PROFESSIONAL SUMMARY

Versatile and results-driven **Full Stack Developer** with over **4+** years of experience in designing, developing, and deploying scalable full-stack web applications using software engineering best practices with **Django, Flask, Python, and React**. Proven expertise in building secure **RESTful APIs** and **Fast APIs** with strong **API** design principles and seamless server-side integration, providing technical guidance throughout the software development lifecycle, and developing robust **ETL** pipelines and efficient data collection processes. Skilled in translating business requirements into technical specifications, optimizing operational efficiency, and managing cloud services and infrastructure on **AWS (EC2, S3, Lambda), Azure, and GCP**. Adept at solving complex issues, continuously improving application performance and driving process improvement, and enhancing intuitive **UI/UX** user experiences aligned with industry trends.

TECHNICAL SKILLS

Languages: Python (strong object-oriented programming skills), Java, JavaScript, C, C++, Ruby, HTML, CSS

Frameworks/Libraries: Django, Flask, Ruby on Rails, React.js, Fast API, Rest API

Databases: SQL, MySQL, PostgreSQL, DynamoDB

Platforms: AWS (EC2, S3, Lambda), GCP (GKE, Pub/Sub, Dataflow), Azure

DevOps & Tools: Git, Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, Bitbucket Pipelines)

Data & Analytics: Pandas, Power BI, Apache Beam, PyTest, JUnit, OAuth 2.0

AI/ML: Machine Learning, Generative AI, Scikit-learn

EXPERIENCE

Hexanika, Inc – Full Stack Developer

May 2024 – May 2025 | Little Rock, AR

Technologies: Django, Python, React, PostgreSQL, AWS, GCP, Docker, Kubernetes, CI/CD

- Developed and deployed full-stack web applications using **React** for dynamic **UIs** and **Django** for scalable backend services, aligning closely with defined project scopes.
- Integrated a **machine learning** and **GenAI**-powered scoring algorithm to evaluate user authenticity and automate fraud detection workflows, contributing to business growth in finance and accounting domains.
- Engineered anomaly detection models using **Python** and **statistical techniques**, improving **real-time** monitoring and debugging capability.
- Provided technical guidance during the migration of legacy services to **AWS** and **GCP**, **leveraging EC2, Lambda, S3, and GKE** to enhance scalability and system uptime.
- Refactored **PostgreSQL** and **DynamoDB** schemas using strong knowledge of data structures and algorithms, reducing query latency by 40% while aligning schema design with business requirements.
- Designed and implemented microservices architecture using **Docker** and **Kubernetes**, ensuring data protection and **SSL**-based secure services, promoting modular development and continuous improvement.
- Automated **CI/CD** pipelines via **GitHub Actions** and **Bitbucket Pipelines** following **agile** and **scrum** methodology to streamline project execution and ensure reliable deployments.

Netelity Web Solutions Pvt Ltd – Software Engineer

Dec 2020 – Jan 2023 | Bangalore, India

Technologies: Flask/Django, Python, MySQL, Power BI, JavaScript, OAuth 2.0

- Engineered and maintained proxy web applications using **Flask/Django**, reducing manual data extraction by 30% and supporting effective communication of business logic.
- Built robust **ETL** pipelines and full-stack integrations for E-Commerce analytics, transforming raw data into actionable insights.
- Developed interactive **Power BI** dashboards to visualize **API** outputs and support technical documentation and responsive design.
- Optimized **SQL** queries and implemented advanced indexing strategies to enhance performance, addressing project scope and scalability.
- Created secure **RESTful** and **Fast APIs** using **Django** and **Python** for scalable enterprise applications, aligning with industry trends and technical specifications.

- Implemented **OAuth 2.0**-based authentication with encrypted token handling, ensuring compliance and secure user access protocols.
- Participated in code reviews and collaborative **Agile** planning sessions to uphold development standards and industry best practices.

Grey Campus Edutech Ltd – Technical Trainee (Intern)

Sep 2020 – Dec 2020 | Telangana, India

Technologies: Ruby on Rails, SQL, HTML/CSS, Git

- Contributed to the design and development of learning modules using **Ruby on Rails** while debugging UI and backend integration issues with attention to detail.
- Applied **MVC** architecture principles and core software development concepts to streamline feature development and ensure efficient project execution.
- Collaborated on **Git**-based workflows and deployment pipelines while receiving mentorship from senior engineers.

ACADEMIC PROJECTS

Child Health Care Management System (Django, Python, SQL)

- Delivered a **role-based** full-stack web portal with an intuitive **UI/UX** design to monitor child health.
- Leveraged **RESTful APIs** for real-time health data integration.
- Implemented **business logic** aligned with project scope and healthcare workflows.
- Designed interactive dashboards with secure authentication and data access protocols.

Enhanced Photo Storage App (Flask, Python, Google Cloud)

- Developed and deployed a **Flask**-based photo storage application with cloud integration using **Google Cloud**.
- Integrated **AI**-powered image tagging and classification **APIs**.
- Debugged performance issues and optimized operational workflows.
- Created a responsive **UI** using **HTML5**, **CSS3**, and **JavaScript** with a focus on customer experience and front-end accessibility.

EDUCATION

M.S. in Computer Science, Florida Atlantic University, Boca Raton, FL

B.Tech in Computer Science, B.V. Raju Institute of Technology, India
