and functional specifications, collaborating with technical leads and QA teams to validate AI product features and integration points.
- Monitored AI model outcomes post-deployment, gathering feedback from end-users and working with data scientists on continuous improvement opportunities.
- Documented data flow diagrams and system interaction models, ensuring transparency between business processes, AI models, and clinical applications.
- Participated in Agile ceremonies like sprint planning, reviews, and retrospectives, helping align project activities with business priorities and clinical user expectations.
- Coordinated with cross-functional project teams to identify operational risks, ensuring AI-enabled solutions met quality benchmarks and clinical acceptance standards.
- Engaged in user acceptance testing (UAT) for AI-powered healthcare applications, capturing detailed test results and logging issues for resolution before production release.
- Assisted in defining KPIs for AI product adoption and usage, preparing reports for stakeholders to highlight areas of success and improvement post-implementation.
- Worked with various **e-Clinical Technologies** with a specific focus on **eCOA**, client relationship building, **global strategic client management**, **negotiation**, and **coaching/mentorship**.
- Leads pivotal initiatives in the **Software as Medical Device (SaMD) & Regulatory domain** at Mayo Clinic's Center for Digital Health, demonstrating proficiency in **Electronic Health Record (EHR) Systems** such as Meditech, Epic, Cerner, and a deep understanding of **data interoperability** utilizing standards like **FHIR (Fast Healthcare Interoperability Resources)** and **HL7**.
- Provide guidance to **GSI partners** on the delivery of the project using **HDE - data ingestion and mapping**.
- **Interoperability champion** with deep experience creating the "**Clinical Data Repository**" using **FHIR-based healthcare APIs**.
- Researched, defined, and developed a **Go to Market strategy** for additional FHIR-based use cases, including applications of **HL7 DaVinci, Sequoia Project, TEFCA, CARIN, USCDI, Payer to Payer, Provider Directory, Patient Access API, Longitudinal Patient Record, and Advanced Analytic capabilities**.
- **Product Development experience** using **Cloud Services, data foundation, and intelligence net, APIs, and AI/ML technologies**.
- Worked as a consultant for a partner team in identifying fixes/new feature requests needed to support project delivery.
- Collaborate with **Google PSO delivery team** to track **GCP Industry Solutions Product issues** and escalate as necessary.
- Skilled in various **cloud strategies** like **Snowflake/Google cloud/Big Query, Hadoop, ETL/ELT architecture and building data pipelines**.
- **Cloud Consultant** responsible for working with customer **Technical Leads, Executives, and Partners** to manage and deliver successful implementations of cloud solutions, becoming an advisor to decision-makers throughout training and engagement.
- Experience with **ServiceNow ITSM modules (IM, CM, PM, KM, Service Catalog and CMDB), ITOM (Event Mgmt. & Discovery), IT Asset Management and HR Service Delivery**. Experience with **ServiceNow integrations, including REST and SOAP APIs**

KPMG LLP - Audit Technology & Advisory (Contract) – Technical Program Manager Sep 2021 – May 2023

