Education

Indiana University MS in Data Science	Aug 2023 – May 2025
Sathyabama Institute of Science and Technology BE in Computer Science and Engineering	Jun 2019 – May 2023

Experience

Software Engineer , <i>Indiana University - Bloomington, IN</i>	Oct 2024 – May 2025
- Developed microservices using Flask to automate product analytics workflows, reducing manual data handling by 40%. - Integrated scikit-learn model endpoints for real-time customer segmentation, improving targeting and decision-making. - Streamlined CI/CD with GitHub Actions; deployed to AWS EC2, Lambda, and S3, accelerating release cycles by 60%. - Optimized Redshift schemas and REST APIs for scalable data access, reducing average query latency by 30%. - Collaborated in Agile sprints, contributing to unit testing with PyTest, peer code reviews, and technical documentation.	
Software Engineer Intern , <i>Probot Software Solutions – Chennai, India</i>	Nov 2022 – Jun 2023
- Spearheaded Inventory Management System using React, Node.js, and MySQL, reducing stock discrepancies by 35%. - Contributed to real-time dashboards with restock alerts and product categorization, improving inventory visibility. - Implemented advanced filtering and search features, enabling employees to quickly locate SKUs and monitor trends. - Engineered JWT-based authentication to secure inventory records and enforce role-based access controls. - Optimized backend APIs for bulk updates, boosting response by 25% and enabling scalable design patterns.	

Projects

PodGen

Next.js, OpenAI, Convex, Tailwind, ShadCN

- Developed AI podcast platform with multi-voice TTS, AI thumbnails, and real-time creation using Next.js and OpenAI.
- Added smart voice style selection using vector embeddings for personalized audio output customization.
- Integrated RAG-based semantic search and podcast recommendations with OpenAI and Convex backend.
- Designed responsive UI using Tailwind CSS and ShadCN with sticky player, synced transcripts, and listener analytics.

FinSight

React, Node.js, PostgreSQL, Docker, Redis

- Built a financial analytics dashboard with PostgreSQL and React, containerized with Docker.
- Architected a multi-container setup using Docker Compose and Nginx reverse proxy for secure routing and fast CI/CD.
- Exposed GraphQL APIs with Redis caching, improving large dataset query performance by 45%.
- Enabled cloud-ready deployment on Google Cloud Run and Kubernetes for horizontal scaling and HA.

Telecom Churn Prediction

Python, scikit-learn, Flask

- Developed a churn prediction system using Logistic Regression, Random Forest, and SVM, achieving 80.2% accuracy.
- Created a Flask-based API and web interface to provide real-time churn predictions and retention insights.
- Automated feature engineering and data preprocessing pipelines, reducing preparation time by 40%.

Skills

Languages: Python, SQL, JavaScript, C++ , C

Web & Backend: Flask, Node.js, React.js, Next.js, REST APIs, GraphQL, Convex

Databases: PostgreSQL, MySQL, MongoDB, Redshift, Redis

AI & ML: scikit-learn, XGBoost, LightGBM, Random Forest, Logistic Regression, SVM, RAG, OpenAI

DevOps & Cloud: CI/CD, AWS, Google Cloud Platform, GitHub Actions, Docker

Tools & Frameworks: Git, VS Code, Postman, Anaconda, MySQL Workbench, PyTest

Systems & Architecture: Linux, Bash, Memory Management, Scheduling, Virtual Memory, I/O, Caches, Multithreading
