EDUCATION

San Jose State University, San Jose, CA | *M.S., Data Analytics*

May 2026

Relevant Coursework: Database Management Systems, Machine Learning, Deep Learning, Generative Artificial Intelligence, Data Visualization and Business Intelligence, Big Data and Generative Model Applications, Data Warehousing and Pipelines.

Anna University, Chennai, India | *B.E., Mechanical Engineering*

May 2022

WORK EXPERIENCE

Software Development Engineer Intern - Amazon Web Services (AWS), Seattle, WA

May 2025 – August 2025

- Developed the Agentic AI Code Review system leveraging AWS Bedrock, Lambda, Step Functions, ECS, SQS and CDK with React, Typescript and Java, enabling natural language-driven automation and reducing manual overhead in developer workflows.
- Architected scalable AI-powered workflows integrated into existing enterprise infrastructure, improving accuracy of code modifications by 30% and reducing template maintenance efforts for engineering teams by 40%.
- Enhanced full-stack solutions by designing intuitive frontend workflows, extending backend Smithy models, and implementing IAM/CDK-based security configurations.

Teaching Assistant – San Jose State University, San Jose, CA

January 2025 – Present

- Tutored and assisted a 100-student undergraduate course, ensuring smooth execution of hands-on exercises.
- Mentored students in debugging coding issues, troubleshooting data science pipelines, and enhancing problem-solving skills in Python, statistics, and machine learning fundamentals through office hours and review sessions.

Associate Software Engineer – Cognizant Technology Solutions, Chennai, India

June 2022 – August 2024

- Designed and implemented high-performance enterprise applications and product-focused solutions for insurance clients using Java, React, Python, MySQL, and Snowflake, achieving a 30% increase in efficiency and improving client satisfaction.
- Engineered secure and scalable data pipelines and automated workflows for insurance operations using Azure DevOps and MongoDB, reducing processing time and increasing data accuracy by 15%, supporting more reliable product performance and timely insights.
- Led cross-functional collaboration with Agile methodologies, aligning project goals with client requirements to deliver high-quality insurance solutions, contributing to a 20% improvement in operational efficiency.

PROJECTS

FeastFlex: AI-Powered Food Ordering

- Engineered a full-stack food ordering platform using Spring Boot, incorporating secure RESTful APIs and PostgreSQL for efficient data storage.
- Developed a dynamic and user-friendly UI in React, ensuring seamless cross-device accessibility.
- Integrated JWT authentication to enhance security, managing user access and safeguarding sensitive data.

EstateEase: Intelligent Property Management

- Built a MERN-stack web application for streamlined estate management, featuring a React-powered frontend and a Node.js backend.
- Implemented real-time communication via WebSockets and utilized MongoDB for robust data handling.
- Designed secure authentication, property listings, and profile customization features, delivering a complete estate management solution.

TECHNICAL SKILLS

- **Programming Languages & Databases:** Python, Java, JavaScript, TypeScript, Golang, Kotlin, C++, SQL, MySQL, Oracle, MongoDB, PostgreSQL, GraphQL, DynamoDB, Hadoop, Impala, Hive, PySpark, Scala, Snowflake, Azure Data Factory, GCP.
- **Frameworks:** React, Express, Spring Boot.
- **Cloud & Orchestration:** AWS Bedrock, AWS Lambda, AWS Step Functions, ECS, SQS, AWS CDK, IAM, Amazon S3, Azure, Google Cloud, Terraform.
- **Technology / Tools:** Azure DevOps, Docker, BigQuery, Kubernetes, Git, GitHub, Jira, Splunk, Grafana, Confluence, Guidewire Claim and Policy Centre, Duck Creek, Helm.
- **Software:** Kafka, Jenkins, Soap UI, Postman, Apache JMeter.
- **Unit Testing:** Cypress, Jest, JUnit, TestNG, Maven, Selenium, Cucumber, ReadyAPI.

ACHIEVEMENTS

- Recognized for exemplifying Amazon's "Think Big" leadership principle presented at the Global AI Solutions Expo and Intern Program Hackathon, featured in the 2025 Intern Yearbook & Newsletter, and awarded 2nd place at the AWS PLEX & AWS FinTech – SPARK Intern Fair.
- Recognized as a 'Brilliant Beginner' in QEA UK Insurance Management at Cognizant Technology Solutions for exceptional Performance, facilitated workshops as a Subject Matter Expert in Claims Systems, providing comprehensive training on best practices in the insurance lifecycle.
