

VINAY KUMAR MANNE

Irving, 75063 | vinaykumarmannee@gmail.com | +1(945) 209-9991 | [LinkedIn](#) | [GitHub](#)

SUMMARY:

Experienced **Data Engineer** with 4+ years designing scalable Big Data solutions using **AWS, GCP, Hadoop**, and **Snowflake**; skilled in **ETL automation, real-time analytics**, and **AI-driven data optimization**. Proficient in SQL, Python, Scala, Spark, Kafka, and dbt, with a strong focus on cloud data engineering and performance tuning.

TECHNICAL SKILLS:

- **Big Data Technologies:** Hadoop (HDFS, Hive, Sqoop, Spark), AWS (Glue, EMR, Redshift, S3, Lambda, RDS, DynamoDB), GCP (BigQuery, Dataflow, Pub/Sub, Cloud Storage), Azure (Data Factory, Synapse, Cosmos DB)
- **Programming Languages:** Python, Scala, Java, R, Terraform, Shell Scripting
- **Databases & Data Modeling:** Snowflake, SQL Server, MySQL, Oracle, PostgreSQL, MongoDB, Cassandra, HBase
- **ETL & Data Warehousing:** Matillion, Informatica, Talend, SSIS, DataStage, dbt
- **Data Streaming & Real-Time Processing:** Kafka, Spark Streaming, AWS Kinesis, Flink
- **DevOps & CI/CD:** Docker, Kubernetes, Jenkins, Git, Terraform, Airflow, Ansible
- **Machine Learning & AI:** TensorFlow, PyTorch, Scikit-learn, NLP, MLOps, AutoML
- **Tools and Technologies:** Erwin, Airflow, Alteryx, JIRA, NetBeans, IntelliJ, Bamboo

EDUCATION:

- Master of Science in computer science, **University of North Texas.** Jan 2022 - July 2023
- Bachelor of Technology in Computer science, **Hindustan University.** June 2017 – May 2021

PROFESSIONAL EXPERIENCE:

Info Keys Inc (Client: SiriusXM)

Jan 2023 – Present

Role: AWS Data Engineer

Irving, Texas

- Designed and deployed scalable AWS-based data pipelines using Glue, Lambda, and Step Functions, improving data processing efficiency by 40%.
- Developed and maintained ETL workflows leveraging AWS Glue, Redshift, and S3, reducing processing time by 50%.
- Architected and optimized data lakes on Amazon S3 with Lake Formation and Glue Catalog, enhancing data governance and security, improving accessibility by 35%.
- Built real-time data streaming solutions with Kinesis, Kafka, and Spark Streaming, reducing data latency by 45%.
- Automated infrastructure provisioning using Terraform and CloudFormation, improving deployment efficiency and reducing errors by 30%.

Cloudpolitan Technologies India Pvt Ltd (Client: Wipro)

May 2020 - Nov 2021

Role: Data Engineer

Hyderabad, India

- Built and optimized data pipelines for structured and unstructured data using Apache Spark and Hadoop, improving data ingestion speeds.
- Developed ETL workflows using Hive, Sqoop, and Spark SQL, reducing processing latency for batch data.
- Designed scalable database architectures in HDFS and NoSQL systems to enhance data retrieval efficiency and analytics.
- Integrated Kafka and Spark Streaming to process real-time streaming data, enabling a 50% improvement in real-time insights.
- Automated data quality checks and monitoring using Airflow, ensuring compliance with business data governance policies.

PUBLICATIONS:

- Extracting User Behavioural Control Styles based on Process Mining ([IEEE 2021](#))

PROJECTS:

E-Commerce Sales Analytics Pipeline

- Built a robust ETL pipeline using AWS Glue and Python to process and analyze e-commerce sales data from multiple sources, including transaction logs and customer behavior data, storing the raw data in AWS S3.
- Integrated the pipeline with Amazon Redshift for data warehousing and Amazon QuickSight for real-time business intelligence dashboards, enabling insights into sales trends, customer behavior, and inventory levels.

Real-Time IoT Data Processing Pipeline

- Designed a real-time data processing pipeline using AWS Kinesis and Apache Flink to process live data from IoT sensors monitoring equipment performance, storing the raw sensor data in AWS S3.
- Implemented real-time analytics and anomaly detection algorithms using AWS Lambda and Python, triggering alerts based on specific thresholds and pushing the results to AWS DynamoDB for further analysis and quick querying.
