

SUMMARY

Software Engineer with 3 years of experience in designing and developing high-performance, scalable, full-stack web applications using Java, JavaScript (ES6+), and TypeScript. Proficient in leveraging Spring Boot, Node.js, and Express.js to build robust backend systems and microservices architectures, complemented by expertise in front-end technologies like React.js, HTML, CSS, and Bootstrap. Skilled in implementing Test-Driven Development (TDD) with JUnit, optimizing CI/CD pipelines using Jenkins, Docker, and Maven, and deploying solutions on cloud platforms such as AWS (Lambda, S3) and Azure. Experienced in database management with MySQL and PostgreSQL, ensuring efficient data handling and query optimization.

SKILLS

Methodology: Agile, Scrum, Test-Driven Development (TDD)
Programming Languages: Java, JavaScript (ES6+), TypeScript, Python
Frameworks: Spring MVC, Spring Boot, Spring Security, Microservices, Hibernate, JPA, Node.js, React.js, Express.js
IDEs: NetBeans, IntelliJ IDEA, Visual Studio Code, Eclipse
J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC
Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML, TypeScript, WebSockets
Application Server: Apache Tomcat, Web Sphere
Cloud Computing: AWS, Azure, Google Cloud, EC2, S3, Lambda, RDS
Databases: MySQL, PostgreSQL, NoSql
Build /DevOps Tools: UML, MS Visio, Maven, Gradle, Jenkins, JUnit, Docker, Kubernetes, Terraform
Version Control: Git, GitHub, GitLab
Operating Systems: Windows, Linux

EDUCATION

Masters in Computer Science California State University - Dominguez Hills GPA: 3.67 out of 4.00	Dec 2024
Bachelor of Engineering in Computer Engineering Gujarat Technological University, Ahmedabad, Gujarat – India GPA: 9.81 out of 10.00	July 2021

EXPERIENCE

DXC Technology, CA | Dec 2024 - Current | Software Engineer

- Developed robust backend systems using Java and Spring MVC, integrating Hibernate and JPA for efficient data persistence, improving application response time by 15%.
- Built responsive web applications with HTML, Bootstrap, and jQuery, leveraging Ajax for asynchronous data loading, enhancing user experience by 25%.
- Configured and deployed applications on Apache Tomcat, optimizing server performance and handling 10,000+ concurrent users.
- Utilized MySQL for database management, designing schemas, and optimizing queries to support high-traffic applications, reducing query execution time by 20%.
- Developed and maintained responsive, high-performance web applications using React.js, ensuring seamless user experiences across devices.
- Implemented Spring Security for authentication and authorization, ensuring secure access control across application modules.
- Employed Maven for build automation and dependency management, reducing build time by 30% through streamlined configurations.
- Leveraged Git and GitHub for version control, maintaining clean codebases, and facilitating team collaboration on complex projects.

Infinite Infolab, India | Jan 2020 – July 2022 | Software Engineer

- Architected and developed full-stack web applications using Node.js and Express.js with TypeScript, delivering scalable solutions for client-facing platforms, improving performance by 20%.
- Implemented Microservices architecture using Spring Boot, enabling modular development and deployment of independent services, reducing system downtime by 15%.
- Designed dynamic user interfaces with React.js, JavaScript (ES6+), and CSS, integrating WebSockets for real-time data updates, enhancing user engagement by 30%.
- Automated deployment pipelines using Jenkins and Docker, streamlining CI/CD processes and reducing deployment time by 25%.
- Managed and optimized PostgreSQL databases, writing complex queries and stored procedures to support business logic, improving data retrieval efficiency by 18%.
- Utilized AWS Lambda and S3 for serverless computing and storage solutions, reducing infrastructure costs by 22%.
- Conducted code reviews and implemented Test-Driven Development (TDD) with JUnit, ensuring 95% test coverage and minimizing production bugs.
- Collaborated in Agile teams using Scrum methodologies, participating in sprint planning and retrospectives to deliver features on time.
