PROFILE SUMMARY

A versatile **Quality Assurance** professional with over **3 years** of hands-on experience, from internship through mid-level role, across diverse domains. Adept at authoring and enhancing Selenium, Playwright, and Cypress automation frameworks in Java and JavaScript, and binding REST-Assured/Postman API tests into Maven-driven CI pipelines (Jenkins, Bitbucket). Proven ability to containerize test environments with Docker and BrowserStack for robust cross-browser coverage, while leveraging SQL (MySQL & PostgreSQL) and Python for data-driven scenarios. Agile-savvy team player who swiftly adapts to new tools (Appium, Robot Framework), collaborates effectively in person pods, and drives continuous testing practices to accelerate release cycles.

TECHNICAL SKILLS

Automation Tools: Selenium WebDriver, Cypress, Playwright, Appium.

Programming & Scripting Languages: Java, Python, JavaScript, TypeScript, SQL, C#, C++.

Testing Frameworks: JUnit, TestNG, pytest, NUnit, Cucumber (BDD), Robot Framework Libraries.

API Testing Tools: Postman, REST-Assured, SoapUI, HTTPClient.

CI/CD & Build Tools: Jenkins, GitHub Actions, GitLab CI, Maven, Gradle.

Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, JIRA, Confluence.

Test Management Tools: TestRail, Zephyr, qTest.

Cloud & Containerization: AWS, Azure, Docker, Kubernetes.

Database Technologies: MySQL, PostgreSQL, MongoDB, SQL Server.

QA Methodologies: Agile (Scrum/Kanban), Waterfall, Test-Driven Development (TDD), Behavior-Driven Development (BDD), Continuous Testing, Regression Testing, Smoke Testing, Sanity Testing.

PROFESSIONAL EXPERIENCE

Quality Analyst - SDET

Feb 2025 – present | Remote, US

Dell Technologies

- & Gathered requirements from SMEs and documented use cases, flowcharts, and acceptance criteria in Confluence to clarify enhancements for the HealthRules Payor claims module.
- & Automated core UI validations using Selenium WebDriver (Java, C#), consolidating smoke and regression tests into a unified suite.
- & Authored Python scripts to generate test data and parse EDI 834/835 files, ensuring repeatable, data-driven test scenarios.
- & Integrated automation suites into Azure DevOps pipelines, monitoring build jobs and stabilizing XPath/CSS selectors to reduce flaky failures.
- & Maintained and updated test artifacts, including Test Plans and test case repositories, in Azure DevOps to reflect evolving requirements.

Software QA Engineer

Jan 2023 – Jul 2023 | Remote, IN

Accenture Solutions Pvt. Ltd. (Client: Logitech International S.A)

- & Implemented and maintained Selenium WebDriver scripts in Java for core web flows (login, search, navigation), collaborating with a 3-person QA team to ensure cross-browser consistency.
- & Contributed to a modular, data-driven TestNG framework using Maven and Apache POI, streamlining test data management for nightly regression runs.
- & Enhanced parallel test execution on Selenium Grid, working alongside DevOps colleagues to containerize browsers in Docker and reduce suite runtime by 60%.
- & Integrated automated test suites into Jenkins pipelines, coordinating with CI/CD engineers to trigger smoke tests on every feature branch merge.
- & Reviewed and refined test cases based on user stories, leveraging Java, C# and TestNG annotations to prioritize critical scenarios for the sprint.
- & Logged and triaged defects in JIRA with detailed steps, severity tags, and screenshots; validated fixes in tandem with two developers during sprint demos.
- & Participated in daily stand-ups and bi-weekly sprint retrospectives, sharing insights on automation coverage and identifying gaps for future test cases.

Quality Assurance Engineer

Jun 2021 – Dec 2022 | Bangalore, IN

Accenture Solutions Pvt. Ltd. (Client: British Telecom)

- & Implemented Playwright and Selenium scripts in Java, C# and JavaScript to validate new UI components, collaborating with a QA team to ensure consistent behavior across Chrome, Firefox, and Safari.
- & Enhanced the existing TestNG framework by integrating BrowserStack sessions, which expanded cross-browser coverage by 40% without extending execution windows.

- & Performed manual and exploratory tests on IP product modules, logging over 150 defects in JIRA with detailed reproduction steps, screenshots, and severity tags.
- & Verified REST API responses using Postman and REST-Assured for 30+ endpoints per sprint, working alongside backend engineers to clarify JSON schema discrepancies.
- & Prepared and executed SQL queries against MySQL and PostgreSQL databases, ensuring reliable test data states for data-driven scenarios.
- & Configured Bitbucket Pipelines to run Cypress and Selenium suites on each feature branch merge, reducing manual regression runs by 25%.
- & Supported sprint-end smoke tests and basic performance checks with JMeter, assisting release coordinators during off-hour deployments.

Software Testing Intern
CS Tech Solutions

Dec 2020 – May 2021 | Bangalore, IN

- & Assisted in developing Selenium WebDriver scripts in Java to perform smoke tests on web application modules, contributing to a 20% reduction in manual test time.
- & Executed manual test cases documented in TestRail for user registration and profile update features, reporting 20+ defects with precise reproduction steps.
- & Documented test results and defect lifecycles in JIRA, applying labels and linking to Confluence test plans for clear traceability.
- & Monitored Jenkins build jobs to trigger nightly regression suites, reviewing HTML/XML reports and flagging critical failures.

PROJECTS

Handwritten Text-to-Digital Converter

- & Collaborated in the implementation of an OpenCV-powered preprocessing pipeline in Python, standardizing image inputs for the CNN encoder and boosting character recognition consistency.
- & Tuned TensorFlow CNN/RNN hyperparameters and crafted data-augmentation scripts, increasing model robustness to diverse handwriting styles by 25%.
- & Conducted unit and integration tests with pytest, validating each image-processing function's output against known benchmarks and achieving 90%+ test coverage.
- & Analyzed OCR results against a ground-truth dataset, logging misclassification cases and adjusting threshold logic to raise end- to-end accuracy to 93%.

Library Management System

- & Partnered with a small team to model and normalize a MySQL database creating ER diagrams and enforcing referential integrity for books, members, and transactions.
- & Developed Java DAOs in Eclipse using JDBC, enabling CRUD operations through a Swing-based front end and streamlining catalog updates.
- & Wrote and executed SQL test scripts to verify normalization rules and check constraint enforcement, identifying and rectifying two schema errors.
- & Performed functional tests on core workflows using Selenium WebDriver.

EDUCATION

Master's in Information Technology
University of Cincinnati

Aug 2023 – Dec 2024

Bachelor's in Computer Science and Engineering
Gitam University

Jun 2017 – May 2021
