Ph: +1 -(724)-713-2907 | <https://leetcode.com/u/VineeshaKatta/> | Pittsburgh, PA

EDUCATION

- Harrisburg University of Science and Technology, Harrisburg, PA**
MS in Computer and Information Sciences – Software Engineering and Software Testing (Computer Science)

SKILLS

- Languages:** Server-Side Java 11 or above, Python, MYSQL, Oracle, PostgreSQL Front End Development HTML, CSS, JS, Angular, React
- Technologies:** RESTful APIs, Microservices architecture, Computer Architecture, Algorithms, Data Structures, Web Flux, JDBC, JPA, acceptance criteria business design pattern, Oracle, Oop's Object Oriented Analysis Languages, Developed enterprise SaaS software using modular, JavaScript components and data visualizations, Operating Systems, SonarQube/Sonar Lint, Junit Mockito, Kafka, Message Queues, WebSocket, Pub/Sub, OAuth2, Ssl, Wso2, Data Security, Gateway technologies with token, HDFS, Amazon Elastic Search, Log4j, Kibana and Kiali, AWS S3, GCP, Authentication, Postman API, Open API(Swagger), Unit Testing, CI/CD Continuous Deployment Continuous Integration Pipeline, Jenkins, Devops Tools, Docker, Containers and Microsoft Azure, Load balancing, Functional Programming Language, LLM, Web Development, Kubernetes, JSP, JQuery, HTML, CSS, JEE, XML, RDBMS, Python Scripts, SQL Server, Dynamo (Glue), Shell Scripting, SpringBoot, NoSQL, Jira/Confluence Tickets. **Other Tools:** Jira, Confluence, Version Control Git, GitHub, Bitbucket, Software Development Lifecycle, Microsoft Word and Excel tools

PROJECTS

Spring-AI Prompt Processing - [GitHub](#)

Nov. 2024 – Present

- Developed a **Spring-based AI application** for handling multimodal AI capabilities using **Spring OpenAI APIs**.
- Created **RESTful APIs for content generation**, including **image and audio processing based on user input**.
- Integrated a **dictionary API** to provide **real-time definitions and contextual insights** for AI-generated content.

PROFESSIONAL SUMMARY

- Experienced API Developer with 6 years in creating and managing applications, specialized in building efficient **Microservice APIs using Restful web services**, MVC Architecture. Approach to Debugging Defects, Clean, fix bugs with Root Cause Analysis, Verification, strong troubleshoot of Complex Challenges problem-solving skills and optimization of APIs for load balancing, High Availability of scalability and efficiency in Distributed Real Time Data Systems.
- Strong proficiency in Relational Database Management of MySQL, PostgreSQL, MongoDB, Json/XML/CSV using Spring Data with JPA.
- Expertise in Service Delivery **Search Engine technologies with tools like Kibana and Kiali**, deployed in diverse higher environments.
- Deploying applications in the Cloud Platforms using technologies like **AWS, Docker, Jenkins, Devops, CICD Pipeline, OpenShift Kubernetes**.
- Provided technical recommendations, influenced the best Coding Standards for the technical team and implemented solutions and delivered high-quality software, artifacts on a timely basis, collaborated across Multiple Team Members for process Improvements.
- Maintain a Responsible Product design which follows software development Methodologies and best practices of API Security rules.
- Brainstormed Ideas with multiple business owners to translate **functional requirements to technical design**, Software Solutions, Coding Practices, Refactoring Modules and ensured that features were Quality Engineered and delivered technical demonstration.
- Design, Develop and **document** an architecture with low-level design for Troubleshooting Production ready Real time applications.
- Proven ability Stay up to date, Adapt with latest industry trends like Spring AI, Machine Learning, Pytorch, Tensorflow and Implement New Technologies and improve performance.

EXPERIENCE

Senior Software Engineer, [Mercedes-Benz Research and Development India, Bangalore, India](#)

May 2022 - Apr 2023

- Designed and deployed **Spring Boot 3.x** microservices with RESTful APIs for high-performance, scalable applications.
- Developed **event-driven architectures** use **Kafka** for real-time message processing.
- Managed deployments on **AWS ECS and Lambda, GCP, Kubernetes, and Docker** while automating CI/CD pipelines with **Jenkins**.
- Ensured **99.9% system uptime** through robust logging and monitoring tools (**Kibana, Log4j, Kiali**).
- Implemented **OAuth2, JWT authentication, and API security** for user and system authorization.

Senior Systems Engineer, [Tata Consultancy Services, Bangalore, India](#)

Dec 2020 – Apr 2022

- Led **API Development** Projects for a healthcare project, Lead **5+ junior developers** in building secure and scalable microservices.
- Designed, developed and Documented Technical Documentation of APIs using Swagger/OpenAPI for seamless integration.
- Managed secure API communication through token-based authentication and API gateway technologies.
- Collaborated in Agile Software Development and Sprint Planning with cross-functional teams using JIRA and Confluence for tracking.
- Distributed teamwork** environment Experience with frameworks methods and libraries, Ability to adhere to strict delivery schedules and successfully manage multiple projects simultaneously

Java Developer, [TechNVision, Hyderabad, India](#)

Nov 2017 – Nov 2020

- Developed and optimized Java/Spring Core microservices for the banking domain.
- Led monolithic-to-microservices migration, improving performance and scalability.
- Collaborated with stakeholders to translate business requirements into technical solutions with attention to detail, Schedules and Organizational Time Management.
- Utilized Hibernate, JPA and maven for Backend Software Development Tools and API Persistence layer.
- Provided code review and writing feedback to improve efficiency and deployment readiness.
