

Vikram Reddy Venkatareddygari

Senior Software Engineer | Charlotte, NC, USA | (302) 513-4940 | vikramreddy.vrg@gmail.com

Professional Summary

Full Stack .NET Developer with 5+ years of experience building scalable, cloud-native enterprise applications using ASP.NET Core, C#, Entity Framework, React, and Azure. Proven success in designing robust RESTful APIs, modernizing legacy systems, implementing DevOps practices with Azure Pipelines, and deploying intelligent AI-driven features using OpenAI and Azure Cognitive Services. Strong advocate for clean code, performance optimization, and delivering measurable business value in agile environments.

Technical Skills

Frontend: React.js · Redux · JavaScript (ES6+) · HTML5 · CSS3 · Responsive UI · D3.js
Backend: ASP.NET Core · C# · Entity Framework Core · LINQ · Web API · SignalR
Cloud & DevOps: Azure (App Services, AKS, Azure SQL, Blob Storage, DevOps, Functions) · AWS (CloudWatch, ECS, S3)
AI & GenAI: OpenAI GPT APIs · Azure OpenAI · langchain · Cognitive Search · Vector Embeddings
Testing & CI/CD: XUnit · MSTest · Postman · Swagger · Jest · Azure DevOps Pipelines · GitHub Actions
Security: OAuth 2.0 · JWT · RBAC · Application Gateway
Other Tools: Docker · Git · RabbitMQ · Agile/Scrum · AB Testing · LaunchDarkly

Professional Experience

Mizuho Financial Group

Full Stack .NET + React Developer

Remote, USA

Mar 2024 - Present

- Architected and built a financial product comparison portal using ASP.NET Core Web API and React, delivering 45% faster performance and real-time synchronization via SignalR.
- Replaced legacy backend with C# microservices, using Entity Framework and LINQ for secure and performant data access from Azure SQL Database.
- Integrated Azure OpenAI for intelligent product recommendations and GPT-powered search; boosted user engagement by 22%.
- Built CI/CD pipelines using Azure DevOps, enabling test automation (xUnit/Postman) and zero-downtime blue-green deployments with AKS.
- Applied RBAC and JWT-based authentication to protect APIs and sensitive data access; passed internal audit with 100% compliance.
- Deployed solution via Azure App Service, managing assets with Blob Storage and ensuring 99.9% uptime through App Insights and Health Checks.

FedEx

Associate Software Engineer (.NET + React)

Remote, India

Jan 2019 - Dec 2022

- Developed and maintained enterprise-level Inventory & Order Management System using ASP.NET Core MVC, React, and Azure SQL, improving operational efficiency by 35%.
- Created robust APIs using C#, managed data access with Entity Framework Core, and optimized performance using asynchronous programming and stored procedures.
- Built a GenAI-enabled dashboard prototype using LangChain and OpenAI APIs for intelligent stock analysis and customer FAQs; reduced support tickets by 30%.

- Automated test and deployment pipelines with Azure DevOps, achieving 90% code coverage and reducing release cycle time by 45%.
- Enforced role-based access control and secure transactions via OAuth 2.0, HTTPS, and JWT, cutting unauthorized access attempts by 50%.
- Coordinated with product managers and designers during Agile sprints to refine features, user flows, and accessibility.

Projects & AI Integrations

AI Chat Assistant for Financial Portal

Mizuho

- Integrated Azure OpenAI GPT-4 to power a chatbot answering user queries, comparing financial products, and summarizing reports. Boosted self-service usage by 30%.

Smart Semantic Search

FedEx Internal

- Developed semantic search for internal inventory docs using OpenAI embeddings + Azure Cognitive Search, enabling more intuitive search results for operations staff.

Education

University of Central Missouri

Aug 2024

Master of Science | Big Data Analytics & Information Technology

Warrensburg, MO, USA

JNTU Hyderabad

Jul 2019

Bachelor of Technology | Computer Science & Engineering

Hyderabad, India
