EDUCATION

Masters in Information Technology | University of Cincinnati, Cincinnati, USA

DEC 2024 | GPA: 3.96

Bachelor in Engineering Computer Science | ACE Engineering College, Hyderabad, India

MAY 2021 | GPA: 4.00

EXPERIENCE

Data Lead Analyst, UC CMM (Cincinnati, Ohio)

APR 2024 – DEC 2024

- Designed and maintained engineering database systems in SQL Server and SSMS to support the process and technical documentation, improving system efficiency by 45%.
- Developed and optimized 15+ ETL pipelines using SQL, SSIS, and Visual Studio to automate data integration across five enterprise systems, cutting manual intervention by 60%.
- Built and deployed interactive dashboards in Power BI and Tableau to monitor engineering KPIs and compliance metrics, accelerating stakeholder decision-making by 35%.
- Created custom SQL stored procedures and views for automating data retrieval processes, resulting in a 50% decrease in reporting latency across departments.
- Implemented robust data governance frameworks using Alation and Collibra to ensure consistent metadata usage and improve data reliability by 30%.
- Conducted root cause analysis of recurring system discrepancies and resolved 100+ data issues, ensuring 100% quality compliance in internal audit reports.
- Supported new product introduction (NPI) teams by managing technical datasets, validating engineering inputs, and enhancing process traceability across 12 product releases.
- Worked cross-functionally with engineering, QA, and BI teams to gather requirements and tailor database solutions that aligned with evolving project scopes.
- Developed and managed automated reporting templates for weekly, monthly, and quarterly releases, reducing manual workload by 50% and enhancing reporting accuracy.

Technologies Used: Erwin, SQL, SSMS, SSRS, SSIS, SSAS, Tableau, Power BI, Python, Jupyter, Visual Studio, R, Power BI, Power Apps, ETL, Windows Server, Alation, Collibra.

Software Engineer, Accenture (Hyderabad, India)

AUG 2021 – JUL 2023

- Led database development for engineering operations using SQL Server, enhancing data architecture and reducing database response time by 40%.
- Automated over 20 ETL workflows with SSIS and integrated third-party APIs to streamline data validation processes, reducing discrepancies by 30%.
- Created Power BI dashboards to track system performance and defect resolution across product cycles, improving real-time insights and reducing incident resolution time by 35%.
- Ensured data accuracy by implementing comprehensive data validation and reconciliation logic, identifying and resolving 95% of inconsistencies before data reached stakeholders.
- Conducted 50+ debugging and QA sessions to test new database implementations, leading to a 15% improvement in product release timelines.
- Built and maintained data models for SSAS to support business analysis and operational reporting, empowering senior leaders with deeper product performance insights.
- Monitored production data pipelines and application logs using Datadog and Azure Monitor, enabling proactive issue resolution.
- Provided cross-functional support during Agile sprints, coordinating with engineering and product teams to deploy database updates in accordance with project goals.
- Spearheaded modernization of legacy ETL workflows by migrating stored procedures to modular packages and applying CI/CD best practices, reducing deployment errors by 80%.
- Led an automation initiative using Python and Power Query to generate dynamic reports, eliminating over 50% of manual report compilation work.
- Collaborated with QA and data governance teams to execute data quality checks, manage version control in Git, and define SOPs for ETL error recovery.
- Supported multiple agile sprints, delivering consistent backlog refinement, sprint demos, and JIRA documentation while adhering to global delivery standards.

Technologies Used: Snowflake, ETL Pipeline, Azure Data Factory, CI/CD pipelines, Agile, Git, SSIS, SSRS, Reporting, Power BI.

- Conducted EDA and statistical modeling using Python to identify marketing trends, improving targeting strategies and campaign ROI by 12%.
- Designed SQL queries to validate, cleanse, and aggregate customer behavior data across marketing channels, improving data integrity by 25%.
- Built Power BI dashboards to monitor engagement metrics and acquisition funnels, increasing marketing visibility and stakeholder adoption by 18%.
- Developed automated pipelines in Python for real-time reporting, reducing manual reporting time by 50% and enabling faster decision-making.
- Assisted in backend debugging of SQL workflows and Python scripts, resolving 25+ issues that improved data accuracy by 20%.
- Performed cross-system validations between Excel, Access, and SQL outputs, uncovering 30+ inconsistencies and reducing reporting errors.
- Created documentation and training guides for over 20 data validation scripts, enabling quick onboarding of new data analysts.
- Supported deployment of predictive models in marketing initiatives using Sklearn and statsmodels, improving conversion rates by 10%.
- Interfaced with business teams to understand KPIs and translated them into actionable reports and alerts, leading to a 15% increase in campaign effectiveness.
- Designed automated audit checklists to ensure accuracy across daily reporting workflows, contributing to 100% compliance in internal checks.

Technologies Used: Python3, Python2, Power BI, Microsoft Access, AI/ML Models, Process Improvement. Excel, SQL

PROJECTS

- HR Analytics (Python): Built research questions around HR data and answered them using Python libraries like Pandas, NumPy, Matplotlib, Seaborn, Sklearn, stats, Classifiers for robust decisions. ([GitHub](#))
- HR/People Analytics Dashboards: Created interactive data visualizations for workforce trends, performance evaluations, and DEI progress. ([GitHub](#))
- Machine Learning Algorithms (Python) : Developed different ML models using various algorithms ([GitHub](#))
- Mini Facebook Web Application: Built a secure, scalable social media app with strong database design, modular backend, and key security features like crypt and CSRF protection. Used PHP, MySQL, JavaScript, jQuery, HTML, and CSS ([GitHub](#))
- Fruit Classification (Python): Deployed a Keras ML model for fruit classification on 5,000+ images. ([GitHub](#))

TECHNICAL SKILLS

Programming & Scripting	:	Java, JavaScript, Python, C++, C#, HTML, CSS, Bootstrap, Android Studio, XML, PHP, R, VBScript
Database tools/ IDE's	:	Eclipse, PyCharm, IntelliJ, MySQL, Microsoft Access, Hibernate, PhpMyAdmin, SSMS, SQL Server, SQL.
DBMS & tools	:	Oracle, SQL Server, DB2, Teradata, Snowflake, NoSQL, Erwin, Power Designer, Toad DM
Data Analytical tools	:	Jupyter, MATLAB, Visual Studio, R Studio, Tableau, Microsoft Power BI, Microsoft Excel, Git, ETL
Frameworks	:	Pytest, Tensorflow, NLP, scikit-learn, Numpy, Pandas, Unittest, Pytorch, Tkinter, Keras, Seaborn, stats
Online/Cloud tools	:	Postman, Bitbucket, Microsoft SQL server, Azure Synapse Analytics, Azure Data factory, Postgres, ETL
QA Tools & Frameworks	:	Postman, Selenium, Pytest, REST APIs, Unittest
Core Competencies	:	Proactive learning, Adaptability, BI & Data Analysis, Agile Project Management, Process Automation
Data Preparation Tools	:	Tableau Prep, Power Query, Excel, SSIS, SSRS, SSIS, DAX
Data Governance & Quality	:	Data Dictionaries, Data Lineage, Business Glossaries, Data Governance Operating Models, Scrum
Agile & DevOps	:	Scrum, Git, Liquibase, Jira

CERTIFICATIONS

Microsoft Power BI PL-300

Microsoft Certified: Azure Data Engineer Associate