- Led **cross-functional teams** toward the **successful deliveries of multiple projects** to KPMG (one of the Big 4 firms).
- Led end-to-end Go-To-Market strategy for subscription-based products, orchestrating SAP BRIM implementation that optimized entitlement management and reduced revenue leakage by 35%, while leveraging SAP HANA for real-time analytics to drive data-driven decision making across subscription lifecycles
- Spearheaded cross-functional agile teams in implementing SURF contract management solutions, establishing automated workflows in SAP that reduced contract processing time by 60% and improved renewal rates by 25%, while maintaining compliance with revenue recognition standards
- Developed comprehensive business requirements and product roadmaps for subscription platforms using SAP BRIM and HANA capabilities, resulting in 40% improvement in entitlement accuracy and 30% reduction in billing disputes, while serving as Product Owner in agile ceremonies across 6 scrum teams
- Responsible for **RPA, program management, ePMO, Budget Forecasting, Planning & Management, Scheduling, and approvals** in a mix of **agile and waterfall** for various **ERP workstreams** of various sizes and complexity.
- Provides **counsel to the firm leadership** to identify, prioritize and scope **cross-functional initiatives** that will optimize organizational capability and drive **strategic growth**.
- **Oversaw a team of 94 staff (9 Team Leads and 31 Consultants)** as a direct report to the Senior Directors of Audit Technology. Key responsibilities included **Program Management, Client Relationship Management, Status reporting** to Director and VP level Leadership, Overall **program health monitoring**, and **Budget management**.
- Effectively implemented the **Agile Scrum Process** from scratch in multiple projects to excellent conclusions.
- Demonstrated effective **risk management skills** by taking over and delivering many **high-risk projects**.
- **Agile SCRUM -- End-to-end SDLC process management**.
- Analyze, plan, and develop **requirements and standards** in reference to scheduled projects. Proficient in technology tools (Word, PowerPoint, Excel, Outlook and Microsoft Project/Clarizen, Azure, Validis, Alteryx, Informatica, Klara, Project Management tools)
- Knowledge of **project management principles** including **budgeting, forecasting and resource management**
- Assign and oversee the **daily tasks of technical personnel** while ensuring all subordinates are actively working toward established milestones.
- Hold regular **technical team meetings** to determine progress and address any questions or challenges regarding projects.
- Lead research and report to evaluate hardware and software technology options and weigh the **cost/benefit analysis** when making large technology purchases on behalf of the firm.

Walgreens Boots Alliance (Contract) - Program Manager, Omni-Channel Product Development Mar 2020 – Sep 2021

- **Digital Program Manager** for a large **marketing program** focused on developing **personalized omnichannel experiences** for our customers.
- Led teams through a complex **IT Governance process** to secure over **\$50M in program funding**.
- Program consists of **20+ individual projects** with **cross-functional teams** including **Product, UX, Engineering, Data Science, DevOps, Cloud Engineering, Azure, and QA**

- One of the key projects involved developing a **personalization platform in Azure** used to provide **real-time offer and product recommendations** to customers.
- Has built and led **effective and efficient operations** across multiple locations including internationally. Experienced in building strong **leadership and operational teams** to take on critical business challenges and needs. Proven ability to operate **infrastructure and operations** and drive critical change.
- Led the incorporation of the **WBA Information Security Program and Services** for the newest division of Walgreens Boot Alliance.
- Integrated **AEM with Adobe Search & Promote reporting and various third-party systems**. Experience with **CI/CD platform and monitoring tools**, for example, Jenkins, Nagios, Dynatrace, or relevant.
- Focused on **Security in the care management and Clinical trials space**. Partnering with peers across partner organizations.
- Responsible for managing two teams that perform **Information Security Assurance work** directed at Walgreen's international and domestic Third-Party providers.
- Deliver quarterly and annual guidance on the **security posture of Third-Party providers**. Continue reevaluating our approach to **Information Security Assurance** in the Third-Party Security Assurance assessment program.
- Leader of motivated individuals that deliver on our **Third-Party security assessment program**.
- Provide **Security guidance and support** to our Legal and Privacy teams. Support in-house compliance for **PCI and HIPAA** with a focus on Third Party Security.

Abbott Laboratories (Contract) - Engineering Manager - Apr 2020 –Mar 2021

- As a digital **Program/Product Manager**, worked with the XP team (**developers and UX designers**) and stakeholders to deliver an industry-leading **digital solution** for the consumer to take **COVID-19 test from home via mobile app (NAVICA) and web portal**. Responsible for a **program consisting of seven interrelated projects** with a **budget of 11M annually**.
- Responsible for **program management, ePMO, Budget Forecasting, Planning & Management, Scheduling and FDA approvals** in a mix of **agile and waterfall** workstreams of various sizes and complexity.
- **Developing and maintaining relationships with project stakeholders** to obtain project objectives and roadmaps.
- Experience in working in a **matrix project environment** with project stakeholders to obtain project objectives in a comprehensive and appropriate **systems development lifecycle and methodology**.
- Works with **business and IT management** to establish and gain consensus on project goals, objectives, and deliverables.
- Assess the degree to which **changes to scope, issues and risks** will affect projects working with division and cross divisional management and sponsors to gain agreement for resolution.
