

PROFESSIONAL OVERVIEW:

Full-stack Software Engineer with 4+ years of experience in building scalable, high-performance applications using Java, Spring Boot, JavaScript, TypeScript, Angular, React, and Node.js. Demonstrated expertise in developing robust microservices architectures, integrating advanced technologies like Kafka, Apache Spark, and OCR-based machine learning models. Proven ability in leading critical projects such as subscription renewal systems that efficiently manage high-volume data transactions.

AWS Certified Developer and DevOps Engineer, legally authorized to work in the U.S. without sponsorship and can provide proof of authorization prior to the interview upon request.

TECHNICAL SKILLS:

Languages: Java, JavaScript/TypeScript, Python, HTML/CSS, C#, SQL, and PL/SQL

Frameworks: Spring Boot, React, Angular, .NET, Visual Studio and Node.js

Tools: Git, Apache Kafka, AWS, CI/CD pipelines, Jenkins, Docker & Spring Tool Suite.

WORK EXPERIENCE

CVS Pharmacy

Software Engineer

MAY 2023 to Present

- Led the development of [Subscription Auto-Renewal System](#), supporting 20,000 daily renewals out of [13 million](#) Subscribers using Spring Boot, Kafka, and Spark.
- Developing & maintaining core backend functionalities for enterprise-level applications using [Java](#), [Spring Boot](#) and [Spring Cloud](#) ensuring high performance & system reliability.
- Designed and implemented batch jobs and managed them with [Apache Kafka](#) & [Airflow](#) to check and renew subscriptions daily.
- Worked on prescription receipt & prescription subscription modules, created [microservices](#) to generate receipts for subscriptions.
- Worked on the UI using [React 16](#), functional components, and [Redux libraries](#) for state management.
- Implemented [OCR](#) and machine learning models to parse prescription data.
- Developed a CRUD operation system using [Spring Boot](#) to allow users to download past histories and receipts.
- Integrated AWS services like [S3](#), ECS, EKS, and [Redshift](#), leveraging CI/CD pipelines for automated deployment.
- Reduced processing times from [8 to 6 minutes](#) during load scenarios using (HPA) Horizontal Pod Autoscaler.
- Collaborated with cross-functional teams to deliver [POCs](#) and gain business approval for new features.

Careington International Corporation

Software Developer 1

MAY 2020 to DEC 2021

- Designed and deployed a highly scalable Java-based microservices architecture for a Healthcare platform, which improved response times by 35%. Developed REST API's using [Spring MVC](#) and [Spring boot](#).
- Led the development of three major backend modules using Java, J2EE, Servlets, and [Hibernate](#), resulting in a 25% increase in system efficiency.
- Implemented thorough unit testing using [JUnit](#), ensuring code quality, and reducing the risk of defects.

- Designed intricate application log systems using [Log4J](#), improving system debug and trace capabilities.
- Spearheaded the development and optimization of dynamic and interactive features in [Angular](#) resulting in a 30% increase in website performance and seamless cross-browser compatibility.
- Integrated AWS services ([S3](#)) for data storage and [AWS Lambda](#) for data retrieval, increasing data retrieval speeds by 40%.
- Coordinated with cross-functional teams to set up a faster, more streamlined release process using [Jenkins](#) and [Docker](#), cutting down launch times by 30%. Implemented REST/SOAP APIs using [XML](#) for data interchange.
- Played a pivotal role in all phases of [the SDLC](#), actively participating in requirements gathering, design, development, testing & deployment, resulting in the timely delivery of high-quality Software solutions.

GRADUATE TEACHING ASSISTANT

Purdue University

FEB 2022 to MAY 2023

- Assisted my professor in evaluating and setting test papers every week on Django, [C#](#), refactoring, and Software testing tools.
- Mentored a computer science course for Non-CS students, explaining [OOPS concepts](#), Agile Methodologies, Data Structures and Algorithms and [C#](#), resulting in an average class grade improvement.

EDUCATION:

Master of Science in Computer Science | Purdue University: CGPA: 3.8/4.0

JAN 2022 to MAY 2023

CERTIFICATIONS: [AWS Certified Developer - Associate](#) • [AWS Certified DevOps Engineer – Professional](#)

PROJECTS:

[Purdue Event Ticketing Application](#): Leading a team of 5 students in Building an Android App for Purdue university to book Tickets. I used Spring to develop REST API, MYSQL as a database, Postman & Tomcat servers for API integration. Implemented Scrum practices to ensure efficient and industry-standard code development.

[Uber Data Analysis](#): To craft insightful dashboards, and to translate raw data into actionable visual reports I Built python code for transforming the data and deployed that on AWS via Airflow. Stored the data onto AWS Datawarehouse RedShift and build the dashboards and insights with help of [Tableau](#).
