Education

Stevens Institute of Technology

Sep. 2023 - May 2025

Master of Science, Computer Science

Hoboken, NJ

- Coursework: Web Programming, Deep Learning, Human-Computer Interaction, Natural Language Processing, Knowledge Discovery and Data Mining, Distributed Systems and Cloud Computing

Birla Institute of Technology and Science, Pilani

Aug. 2019 - Jul. 2023

Bachelor of Engineering, Computer Science

Dubai, UAE

- Coursework: Data Structures and Algorithms, Object Oriented Programming, Design and Analysis of Algorithms, Database Systems, Operating Systems, Computer Networks, Computer Architecture, Compiler Construction

Experience

Software Engineer Intern

Jan. 2023 - Jul. 2023

Casamia

Dubai, UAE

- Developed and deployed **6 internal business applications**, using **Microsoft Power Apps**, to centralize and streamline processes previously handled via email, **reducing average process time by 50% (from 6 days to 3 days)** and enhancing transparency
- Architected a **Microsoft Power Automate** workflow incorporating GPT-3 API to automate email segregation by analyzing the body text, achieving a **99%+ increase in efficiency** by reducing average process time **from 3 hours to instantaneous**
- Implemented web scraping solutions using **Python** and Power Automate to extract external data for internal use, enabling catalog digitization and the **generation of over 3000 leads in a week**
- Designed real-time **Power BI** dashboards connected to **SharePoint** data sources for visualizing operational metrics, supporting data-driven decision-making and gauging trends and Year-on-Year growth
- Collaborated with finance, design, sales, and administrative teams to gather requirements and deliver tailored, user-friendly digital tools that enhanced workflow efficiency and transparency

Software Engineer Intern

Jun. 2022 - Aug. 2022

GulfIT Network Distribution

Dubai, UAE

- Maintained **SailPoint IdentityIQ** for role-based access controls, improving onboarding and user provisioning processes
- Configured automatic account creation and streamlined data workflows by writing **Java** and **SQL** scripts, resulting in improved reporting accuracy

Projects

Explore Diaries | React.js, JavaScript, HTML, CSS, Node.js, Express, MongoDB, Firebase, Redis

Nov. 2024 - Dec. 2024

- Engineered a full-stack web application enabling users to create, manage, and share interactive diary entries and events using **React.js** and **Node.js**
- Created responsive, interactive front-end components with React.js, Material UI, HTML, and CSS
- Implemented secure backend routes and middleware for authentication, user session management, and caching
- Employed **MongoDB** to handle dynamic user-generated data storage and Elasticsearch to provide powerful, efficient search functionality across diary entries

Streamlined Scheduler | JavaScript, HTML, CSS, Node.js, Express, MongoDB

Jul. 2024 - Aug. 2024

- Devised a full-stack schedule management web application, enabling users to create, update, and visualize time-blocked daily schedules with event categorization and real-time updates
- Constructed backend routes and middleware for authentication and CRUD operations
- Powered dynamic schedule data management and event-sharing functionality across accounts with MongoDB
- Created responsive front-end components

Banking System Simulator | C++

Nov. 2021 - Nov. 2021

- Built a banking system utilizing **object-oriented** principles such as inheritance and encapsulation
- Applied user-specific data mapping via structs, dynamic memory management using vectors, and input validation

Technical Skills

Languages: JavaScript, HTML, CSS, C++, C#, SQL, GraphQL, Python, Java, PHP

Frameworks: Express.js, React, Node.js, WordPress

Tools: Git, Docker, VS Code, Postman, Apollo GraphQL, Redis, Alteryx, Linux, Firebase, SailPoint IdentityIQ

Libraries: Axios, Handlebars, pandas, NumPy, Matplotlib, Scikit-Learn, TensorFlow

Databases: MongoDB, MySQL, PostgreSQL

Robotic Process Automation: Microsoft Power Apps, Microsoft Power Automate, Microsoft SharePoint
