

Vineeth Reddy Gadila

Los Angeles, CA | +1 (909) 341-7403 | vineethgadila@gmail.com | linkedin.com/in/vineeth-reddy-gadila

Professional Summary

Data Analyst with 4+ years of experience transforming complex datasets into actionable insights. Proficient in SQL, Python, Tableau, Power BI, and Excel; experienced with ETL, AWS, and BigQuery, and foundational predictive analytics. Partner with stakeholders for KPI design, dashboarding, and reporting automation that improve efficiency, reduce costs, and support data-driven decisions and deliver end-to-end analytics solutions that significantly improve reporting speed, data visibility, and decision-making across business functions. Built scalable data pipelines and automated workflows that removed bottlenecks and cut manual reporting time by more than 40%. Identified key performance trends and operational gaps, equipping leadership with insights that shaped strategic direction. Worked closely with cross-functional teams to ensure analytics initiatives were aligned with organizational goals, delivering measurable improvements in performance and execution.

Technical Expertise

Data Analysis: SQL (MySQL, PostgreSQL, Oracle), Python (Pandas, NumPy, Matplotlib, Seaborn), R, Statistical Analysis

Visualization & BI: Tableau, Power BI (DAX, Power Query, Looker, Excel (VBA, Pivot Tables)

Automation & Cloud Platforms: ETL Pipeline Development, Reporting Automation, AWS (S3, RDS, Lambda), BigQuery, Snowflake

Machine Learning: Regression, Classification, Clustering (scikit-learn), Predictive Modelling

Tools & Methods: Git, JIRA, A/B Testing, Data Modelling, KPI Development, Agile/Scrum

Soft Skills: Interpersonal & Communication, Technical Writing, Analytical Thinking, Adaptability, Client Communication

Professional Experience

Inland Empire Health Plan

Jan 2025 – Present

Data Analyst

- Automated reporting pipelines with Python and Excel, reducing manual work by 40%.
- Designed Tableau dashboards to monitor customer KPIs, increasing engagement by 15%.
- Optimized SQL queries, improving reporting efficiency by 30%.
- Work with leadership and department heads to provide data analysis for strategic planning.
- Collaborated with cross-functional teams to deliver insights supporting key business strategies.
- Developed ETL workflows to integrate data from multiple sources, improving accuracy and availability for real-time decision-making.
- Performed in-depth trend and variance analysis to identify performance gaps and support forecasting initiatives.
- Presented analytical findings through clear visualizations and reports, enabling data-driven actions across departments.
- Built automated checks to maintain data consistency and ensure reliable reporting.
- Supported quarterly business reviews with data-driven recommendations to improve performance.

- Partnered with product and operations teams to define reporting requirements and deliver solutions that improved decision-making.

Kent State University

Sep 2023 - Dec 2024

Research Data Analyst

- Developed Power BI dashboards analyzing learning management system data for 5,000+ users.
- Analyzed 500,000+ student records using SQL and Python, maintaining 99% data accuracy.
- Built automated data validation processes to catch errors before impacting reports.
- Presented analysis findings to university leadership every two weeks.
- Worked with academic departments to improve data collection and management practices.
- Contributed to initiatives that improved student retention by 12%.
- Designed predictive models to identify at-risk students early, enabling targeted interventions that boosted retention outcomes.
- Streamlined reporting workflows by automating routine queries, reducing manual processing time by 35%.
- Translated complex data patterns into actionable recommendations, influencing academic planning and resource allocation.
- Developed standardized reporting templates to ensure consistency across multiple departments.
- Collaborated with IT teams to enhance data security and improve access controls for sensitive student information.
- Supported accreditation and compliance reporting by ensuring data accuracy and timely submission of required metrics.

Inventzo Systems

Dec 2021 - Aug 2023

Junior Data Analyst

- Developed financial and operational dashboards in Power BI and Excel for business stakeholders.
- Supported predictive modelling by preparing and validating datasets.
- Implemented quality checks that reduced reporting errors by 15%.
- Automated parts of the monthly financial close process, saving 5 days per cycle.
- Supported various analytics initiatives across finance and operations teams.
- Optimized SQL queries and Excel models to improve data refresh speed and reporting efficiency by 25%.
- Identified cost-saving opportunities through variance analysis and data-driven forecasting.
- Collaborated with FP&A teams to design KPI reports, enabling more accurate budgeting and resource allocation.
- Developed automated reporting templates to ensure consistency across recurring financial reports.
- Partnered with accounting and operations teams to reconcile data discrepancies and improve data accuracy.
- Partnered with accounting and operations teams to reconcile data discrepancies and improve data accuracy.

Project Highlights

Sales Forecast Dashboard | SQL, Tableau, Python |

Built a machine learning model to forecast sales across 20+ product categories using 3 years of historical data. The model improved forecast accuracy by 20%, enabling the business to optimize inventory levels and reduce carrying costs by approximately \$ 300,000 annually. Created an interactive dashboard for exploring forecasts at different levels.

Customer Churn Analysis |Python, scikit-learn, Power BI |

Developed a classification model that identifies customers at risk of churning with 85% accuracy. Built a Power BI dashboard showing risk scores and key factors driving churn. The insights helped the customer success team reduce churn by 10%, retaining around \$1.2M in annual revenue. collected and cleaned customer usage data from multiple sources to ensure data quality before model training and analyzed behavioral patterns to identify the most influential predictors of churn. I also partnered closely with the customer success team to translate the model output into clear, actionable strategies, allowing them to prioritize outreach efforts and improve retention outcomes.

Finance KPI Automation |Python, Excel, SQL |

Automated a manual reporting process that took 40 hours each month. Built a Python-based pipeline that pulls data from 5 different sources, transforms it, and generates reports in 10 hours with no manual intervention. Eliminated data entry errors and improved consistency across reports. I implemented data validation checks to ensure accuracy at every stage of the pipeline and set up scheduled runs to deliver reports on time without delays. I also created centralized documentation and reusable scripts to make the process easy to maintain and scale. The automation reduced dependency on manual work, improved reliability, and freed up the team's time to focus on analysis instead of repetitive reporting tasks.

Education

Kent State University, Kent, OH

Aug 2023 – May 2025

Master of Science in Computer Science (GPA: 3.8/4.0)

Relevant Coursework: Database Systems, Data Mining, Machine Learning, Statistical Analysis, Information Visualization.

Certifications

| Tableau Desktop Specialist |

| Microsoft Power BI Data Analyst Associate |

| ISTQB – Foundation Level (CTFL) |

| AWS certified Data Analytics – speciality |

| Google Data Analytics Professional Certificate |
