

VINAYKUMAR MUTHYALA

Data Engineer

| muthyalavinayk123@gmail.com | 502-999-5584 | [LinkedIn](#)

PROFESSIONAL SUMMARY

A highly skilled and innovative Data Engineer with over 5 years of experience specializing in Azure and AWS cloud ecosystems. Demonstrates expertise in data transformation, ETL pipeline development, and real-time data processing.. Recognized for streamlining workflows, reducing processing times by up to 30%, and effectively utilizing machine learning to deliver actionable insights. Proficient in Python, Spark, and Power BI, and adept at collaborating across teams to solve complex data challenges.

EDUCATION

Masters in Computer Science, University of Central Missouri

Warrensburg, Missouri, USA (Aug 2021 - Dec 2022)

Bachelor of Technology in Mechanical Engineering

UBDT College of Engineering, Davanagere, Karnataka, India (Aug 2015 – Jun 2019)

SKILLS

- **Programming & Scripting:** Python, SQL, C++,C, Scala
 - **Cloud Platforms:** AWS (S3, Redshift, Glue), GCP
 - **Big Data Technologies:** Hadoop, Spark, Kafka, Hive, Pig
 - **ETL/Analytics Tools:** Airflow, Power BI, Tableau,
 - **Machine Learning:** PyTorch, TensorFlow
 - **Operating Systems:** UNIX, Linux, Windows
-

PROFESSIONAL EXPERIENCE

Data Engineer

Mercedes Benz, Georgia | June 2023 – Present

- Designed robust **data models in Synapse Analytics** and created pipelines to optimize query performance and reduce latency by **20%**.
- Designed and implemented **data integration pipelines in Azure Data Factory (ADF)** for batch and incremental loading from on-prem and cloud sources into Azure Data Lake and Synapse.
- Built and orchestrated **ADF pipelines using Data Flows, Linked Services, and Datasets** to enable scalable data transformations and seamless data movement.
- Proactively monitored the health and performance of GCP workloads using **Cloud Monitoring, Logging**, and third-party observability tools.
- Worked with **SQL Server Agent** to schedule and monitor jobs for routine data loads and alerting mechanisms.
- Built and deployed **SSIS packages** to extract, transform, and load structured and semi-structured data into SQL Server and Azure environments.
- Monitored and troubleshooted **ADF pipeline failures**, implementing retry logic and logging mechanisms for high availability and performance.
- Designed and maintained **normalized and denormalized SQL Server schemas**, supporting OLTP and OLAP systems across business units.
- Built interactive **Power BI dashboards** to visualize insights for stakeholders, leading to faster, data-driven decisions.

- Designed, implemented, and maintained scalable cloud infrastructure solutions on **Google Cloud Platform (GCP)** using **Terraform** and **GitHub** for Infrastructure as Code (IaC) automation.
- Developed custom **GCP configurations** to support business applications, optimizing cost, performance, and security across multiple environments.

Data Engineer

Cigna Healthcare, Connecticut | May2022 – May 2023

- Automated **data ingestion processes** with Hadoop and Spark, significantly enhancing data processing speed for sensitive data analysis.
- Architected and implemented ETL frameworks using **Spark and Snowflake** to process large JSON datasets, improving data handling efficiency by **25%**.
- Utilized knowledge of **OLAP systems and database management principles** to build performant data storage solutions.
- Leveraged **parameterization and dynamic content** in ADF to create **reusable and modular pipelines**, reducing redundancy and improving maintainability.
- Designed and supported **Power BI and Tableau dashboards** for cross-functional teams, enabling real-time insights and business decision-making.
- Built and managed **SQL Server Integration with SSIS and ADF**, facilitating seamless data ingestion, transformation, and delivery to downstream systems.
- Conducted extensive **data pipeline optimizations** and parallel processing strategies, reducing ETL execution time by **30%**.

Associate Data Engineer

Sequential Technological International Pvt Ltd , Bengaluru , India | May 2019 – Apr 2021

- Developed and optimized Spark applications using **Scala and Spark SQL** to process high-volume data across varied formats, boosting efficiency by **40%**.
- Built **data ingestion workflows** in ADF for Azure Data Lake, improving ingestion rates and enabling faster insights for stakeholders.
- Participated in **data migration projects** from legacy on-prem systems to cloud-native environments using Azure services and custom ETL logic.
- Created robust data pipelines using **Azure Databricks** and SQL, supporting real-time and batch processing needs.
- Ensured **data security and role-based access** using SQL Server authentication, roles, and permission configurations.
- Spearheaded migration efforts from legacy systems to cloud, including data transformation using **Hive and Spark SQL**.
- Worked with **SQL Server Agent** to schedule and monitor jobs for routine data loads and alerting mechanisms.
- Designed and maintained **relational databases**, ensuring data integrity and supporting seamless integration with **cloud-based ETL pipelines**.

PROJECTS

E-commerce

- Developed a scalable system using **Python and SQL** to bookings payments, and customer service, improving data consistency and operational efficiency.
 - Encoded and decoded json objects using **PySpark** to create and modify the data frames in Apache Spark
-
